President**

L.E. Products has been creating a delightfully unique range of ceramic based animals since 1983. Our figures are totally manufactured in Canada. Combining the original concept of decoupage with ceramics, the result has been taken to a new high art form.

Pleasing and pleasurable, our line of animals finds a welcome place in any style of home decor, ranging from the traditional to the contemporary or eclectic. All items are individually made by hand, with great skill and patience. L.E. Products stresses quality production in the knowledge that its figures are becoming collectables.

Retailers are pleased to learn that our styles and colours change to reflect trends in the market place, and that our line is within affordable price ranges.

Ceramics combined with decoupage have produced figures which are quickly becoming collectables.
