## BRIDGES FROM 25 to 150 FEET

...For Ordinary Country Highway...

The first cost of these bridges is less than the common ordinary covered bridges of wood now in use. They are built of Iron and Steel, consequently durable and stronger for the money they cost, than any other bridge.

There is not a rivet in the bridge and it is well known that water and moisture lurks around rivets and close joints and soon rusts out. The patent for territorial right to manufacture for Ontario and Western provinces for sale at reasonable price. They are easily made, requiring but a few tools after castings are made. Any ordinary shop can build them. Patterns and castings furnished to order for manufacturing.
