

#### TESTIMONIALS.

"As a practical man Mr. Pickering's judgment on agricultural matters may be relied on, and therefore his book, which has indeed now reached a third edition, will be valuable to emigrants."—*Weekly Dispatch*.

"We spoke favourably of this little book on its first appearance in June, 1830, and as it has now reached a third edition, the public seem to have concurred in our opinion respecting it. It is the narrative of the author's travels and residence in the United States and the Canadas, but more especially in Upper Canada, from 1824 to 1830, and is written in the most proper style to convey information to those desirous of emigrating. The book is composed of a kind of journal or notes made at specified dates; and, from the perusal of other works, and the great variety of information which we have collected in the course of our inquiries for many of our friends and readers who contemplate emigration, Mr. Pickering's narrative appears to us "a plain unvarnished tale," free from prejudice, and in which no attempt is made to exaggerate or misrepresent any subject."—*Farmer's Journal*, April 23, 1832.

"The contrast of character of the Americans of the United States and of the British Colonies, and the variations of soil, husbandry, and climates, are minutely narrated. To the work are appended some general observations (for the work itself contains the personal diaries of Pickering) on outfitting, voyaging, and travelling expenses. The author thinks that 'people of most useful trades will find encouragement in the Canadas, and wages equal to that in any part of the States;' and, in illustration, he says that 'an Irishman, a bricklayer, who came out last spring, has been engaged in building a house during the summer, receiving daily 6s. 9d., his board, and a pint of whisky.' This will make the oppressed Patlanders be off in a whisk."—*Observer*.

"Mr. Pickering's narrative is that of a sensible and observant English farmer, who employed four years in traversing the United States and Canada, with a view to settle as an emigrant. He gives a comparative statement of the advantages and disadvantages to settlers of both countries, and decides in favour of the latter as best adapted for British artisans, farmers, and tradesmen. On the whole, it seems to us, that this is one of those books which every one who meditates emigration will do well to peruse before he makes his irrevocable decision."—*East Anglian*.
