USUAL SUMMER HOURS:
Saturdays... 8 to 10
Other days... 8 to 5

JOHN CATTO & SON
King-street—Opposite Postoffice,
TORONTO.**BRICK "BUMP THE BUMPS"**
TO STOP FAST MOTORING

Chicago Suburb Evolves a Crossing Contrivance to Enforce the Speed Bylaw.

Chicago, July 28.—The problem of regulating the speed of cars has been solved by Chicago. It is simple. Just make the fast-going machines "bump the bumps," and there you are.

Glencoe does not put it in any such crude way. It is simply going to "improve" Sheridan-road. This "improvement" is to consist of a bunch of men who attempt to "take the bumps" at high speed will be punished, the Glencoe village board believes, more than by any fine which could be imposed.

Policeman Arthur Johnson's action in using his revolver to halt a chauffeur who refused to stop after he had exceeded the speed limit of Evanston is being commended by Chief Frost.

"The autocrat who has violated the speed ordinance," said the chief, "is not so much as if he had violated any other law or ordinance, and a police officer has the right to stop him to make the arrest," said the chief.

Work on the bumps was begun yesterday. They will be made of brick and will be six inches high at the highest point. On each side will be a sharp slope that will cause the car to jump.

Policeman Arthur Johnson's action in using his revolver to halt a chauffeur who refused to stop after he had exceeded the speed limit of Evanston is being commended by Chief Frost.

"The autocrat who has violated the speed ordinance," said the chief, "is not so much as if he had violated any other law or ordinance, and a police officer has the right to stop him to make the arrest," said the chief.

SOME CITY HALL SETTINGS
TRAP FOR TUSOCK MOOTH

City Will Fight Closing of Edmund Street—Meter Water Rates—More Dismissals Expected

There is a trap to be laid for the tussock moth, and he will do well to steer clear of the bright lights if he doesn't want to die an oily death. Commissioner Chambers has read how John D. Rockefeller placed pans of coal oil under the eaves of his house, and he has decided to place the same around to blacken the artificial sunshine they bunched their heads against the glass and into the oil. It spoils the oil, but it kills the moth. The tussock moth increases rapidly where there is electric light. Mr. Chambers contemplates making a deal with the Electric Light Company with a view to trying the coal oil well experiment under the lamps. Mosquitoes, house flies and other wild beasts can get in on the too, if they want to.

Keep the Street Open.
Something turned up to turn down the conference between William Mackenzie and the board of control yesterday regarding the former's desire to close up Edmund street. Mr. Mackenzie, who is a property owner, was at the hall with the controllers, but no one was there to represent him. The matter was postponed.

Must Pay by Monday.
Just as a timely tip to today's taxpayers it might be mentioned that Monday is the last day to secure the bargain meter water rates. After that date of 2000 water consumers whose water supply is measured by meter, and they have been coming to the city hall with their money pretty well. More than half of them have paid up already, and the clerks will doubtless be busy with most of the other half to-day and Monday.

Moments With Dr. Sheard.
The investigation which Dr. Sheard proposes to hold into the usefulness and conduct of Frederick street yards will commence on Monday and will last several days. Changes of a radical nature are proposed, and they doubtless will be a number of dismissals.

Dr. Sheard has approved the plans for plumbing the interior of the Bank sky-scaper and wrought iron pipes can be used instead of cast iron as called for by the by-law.

There is a man who wants the privilege of establishing waste paper baskets on the streets. It won't cost him anything. He will make advertisements pay the cost of the baskets, and get out of it. Dr. Sheard will be asked to tell the board of control what he thinks about it.

For the information of Controller Shaw and other citizens who are interested, the board of control has ordered the city solicitor to report whether or not the head of a department must not be a board member dismissing employees.

More Changes Expected.
Hugh M. Graham has been appointed temporarily as city assessor, to succeed George Farley, who will fill the position of city clerk, vacated by Mr. McNeill. Commissioner Foran contemplates more changes in the department.

City Engineer Rust is going into the reorganization business soon. He is feeling strong after his holidays, and he has decided to dispense with the six ward foremen sent over to him from the street commissioners' department. He has other changes in view, and there is some head scratching among a few of the faithful.

Bring Contractors to Time.
Work has been stopped by the city architect's department on the new beach fire hall because Forbes & Son, the contractors, are not keeping the excavation free from water according to the specifications. The walls are up to the first story, and there is no drainage, and some arrangements will have to be arrived at with the contractors regarding it.

It is supposed that the scaffold which caused the death of Gilbert Forbes at 94 St. George street had only been used for the purpose of hanging the body, and had not been inspected by the city property department's representative, J. J. Frost. The scaffold was used for the purpose of hanging the body, and had not been inspected by the city property department's representative, J. J. Frost.

To Make Pure

Biscuit, cake, rolls, muffins, dumplings, etc., a pure leavening agent is indispensable.

While the Royal Baking Powder is reported absolutely pure and healthful, the official reports show most other baking powders, as well as the cream of tartar of the market depended upon by many housekeepers for raising biscuit and cake, to contain either alum, ammonia or sulphuric acid.

The Government Analyst of Ontario says:

"As a result of my investigation, I find the Royal Baking Powder far superior to the others. It is pure, contains none but wholesome ingredients, and is of greatest strength."

ROYAL BAKING POWDER CO., NEW YORK.

SHARK SCARES SWIMMERS.
Five Men Off Long Island Given Exciting Experience.

Oyster Bay, L.I., July 28.—Five men out for a long swim had an exciting experience with a shark in the bay this evening. The men caught half a mile from shore, the huge fish appeared to take delight in swimming around them, thrusting his nose, now in front, now at the side and now behind them. Huddled together and treading water, the five could only call for help. Just as they were beginning to grow tired the yacht Aquila, of the Harlem Yacht Club, came along and Captain James G. Getty hailed a very much frightened swimmer.

Sharks are plentiful in the Round of Oyster Bay, but they rarely come into the inner bay. They are supposed to be harmless.

NOTICE IS HEREBY GIVEN THAT William Edward Ogden, of the City of Toronto, County of York, and Province of Ontario, Merchant, will apply to the Court of York, Province of Ontario, for a bill of divorce from his wife, Jessie Helen Ogden, of the City of Toronto, County of York, Province of Ontario, on the ground of adultery, Alfred Hoskin, Solicitor for Applicant, Toronto. Dated Toronto, July 28, 1905.

City Dairy
ICE CREAM GARDEN

Our beautiful little park on Spadina Crescent, just south of the city hall, has been converted into an Ice Cream Garden for the summer.

We have enclosed a large space with a tent wall six feet high. Within are tables and chairs, dispersed about the lawn with flags and electric light strings about to embellish and illuminate the place. On Wednesday and Saturday evenings the place will be made more attractive with music from a string orchestra.

City Dairy Ice Cream and the newest summer drinks will be dispensed.
Belt Line, Bloor and McCaul cars stop at the Garden.
