## THE INSPECTION

DISCUSSED AT MEETING OF BOARD OF HEALTH

Members of Trustee Board Presented Their Views and Made Number of Suggestions.

When the monthly meeting of the board of health was called to order on Thursday by Mayor Barnard there were present besides the aldermen, the sanitory inspector and the city health officer, Dr. Robertson, and a number of members of the school board. Included in wished to make before those present. A brief response was made by Trustee Geo. Jay. He gave a detailed account of what had been decided upon at a meet-ing of the board of school trustees held the previous evening. It was considered that a systematic medical examination of the different public schools should be instituted. The expense of this would, no doubt, be met by the saving to the city in the cost of maintaining the Isolation hospital. It was possible for the land, of Nels school board itself to undertake the expense necessary for such inspections, but it was felt that the council could much more conveniently enlarge the scope of the city health officer's duties.

Trustee Hall delivered an address along the same lines as those of his speech at the trustees' meeting on Wednesday evening. He emphasized particularly the necessity of a monthly examina tion of the public schools by the city health officer. In support of his conten-tion, mention was made of the result of a recent informal examination made by Dr. Robertson. One or two contagious cases had been discovered, and prompt measures taken to prevent the spread of the disease in question. He explained the ease with which an epidemic was started and the difficulty to check it once it had obtained a hold upon a community. It would not be a great expense, and would to a great extent insure the safety of the public health. In many instances it was very difficult for the medical prac tioner to determine the character of an illness in its earlier stages. Thus what sometimes proved to be infectious cases were not quarantined, the children attended school, and, consequently, the sickness became prevalent and people wondered where it came from. Whereas, if an examiner was appointed with the necessary power, he could order all suspicious cases away from school, preventing any possibility of an epidemic. Should the latter occur, however, the health officer would be expected to visit the school in the affected districts more often than monthly. In conclusion, he strongly advised the adoption of the recommenda-

Speaking on the subject, Trustee Mowat endorsed what had already been stated. He then went on to tell of the visits paid by Dr. Robertson and a party, of which he was a member, to the various schools and of the discovery of several serious cases. Under such circum-stances he thought it imperative that some action such as that suggested should be considered. Trustee Mrs. Jenkins expressed the same views.

query, but took occasion to repeat his

practically reiterated the ideas of the trustees who had spoken. He thought it was a very sensible move. Very often mild cases, where the child was apparently in perfect health, occurred. They most dangerous, as in many instances the children were sent to school as usual, either through ignorance or \$30,000; and the Western Pacific Clay wilfulness on the part of the parents. & Investment Co., Ltd., capitalized at The disease was passed on to others, perhaps in a more serious form. An inspection would not only be a good thing, because of the check provided, but be-cause it would guarantee the health of those attending school during an epidemic, resulting in a larger attendance

during those periods.

After some informal discussion Mayor Barnard stated that the matter would receive the attention of the city council. The school board could hardly expect an immediately reply to a proposal of such

The deputation had expressed its apd by the Mayor and aldermen, when the former made an interesting statement. "Now that we are together," he stated, "I may as well announce that the council has reduced the estimates submitted by the board of school trustees, the sum ings and grounds figures and \$2,000 from proposed expenditure on teachers'

Trustee Jay explained that the matter had not yet come before the board, so that no official expression could be given at the present time. He was not prepared to admit the power of the city council to reduce the school board's ortion that would have to be considered

The deputation then withdrew. The remainder of the business was dis posed of in short order. The health of-ficer, Dr. Robertson, submitted a very satisfactory verbal report. He announce that the city was entirely free from diphtheria, and that there were only a few other contagious cases. Sanitary Inspector Wilson also reported satisfactori-

Mystery Surrounds the Deaths of Two Brothers.

Three Forks. B. C., May 11,-Two prospectors, brothers, named Kulings, were found dead in their cabin near here this evening under circumstances which point to a case either of murder and suicide or double murder. One of of \$5,000 being deducted from the buildings and grounds figures and \$2,000 from gashes in his head, and the other on the floor holding a shotgun with one hand, the gun being partly under him.

