COBALT --- Silver Bar the Active Stock on the Mining Exchange --- COBAL WORLD'S MINING NEWS. SILVER BAR IS ACTIVE . SALE 100 W. A. Rog-WARIED Trast ____.ntee 20% or Fully Paid. The World's mining news is recognized by experts to be as reliable

Speculation Revived in This Stock. on Change of Ownership-Standard Shares Quiet .-

IN MINING MARKETS

World Office, Wednesday Evening, Sept. 18.

The Cobalt market showed considerable activity to-day. Silver Bar carrying off the paim for volume of business, over 6000 shares changing hands;

1000 of which sold in one block at 32. Nova Scotia was fairly active, too, a number of small lets being disposed of at 20 34 and 21. There appears to be a quiet accumulation taking place in this stock.

Red Rock came out again to-day, selling at 171-2 and 18. Altho there is no special news on this stock, yet it continues to be fairly active from time New York Curb Market.

to time. The regular standard Cobalt stocks were quiet. Silver Queen, Foster, Trethewey, Cobalt Central and Peterson Lake were so inactive that quotations were practically nominal.

LARDER WILL INTEREST.

But Capitalization Must Be Kept Reasonable.

Said a Cobalt stock broker to The

Said a Cobalt stock proker to The World yesterday: "I believe we shall Standard Stock and Mining Exchange. Asked. Bid. "I prophecy that any one who goes "I prophecy that any one who goes

very shortly see a big boom in the Larder Lake properties, provided the capitalization of the companies is not too large. In the past the capital of mining companies has been altogether too great; the public bought these shares without regard to the amount of water injected, because they were shares without regard to the amount of water injected, because they were possessed of the gambling fever, but to-day, with the lessons of the past unforgottan, they will be more judicious in selecting favorites. I think Larder Lake is destined to become as cele-brated as Cobelt but it is up to the Nipissing ... Nova Scotia brated as Cobalt, but it is up to the Larder Lake promoters to keep their capitalization within reasonable bounds." and authentic as is possible under the stress of a daily publication. Since

the opening up of the great mineral belt of Northern Ontario, Frank Burr

Mosure has represented The World at Cobalt as the centre of this development. Mr. Mosure has endeavored to give a fair, unprejudiced re-

port of any and all the properties which he has actually inspected. Where

news was furnished him by prospectors, he has used his best efforts to

prove the reliability of his informant. The acceptability of this news ser-

vice is shown by the large circulation that The World has among mining

men and capitalists, both on this continent and in Europe. Items of min-

ing information supplied otherwise than from 'The World's own cor-

respondents are carefully edited, and for the future, as in the past, the

informant's name must accompany mining news of any description.

into the market at present prices on Cobalt stocks will find that his money will be doubled inside of six months. "At the present time New York curb is hustling into Cobalt stock and do-ing a bigger business than the Stan-dard Stock Exchange in Toronto 2.00

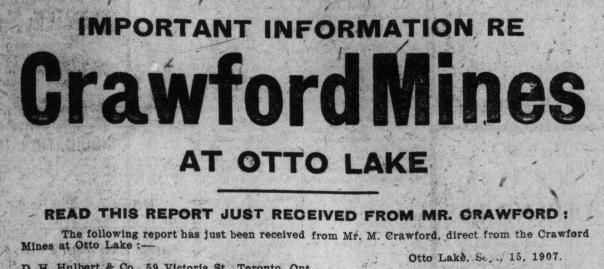

does. "You can take it from me that Cobalt is better than it ever was. I have been up there, and I know that the silver is there. I look to see Cobalt camp take its position again as 2015 the greatest mining camp in Am-18 erica."

FIRST STEAMER SAILED NEW BRANCH CANAL Victoria Road Fair Made Memororable by Arrival of Govt. Steamer Bob Hull.

FENELON FALLS, Sept. 18 .- Vic-

toria Road Fair was a great success.

Fully two thousand people were in

D. H. Hulbert & Co., 59 Victoria St., Toronto, Ont. Gentlemen,—I arrived at the mines late last night, having come up from Englehart. I have not time to write a long report before the train leaves. In fact, we are awfully busy here at the mines.

Mo. 1 shaft is still improving and is down about 30 feet. Heavy rains, however, have de-layed work somewhat on this shaft, on account of no covering. We must at once build a house over this shaft in order to make rapid progress. No. 5 shaft has ore exposed fully 25 feet wide and 14 feet deep at the present time. Over 100 tons of ore have been taken out of this shaft of which 40 tons have been assorted and is good

shipping ore. I am sending you a sack of ore from this shaft No. 5. Am also sending a sack of ore from bottom of shaft No. 1.

I think we have one of the greatest properties ever discovered in northern Ontario. A party coming up on the train took 500 shares. He is from McDougall's Chutes. Another party here wants \$5,000.00 worth of Crawford stock for cash. Please advise at once if we can spare this amount. Everybody here at the mines and around this section are buying all they can pay for. They know how these properties are showing up and what we are now taking out of them.

Yours truly, (Signed) M. CRAWFORD.

P.S.-We now have about 250 tons of ore, out of shaft No. 1 ready for shipment. This does not include the ore taken from shaft No. 5. We must now fit up to work all winter. I wish to install a steam hoist as soon as possible, so that we can sink at least shafts No. 1 and No. 5 to a depth of 200 feet .--- M.C.

