And We do, by these Presents, further order and direct that in the event of the Judge who may preside in the said Court being prevented, by unforeseen circumstances, from opening Our said Court on any of the days herebefore appointed, or if the said Judge should arrive at any of the places herebefore named for holding Our said Court before the time stated for the opening thereof, and should deem it proper to open the same without delay, the said Judge may, and he is hereby authorized, to open and hold Our said Court on any other day or days than those herebefore specified, and to keep the same open for the respective periods herebefore stated as aforesaid, if he should find it necessary for the despatch of business to do so.

And of these Presents, all Magistrates, the Sheriff, Officers of the Constabulary Force, and all Bailiffs, Constables, Keepers of Goals, and all other Officers in the execution of their offices about the premises, and all and singular other persons whom these Presents do, shall or may concern, are hereby required to take due notice and govern themselves accordingly.

Mr. Norman Snow, accountant with the Hudson's Bay Company, arrived from a Hudson Bay post last week, after spending three years there. His many friends in this town are glad to welcome him home again.

Word has been received by Manager Russell, of the Newfoundland Government Railway, that the S.S. "Caribou" will undergo her trial trips the first of next month, after which she will leave for England to take supplies before coming out to this country.

C. H. E. Exams, 1925.

This year's results in the Council of Higher Education Examinations have been reported. Since the exams were written in June the holiday season has been enjoyed, but as September drew near the scholars have been filled with hope and fear as the results have become known.
In this town and vicinity the success achieved has been very gratifying. Success of this kind shows two things: Concentration to their work on the part of the teachers and hard study on the part of the pupils.
From time to time we hear voices raised condemning the C. H. E. Exams on the grounds that those taking the examinations are given all the attention while those not taking them are neglected.
A set programme of study is arranged and the examinations are taken from it. Throughout the year, the teacher follows this course of study to prepare his pupils for the examinations. In short, both teacher and pupil are working with an objective in view—that of finding out whether the knowledge imparted has been retained and only by examinations can this be known.
The pupil who studies for the exams and, through various causes, fails is also to be admired for having the ambition to try. To fail, when it leaves the determination to go on and do greater things, is not defeat. We say to those who have tried and failed: Nothing is unattainable. "He can who thinks he can."
We congratulate the successful scholars who are enjoying the thrill of victory. It is for them to make the most of their opportunities.
To those who have met success and those who have failed, we would give Kipling's advice: "If you can fill the unforgiving minute With sixty-second worth of distance run, Yours is the earth and everything that's in it And, what is more, you'll be a MAN, my son!"

COD OIL DROPPED.
The market for new cod oil has dropped to \$135 per ton for lots. The new oil is coming in slowly and is evidently being held back for higher prices. Heavy shipments, chiefly last year's oil, have been going out to New York and Liverpool for the past two months. The demand is fairly good, particularly in the American market, but as the Menhaden oil is now supplying a great many purposes, for which cod oil was formerly used and at lower prices cod oil sales are limited accordingly. The Menhaden fishery, on the whole, showed a good average this season.—Trade Review.

Work on the Dock

Work on the Dock at St. John's is going ahead splendidly and already the bottom has been completed for about 170 feet. The sides are finished for a distance of about 80 feet and partly so for an equal distance. Two large mixers are in operation and a steady stream of concrete is flowing from the towers to the workmen engaged in laying it. The space left by the narrowing of the top of the Dock has been filled in for quite a distance, giving a much broader road near the machine shops. Powerful pumps are constantly at work keeping the basin free of the water which leaks in at various points on the sides. Work on the cofferdam is advanced and the steel sheet piling with the cribbing inside is now being turned in toward the pump house and freight shed on either side. The piling extends between the Dock piers. The water inside will later be pumped out to allow the gate to be placed in position. When the operations are concluded the piling will be removed with cranes and the bridge work probably blown out with depth charges, the debris being cleared away by dredging as the approach to the gate is to be deepened.

Mine Re-opened

The La Manche lead mine, the first to be worked in Newfoundland, was opened 60 years ago. We are glad to learn that this property has been taken over by a Canadian company and will be worked during the coming fall and winter. Thirty-five practical miners are engaged on the preliminary work and it is expected that later on 60 men will be given employment.

S. S. Home Reports

A message from Capt. Norman was received by the Railway Management yesterday, after the arrival of S.S. Home at Humbermouth, reading as follows:—"Made all ports of call to Battle Harbour and return; fishery over on the Newfoundland side. Herring plentiful on the Labrador side."—Telegram.

TERRIFIC GALE AT LABRADOR.

Messages received from Labrador state that a terrific gale occurred there on Sept. 8th. It is likely that news of further damage will be reported. At Sandy Island the schooner Exotic of Random was lost with nine hundred quintals of fish.

BODY FOUND UNDER STABLE.

The body of John Manuel, who had been a patient of the Lunatic Asylum, and who escaped from that institution on July 12th, was found on Tuesday morning, Sept. 1st, under the barn of Mr. John Squires, of Thorburn Road, St. John's. Mr. Squires, who seldom had occasion to visit the building, saw a man's hat lying against the building and immediately started to investigate. Looking underneath the boards in the stable floor he found the dead man's body. He notified the authorities and the body was identified by the Asylum warden.

"Nfld. for Business and Pleasure."

We acknowledge with many thanks a copy of a book entitled "Newfoundland for Business and Pleasure" which has been compiled by Mr. Richard Hibbs, M. H. A.

It shows that the author has a vision of the future prosperity of Newfoundland for at a glance one can see that it will be an invaluable handbook for Tourists. The volume is profusely illustrated and contains pictures of the most prominent and picturesque places in Newfoundland. May we be pardoned for saying that the picture of Bay Roberts does not show the town at all but only a portion of an outlying section and a bridge leading to the town.
An abundance of information is given the reader and we can safely say that a person coming to this country for the first time would have little difficulty in choosing the most interesting places to spend a vacation if he possessed a copy of "Newfoundland for Business and Pleasure." We wish the author, Mr. Hibbs, abundant success in his work.

Mr. T. A. Corbett, of Anchorage, Alaska, is at Clarke's Beach visiting friends, after an absence of twenty-five years.