When discovered the door of the cabin was locked on the inside and the glass in the one small window broken. So far as known at present the last seen of either of the men was on Tues day evening last, when one of the men is said to have been in Three Forks. Nothing is known of any trouble o

disagreement between them, and, as far as can be learned, they were both teady, industrious men and are said to have been working together on a laim in the vicinity of the cabin.

a procession of railroad employees and T. W. Paterson, M. P. P., said he was not very well posted on lumber rates, but he explained how he thought that American shippers had an advantage in shipping charges. The matter of the preferential trade was a hard thing for the erential trade was a hard thing for the Canada Northern. That railway, says a procession of railroad employees and monton this fall in such a shape as to permit of a regular train service to Win-

Of course such activity in railway building gives business in Edmonton a considerable impetus, but it is not the only factor in the development of the town in the near future into a great and flourishing city, the equal, if not the neer, in a commercial sense of Winnipeg. The railway will materially aid in this, and so will the building of the Grand Trunk Pacific railway, the site for the station and vard of which have already been staked out; but quite as important as the transportation facilities are the wonderful resources of the place, its equitable climate and its ideal location. Mr. Campbell reports that the weather when he was in Edmonton was more sun-

shiny and warm than it was in Victoria at the same time, that the snow fall there in winter is much less than elsewhere in the Northwest, and that the extremes in temperature are not nearly so great as they are in the Mani-

From Red Deer, a half way station on the Edmonton branch of the C. P. R., there is a big population all tributary to the place, and while the town itself has only a population of seven or eight thousand, yet on all sides there are hig set-tlements, and the merchants keep stock and occupy buildings which would compare with anything seen in Victoria. He saw himself an order given in one store amounting to a cash sale of \$46,000, and he knows of one firm that keeps a stock valued at \$1,000,000. The stores are generally constructed of pressed brick the crude material for which is found along the Saskatchewan river. Another evidence of the wealth of the commnity may be found in the proposition now be-fore the people of Edmonton for the building of a bridge to connect with Strathcona, a sister town, costing \$3.000,000. At Albert, a little place 12

miles distant, a new Catholic church is being erected, costing \$125,000. Excellent soft coal can be bought in Edmonton for \$2,50 a ton, and there is an abundance of it. Petroleum for fue purposes has lately been discovered in great quantities at a litle place close by known as Bornville. Mr. Campbell was speaking to Mr. Williams, the manager of the coal fields, and the latter told him the oil was better than that found in California. The oil district extends over an area of 40 miles. A well has been sunk to a depth of 250 feet, and shortly Edmonton will not only have an abundance of coal, but oil as well.

There is every indication of a banner crop being harvested around Edmonton this year, for while the production may not exceed that of other seasons, the extra amount of land under cultivation seems to warrant the belief that the total

The Trilby Claim Near Greenwood Bonded For \$12,000. Greenwood, May 8 .- On Saturday last

the Trilby, a claim in the high grade belt, adjoining the E. P. U. on the south, sum of \$12,000, the bonders reserving the right to purchase the claim for cash in four months. The Trilby is owned by J. C. Haas, of Spokane, and Randolph Stuart, of Greenwood. It was located by the latter in 1894, and was the second claim located on the bench on the south of Twin creek, the Tip Top, another claim recently bonded to Phoenix parties by the same owners, being the first. The estate of the late Mrs. Norris, of Midway, owns a quarter interest in

the Trilby.
The Trilby was first bonded in the after doing a lot of work on it abandoned his bond. It was again bonded last year to a local syndicate, who also did a lot of work on the property, afterwards giv-

ing it up.

The syndicate taking hold now will, it is reported on excellent authority, develop the property from the E. P. U. tunnel, which has reached the boundary of the Trilby, and at good depth. Duncan McIntosh, the principal owner of the E. P. U., is one of the bonding syndicate, and C. S. McArthur, who sold a half interest in the Denero Grande two weeks ago, is another. The syndicate is well fixed finanically, and has agreed to start work on or before June 1st next. There are six leads on the property, besides the
