

TABLE OF CONTENTS

Working Papers, the result of research work in progress or the summary of a conference, are often intended for later publication by the Institute or another publisher, and are regarded by the Institute to be of immediate value for distribution in limited numbers — mostly to specialists in the field. Unlike other Institute publications, *Working Papers* are published in their original language only.

The opinions contained in this paper are those of the author and do not necessarily represent the views of the Institute and its Board of Directors.

Dr. George Lindsey is a visiting senior research fellow at CIIPS and was formerly the Director of the Department of National Defence Operational Research and Analysis Establishment (ORAE).

Acknowledgements

The author would like to acknowledge the helpful comments on earlier drafts of this study by Fen Hampson, Ronald Purver, and others interested in the subject. He is grateful for the support of the Canadian Institute for International Peace and Security, and deeply regrets its deplorable termination.

Numbers and Quality of Conventional Weapons	3
Intermediate Nuclear Forces	7
Systems Designed to Counter Opposing Weapon Systems	10
II THE MODERNIZATION OF STRATEGIC BALLISTIC MISSILES	
ERIC AL LIMITATIONS	12
The Program of Modernization and Replacement of ICBMs	12
Measures of Effectiveness of Improving the Survivability of Land-Based Missiles	21
The Program of Modernization and Replacement of SSBNs	23
Modernization and Replacement in the SLBM Program of the United States	25
Modernization and Replacement in the SLBM Program of the Soviet Union	26
Measures of Effectiveness of Ballistic Missiles	28
The Use of Withdrawn Equipment in Other Roles	31
