BE PRETTY! TURN GREY HAIR DARK

ite Recipe of Sage Tea and Sulphur.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or grey. Years ago the only way to get this mixture was to make it at home, which is mussy and trouble-some. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredien's, at a small cost. Don't stay givey! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the grey hair disappears, and after another application or two, your hair becomes beautifully dark, glossy and attractive.

The speaker paid a warm tribute to the leadership of Hon. Mackenzie King, whom he declared had shown himself to be invaluable to the settlement of industrial conditions and difficulties. U. S. Customs Official Places Lid On Canadian Liquor Exportation

Nov. 16.—Brewers and other liquor exporting interests in this city were perturbed today on learning that United States Deputy Secretary of Customs Ashworthy had issued an order to all customs officers of the United States along the Canadian frontier that no further shipments of alcoholic liquors were to be accepted for importa-

no further shipments of account industry were to decepted in high station nor released for export until further notice.

The question of the transportation of alcoholic liquors in bond through the United States for any other country has been fought through the United States courts, and an injunction was secured against the enforcement of an order prohibiting such transportation.

It was stated today that the order would mean the crippling of the entire export beer trade from Canada to the British West Indies, and immediate efforts will be made to have the United States authorities
