Local News

The Newville Lumber Co. are rebuilding their mill near Parnborough, which was recently destroyed by fire.

The body of the late Margaret Darnley was taken to Oak Point on the Crystal Stream this morning for interment.

The woman who is interested in bargains will profit by reading J. Allan Bell's special advertisement in this issue.

Father J. F. Canon of St. George's at the Clifton, He has recently returned from a trip to upper Canada.

The Shelburne Gazette is authority for the statement that 100 moose have been killed in Shelburne Co. so far this season.

The Dominion civil service examinations will be held in this city on the 14th, 15th and 16th November, before W. S. O'Brien, sub-inspector.

The ladies of the Roman Catholic church at St. George are at present planning for a big supper to be held there in the course of a few weeks.

The Mount Allison football team will play the Acadia College team at Sackville tomorrow, when it is expected a fast, snappy game will result.

The case of Fred Northrup, who is charged with manslaughter, will come up in the police court on Monday morning at ten o'clock.

A big sacrifice sale of this season's ready-to-wear hats for ladies and children is now going on at J. Morgan & Co's, 629 Main street. The entire lot will be sold at 50c.

Gurney Division 8, of T. meets in the Temperance Hall, Market Building, this evening. Next Thursday evening Gordon Division will pay a fraternal visit to Gurney.

The Parisian, Capt. Johnston, the first Altus royal mail steamer, left Liverpool today for this port via Halifax with a large cargo and passenger list. The Parisian's coming will open up the winter port business.

Douglas Hunter, son of James Hunter, electrician and gunsmith, who met with a serious accident in the country early in the summer, having his right leg broken, is speedily recovering. The little fellow is still obliged to go about on crutches.

On Friday the sale of trimmed and untrimmed hats for women and children, which was so very successful today in spite of the rain will be continued, with a fresh supply. Over eighty pairs of slightly soiled woolen blankets will be offered tomorrow, as well.

Frank Burgess, says the Windsor, N. S. Journal, has received the appointment of superintendent of the new fish hatchery situated a short distance from the town, and left last week for St. John to receive a course of instruction to fit him for his new position. Chas. Dill, Edmund will be the assistant.

READY FOR THE TEST

Any business school will offer the "promise" of a situation. There is one school in this city so perfectly organized in all its departments as to offer you an absolute guarantee of a position if successful in passing its entrance examination.

A school which is opposed to proper organization and judicious canvassing for the advancement and development of business is fifty years behind the times. Any prospective student should accept a free trial of one week at The Currie Business University, Limited, then test the methods offered by any other school and compare.

This is the advice offered by the school which is fearless enough to challenge any school to produce its trained graduates (without office experience) for comparison under the limelight of criticism before any competent body of business men.

The Currie Business University is always open to this test, and it would be interesting to see which of the schools' methods would prove the successful one, though in the light of past events it is not difficult to make predictions.

REPORTED SALE OF SUN

A rumor was current on the street this morning that the sale of the Sun newspaper had been consummated, the price paid being \$65,000. It was also reported that S. D. Scott, the present editor, would remain in his position under the new owner, W. H. Thorne, when seen by the Times disclaimed any knowledge of the sale and said nothing further had been done in the matter. Certain parties had secured an option on the paper but the sale was not yet consummated.

DIPHTHERIA IN THE POST OFFICE BUILDING CREATES A SENSATION

Child Died This Morning and the Building May Be Quarantined—She Was a Grand-daughter of the Janitor—Sanitary Accommodation of Post Office Reported too Filthy for Description.

A death from diphtheria and the possible quarantine of the post-office were the startling rumors on Prince William street this morning.

The unsanitary condition of the post-office has long been notorious, and this latest significance to the rumors.

The death occurred this morning on the upper floor of the post-office of Edna Priors, the ten year old grand-daughter of Geo. Harrison the janitor. The child is a daughter of Mrs. E. A. Priors and had only been ill about four or five days. The indications point to diphtheria as the cause of death and naturally the employees of the post-office feel somewhat nervous, as it is possible that the disease (if it is diphtheria) may have been contracted by others in the building. An examination is now being made at the hospital to determine positively the cause of death. The child was taken ill about four or five days ago but a physician was not called until this morning, when Dr. P. R. Inches was summoned. He was called to the bedside of the child at 8.30 o'clock, and though he did all he could to save her the child died shortly before eight o'clock.

Dr. Inches, when asked by the Times as to the cause of death, said he would not care to say positively at the present time, but he was of the opinion that it was diphtheria. He said, however, that an examination was being made of the child's throat, but it would be about 12 hours before the cause could be learned definitely.

The board of health has been notified and will make an examination in the matter.

A Times man who visited the post-office this morning had his attention called to the filthy condition of the closets throughout the building. The sanitary conditions are filthy beyond description, and those who are acquainted with the state of the closets in the various parts of the building, and especially on the lower floors, have no hesitation in saying there is no wonder that disease should result, and they express surprise that sickness has not resulted before now.

The closets on the third floor, which was used jointly by officials of the department and the janitor's family, has been placarded and will not be used until after the result of the physician's test has been made, and according to some of the employees it should not be used any more until after it has received a thorough cleaning. The odors arising from these closets is almost enough to stifle one, and there has been a leakage of gas in the building for years, which has never received attention of any kind.

For a public building it is certainly a disgrace, and should be investigated at once. An inquiry was made at the board of health office this morning as to whether they had ever received a complaint as to the sanitary conditions there, but they stated they had not, and so far as they knew there was nothing wrong, but if a complaint were made it would be immediately investigated.
