Are Your Pullets Laying.

This question is being asked at this season by persons keeping hens; and the answer is too often, "No! and suppose they won't lay until eggs get cheap next spring, just my luck." ought not to be your luck. Pullets hatched in April last should have commenced laying a month ago; while May and June hatches should be laying this month. It is not too late even now, to force the early pullets to laying in a few weeks. The late ones, even as late as July and August can be brought forward, so as to pay well, while eggs bring good prices. Strictly fresh, pullets eggs will probably retail as high as 50 to 60 cents per dozen, in Boston and New York markets, before March 1st, 1889. Mrs. L. J. Wilson of Northboro, Mass., snys: "In past years, I have noticed when my pullets laid at all, they would lay a litter and then, either want to set, or mope around for ten want to set. days, often for weeks doing no laying.