The following is taken from a letter written by Mr. I. A. Spear from Englehart, Ontario. Mr.

upon the same vein, but further back from the river. Half way between the river and shaft No 1 (which is now down 27 ft.) he is starting an-other shaft. This last-named shaft is also on the new vein, and he says in very rich ore. He says that when he goes down about 70 ft. further he will, he thinks, reach water level, and will then find

that when he goes down about 70 ft. further he will, he thinks, reach water level, and will then hid exceedingly rich ore. He has not yet found the width of the yein. He says, however, that he is sure it will be full size between walls, which he thinks is about 7 ft. About shaft No. 1—It is looking fine. Mr. Crawford says he has 200 tons of ore on the dump which is good shipping ore. He states further that this shaft will now produce at least 10 tons of shipping ore per day, with three men working. He wants you to take up the matter of shipping ore to the Sudbury and New Jersey smelters. Mr. Crawford also wants you to arrange with the railway people to put in a siding on the Crawford properties. He has had some talk with one of the railway officials, who was on the ground and looked at the shafts and ore, and the property in general, and he spoke to him about the siding. This official advised that we make ap-plication to the company's chief engineer in Montreal, and they would see that the siding was put in. This should be done without delay.

We are now mining shipping ore. The outlook is fine. Crawford stock is worth at the pre-sent time at least 50 cents a share, and will be at par within 8 months. We want you to come up without fail as soon as possible and look the proposition over. Bring any stockholders and any persons wishing to invest, if you can. We are here and we think we have got the goods.

(Signed) I. A. SPEAR.

Possibilities.

ath shore properties, associated with

South shore, properties, associated with a south shore, properties, associated with the native copper, but no large amounts have yet been taken out. Similar association of the silver with the copper is found on Michipicoten Island, and whether it will be found in larger amounts than on the south shore one cannot say. Certainly rich specimens of it do occur, so rich that had they come from the vicinity of Cobalt there would be a stampede at once. It is to be noted that the diabase with which everyone admits the silver of Cobalt is connected, is probably of the same age as the enormous diabase intrusions found on Michipicoten Island. Further, it is to be noted that the adsociated of the solution of Michipicoten of the solutions found on the two districts, the so far as discovered not yet in large amount at Michipicoten. One must, however, be guarded in inferring that because diabase eruptives of the same age occur at both places, and that the nickel minerals associated with silver or the basine age occur at both places.

Toronto Stock Exchange Unlisted

that because diabase eruptives of the same age occur at both places, and that the nickel minerals associated with silver are found in both places, both places will be equally rich. The shullarity is, however, excellent ground for the careful prospecting of Michipicoten Island for silver, altho perhaps the probabilities are that native copper will in the long run prove the more remunerative. In scarching for native copper, it is well to remember that there are two classes of ores, the one found in the con-glomerate and amygdaloid beds, and the other found in the veins crossing these beds. No copper is found in the acid eruptives, nor in the massive portions of the diabase; it is the upper vesicular por-tions of the lava flows in which the cor-per is found. Epidote, chlorite and preh-nite are the most frequent mineral asso-clates of the copper. Water weins are found they usually widen in passing thru

LAND REFORM IN BRITAIN.

D. White of British Parliament 711/2 Addresses Single Taxers.

James Dundas White, member of the British House of Commons for Dun-bartonshire, Scotland, was entertained CON UP A QUARTER by a number of members of the Single Tax Association at luncheon at the

St. Charles yesterday. Mr. White, with Mrs. White, is now visiting the Do-Mrs. White, is now visiting the Do-minion to learn of its resources and its institutions. For some years Mr. White has been an earnest advocate of the abolition of the taxation of indus-the abolition of the taxation of industry, and, as a member of the house of commons, he is now pushing that reform towards its realization. Ald. Ben-

gough presided. Mr. White called attention to the agitation inaugurated by Mr. Chamber-lain. While that had failed of its im-mediate purpose, it kept the agitation for tax reform before the people. In the present parliament the land question had been one of the most promi-nent. The congestion of people in the cities had compelled the attention of 125 the public, and what more appropriate remedy than the removal of taxation of buildings? Some time ago a measure for that purpose, to be applied to Scotland only, was introduced into parliament, but the committee, after very careful consid-eration, concluded that it would be much wiser to begin by separating the value of the land from that of the improvements. This was done, and passed in the commons; but thrown out by the lords. This, however, does not end the matter, for, if necessary, this measure can be converted into a money bill, by including in it a clause relating to by including in it a clause relating to rating, which will put it beyond the power of the lords to defeat it. The speaker also pointed out that, unless the disposition of the lords changes very materially, it may be necessary to effect some reform in par-

liament so that the lords cannot act simply as stumbling blocks to social Mr. and Mrs. White left on the 3 HAVE CLOSED REL o'clock boat for Montreal, and will sail

relief of the victims

EVERYBODY WHO INVESTS IN THIS UNDERWRITING WILL GET INTO ONE OF THE BEST MINING INVESTMENTS EVER OFFERED IN CANADA. NOT AN APPLICATION WILL BE ACCEPTED AT THIS UNDERWRITING PRICE AT A DATE LATER THAN WEDNESDAY, SEPTEMBER 25.

BOOKS FOR SUBSCRIPTION to the \$15.00 underwriting memberships, giving 100 shares of Crawford stock, full paid and non-assessable, for each \$15.00 membership, will positively close not later than September 25.

We are now incorporating the Crawford Mining Company with only 600,000 shares of \$1.00 each. All stock full paid and non-assessable. Mr. Middleton Crawford will be the President and Manager, and Mr. D. H. Hulbert, of D. H. Hulbert & Co., will be the Secretary.

Subscriptions for \$15.00 memberships can be paid for in full with application, or if more convenient, one-half with application, and balance in 30 days. Payment should be made to the financial agents. This underwriting will close, as stated, on

or before September 25, when stock will be allotted and certificates delivered to subscribers as soon as possible thereafter.

Crawford stock will sell in 90 days for more than 100 per cent., and in twelve months for more than 700 per cent., above this underwriting price.

MAKE ALL APPLICATIONS AND PAYMENTS TO THE FINANCIAL AGENTS.
