W. C. T. U. PICNIC WILL

Was Held On Tuesday.

The Woman's Christian Temperance Union met on Tuesday in the lecture in charge, and a busy session was enjoyed in spite of the heat.

The corresponding secretary read communication asking aid in the building of a W. C. T. U. structure in Toronto. It was decided to inform the union that they could not give help at present, as they were themselves in pecuniary straits regarding a suitable building.

A letter from Miss Griesbach. Collingwood, relating to narcotics, was also read, and a motion passed to try any introduce to London homes "The White Tyrant," a story-book relating to the downfall of a boy from the use of narcotics.

Rev. Mr. Whiting, of the First Methodist Church, addressed the meeting from Luke, iv. The president announced that the annual picnic of the local union is to

be held on July 12, and all arrangements which could then be made were of at once proceeded with. Those present were informed that the next session, June 28, is to be superintendents' report day for the quar-

BUMPED A CHIMNEY

New York, June 14.-Fred Owens, a 20-year-old aeronaut of Belleville, N. J., brought business to a virtual standstill in Lower Manhattan today by flying across the Hudson River in a dirigible balloon, and then attempting to land his craft in City Hall Park. Owens found that landing had its elements of hazards as well as those of flying. His dirigible became un-manageable in the vagrant air current between the city hall and the county court house, and the framework of the gas bag bumped a chimney on the frame and putting the propeller out of business.

Owens threw out a rope and tried Owens made a test trip of ten miles with his dirigible this morning from Belleville, N. J., to Passaic and re-

Cochrane's First Paper. TOO MANY COOKS SPOIL THE BROTH

Conflict of Authority On City's Electrical Department Seems Imminent.

GLAUBITZ IS CRITICIZED

Engineer Dark Does Not Like His Report on the Springbank Pumps

-Duties of the Engineers. With the appointment of Mr. Frank R. Dark as power solicitor, there may be a conflict of authority as to duties

to be performed. The board now has in its employ Mr. Dark and Engineer Roberts, and the duties of each have not been clearly defined. As a result there is a possibility of a clash of authority, an evidence of which was shown yesterday afternoon at the meeting of the water commissioners.

When Engineer Glaubitz had concluded the reading of his report, the recommendation regarding electric pumps was disposed of, and he had been instructed to oversee the erection of the tower at the power house. Mr. Glaubitz and Mr. Roberts then retired, and Mr. Dark criticized Mr. Glaubitz's report.

Says It's Indefinite. "There are many things in this report that are not definite enough," declared Mr. Dark, "I think it too vague in many respects, and it should have been more fully explained. I think he is away out on his estimated cost of building the line from here to Springbank. The distance is not more than four or five miles, and I am of the opinion that we can lay the line for considerably less than \$10,000, probably half the cost.

"I do not think the suggestion that aluminum wire be laid on this line is a good one. We tried it in Detroit on the lines there, and we had to scrap it and substitute copper."

Work for the Commission.

"The commission have that in charge," pointed out Mr. Pocock.
"They are going to lay the line themselves. It has all been specially tested."

"Our experience with aluminum has not been a happy one," continued Mr. Detectives Now Believe That Porter Dark. "However, it may be all right Charlton Is Alive. in this case. We can buy copper very cheaply just now-cheaper than we will buy it again. There has been an over production, and now is the time has acquired information concerning to purchase a supply. You want to the murder of Mrs. Mary Scott Castle be very careful about the cable you Charlton, which has diverted the activbuy, too. I have seen some very peculiar deals with cable, and if you are not careful you are liable to get new line of inquiry.

Calling for Tenders. Mr. Dark gave his opinion as to the manner in which tenders should be called for on the underground work, and Engineer Roberts informed him that all such conditions had been complied with.

"I do not know that this comes under my jurisdiction," deckred Mr. vestigations of the detectives had Dark. "I merely wanted to make my-shown that Porter Charlton was alive self clear on the matter. So far as I on the night of June 9, three days afam concerned I would not want you to ter Mrs. Charlton is supposed to have purchase anything that was not right." The question as to whether Mr. Roberts or Mr. Dark is engineer will be settled by the board shortly. At

present nobody seems to know. BOARD OF HEALTH DIDN'T HAVE QUORUM

Consequently Milk Report and Appointment of a Bacteriologist Was Laid Over.

At a minority meeting of the board of health yesterday afternoon a petition signed by nearly forty physicians was presented, asking the board to appoint a city bacteriologist.

As there was not a quorum the matter was laid over until the next meet-It was the intention of the board to deal with the report of the sub-committee on certified milk, but this, too

was laid over. "We had better not report until we have a full meeting," said Dr. Williams. "The work of examining milk is being done by the milk commission of the city. Mr. Joseph Marshall has given the commission access to his dairy, and the bacteriologist of the commission is making tests in order to discover whether or not the milk will come up to the standard. So the work is going on in any event. It does not seem that we can do much at the present time, so we can lay the question over until the next meeting without

doing any damage." Scarlet Fever Epidemic. The scarlet fever epidemic was discussed at some length. For some time Dr. Williams has been perusing the report of the cases registered, with a view to finding out the particular

"The epidemic is general," said the doctor. "It can be traced to no particular source, but seems to be traceable to many causes. The type is so mild that it is probable that many cases have not received medical attention. It is a general outbreak, and will likely work itself through the city.'

Eleven Cases Reported. During the month of May there were 30 cases of scarlet fever. So far this month, eleven cases have been registered. "There is a slight decrease, I think,"

said Dr. Hutchinson. Some accounts were passed. Those present were: Mr. John Graham, chairman; R. A. Carrothers, Dr. E. R. Williams, Dr. Hutchinson, M. H.
