

## **Relief for Crop Failure Sufferers**

In view of the drought and hard times on several land districts, it was voted on 20th of July, 1914, to protect all entries on the districts immediately, and to accept no applications for land after the 1st of April, 1915.

It was also necessary to see that the home tenders in these districts were not in want of food or fuel, so they have been divided into districts, and relief supervisors appointed to supply them. They are given a monthly allowance for pigs and chickens, and the amount of their rent houses to do full work.

The Government has also undertaken to supply all seed grain necessary to seed this large area, and it is estimated that it will take nearly one and one-half million bushels of wheat, maize, barley, oats, rye, flax and potatoes.

An Order-in-Council has recently been passed granting all holders of entries in the Moose Jaw, Swift Current, Maple Creek, Medicine Hat, and Lethbridge land districts, who have been forced to leave their land for the purpose of securing employment, the privilege of acting as permanent residence during the year 1914, during which they were employed elsewhere.

This privilege is limited to cases of entrants who are actually in destitute circumstances owing to crop failure, and further that it applies only to entries granted prior to the 1st of August, 1914.

**The sum of One Million Dollars was set aside by the Government for the express purpose of providing seed grain for the settler in the crop failure district.** A further sum of \$150,000 was also granted toward the maintenance of these settlers during the winter months. Taking into consideration all measures of relief the Government is spending in the neighborhood of \$1,800,000 in this work.

The Government took particular care that the seed grain purchased for these needy settlers should be of the very best quality. To this purpose the services of two of the foremost seedsmen in western Canada were secured.

Every possible precaution has been taken by the Government to relieve the settlers of unnecessary hardship and to prepare them for next year's work. Actual practical assistance has been given; not mere promises of consideration.

Upon reading the above it can easily be seen that the Borden Government is

## **The Homesteader's Friend.**

More has been done for the homesteader since 1911 than during all the years of the Laurier regime.
