America is Not to be Congratulated in Her Choice of Mckinley as a Candidate.

Republican Victory Means an Era of Exclusive Tariffs, Powerful Monopolies.

Platonic Gold Plank and Barricade Protection are Impossible Together.

London, June 18 .- Nearly all the morning papers comment upon the results of the St. Louis convention yester-

The Chronicle says: "Yesterday's ballots show a high tariff and sound money to be the watchword of the Republican party. We would heartily congratulate the Republicans upon the second of these if we did not fear that our words might be used to injure them. The high tariff would undoubtedly injure our trade, but we must take com-fort in the thought that nothing the United States could do would expose our commercial interests to so great a danger as would free trade in America. With regard to Mr. McKinley's personal character no word has been heard here which is not to his honor. We offer him our congratulations upon the position which he has attained in the eyes and hearts of so many of his coun-

The Times says: "Mr. McKinley won the first heat in the presidential race hands down; but the battle is not finally won. The silverites appear to find some comfort in the coincidence in the date of Waterloo, which seems to them an evil omen for the leader who purchased victory at their expense. Possibly the same spirit prevails in the Republican constituencies, especially in Western States Moreover

Democratic party have still to settle both on a platform and carried to and even if not tempted as a party to adopt Republican and Democratic silverite dissidents might yet bear out the views of some competent observer of American affairs, that the future will show the line of cleaverage in the United scarcely less deep or less dangerous than that which formerly divided the

The public did not come in as was hoped on the mere announcement that a gold plank had been included in the Republican platform. The explanation is that the public wisely determined to wait until a satisfactory solution of the question is in a fair way of being attained. American public men and journalists who talk as if Eurepean investors and speculators had some object in holding aloof from American securities are utterly mistaken. Nothing would please the people here and on the continet better than to buy American securities if those investors thought they were safe. Speculators especially are only too ready to give all attention to the slightest sign that there is a prospect of the currency system of the United States being reformed, but have been disappointed too often to commit ourselves to any extent until a definite declaration is expresse in a vote of the people of the United States in favor of gold. This, we are sure, would be followed by a great change in the attitude of European capitalists provided it is accompanied by

egislation placing the treasury in a position to make th estandard effective.' The Daily News says: "The important fact is, not Mr. McKinley's nomination, which was generally anticipated, but that he was compelled to stand on a gold platform. The significance of the adoption of the gold standard is two-fold. It shows that the great party which is now believed to control the political destines of the United States repudiates all designs of tampering with currency. It also forces Mr. Mc-Kinley to fight rather as a mono-metallist than as a protectionist. President 'leveland was the first to relieve the emocrats from the suspicion of financial unsoundness, but the Democrats not all orthodox economists. Like Mr. Cleveland, Mr. McKinley will have to uphold the flag of commercial honesty. The Republican party may bé congratulated, if not upon their candidature, at least upon the refusal to have enything to do with mischievous delu-

says: "The gold standard platonic af-firmation and protectionism of the bar-racade order are impossible together on the same programme. We take it that if hard and fast protection wins the day next November a baser currency is almost certain to follow. The victory of the Republicans means an era of exclusive tariffs, a jealous immigration law and the influence of powerful industrial nonopolies will be brought back to their fullest strength. We do not like the outlook. It is not good for the United States or for us. As capitalists we are vitally concerned there, but must bear the evil in the best way we can, as there is manifestly no help for it."

The Latest Venezuelan Scare Only Very Trivial Matter After All.

London, June 19.—The Daily News this morning claims to have authority for stating in connection with the latest reports regarding the trouble over the Venezuelan-British Guiana boundary dispute, that the Venezuelan troops were near the junction of Acarabest Creek with the Cuyuni river. They observed a number of British officials engaged in surveying a route towards Barima. Situation.

Toronto, June 20.-Day by day the prospects of an overwhelming Liberal victory in Ontario grow brighter. The best estimates give the Liberals from 55 to 60 seats in this province and the remaining seats to the government, Patrons and McCarthyites. It is very doubtful if the government will get more then twenty seats in the whole province of Ontario.

All over the country the Liberal meetings are crowded to overflowing and the enthusiasm unprecedented in any election since confederation. It is doubtful if even in Toronto the government will elect one candidate. There is no doubt that Robertson will carry East Toronto; it seems equally certain that Lount, Liberal, will carry Centre, and Preston, Liberal, and Hunter, McCarthyite, have developed strength in West Toronto, that is simply amazing.
