## FOR EXHIBITION WEEK One Week Only

We are planning an event of most unusual importance to the people of St. John—and of equal importance to the thousands who will visit us on that occasion. We aim to make the event a memorable one to every man who enters our store.

And to that end "\*\*\*\*\*" will figure largely in our plans.

Bear in mind—NEXT WEEK you will hear news of SPECIAL IMPORTANCE to you.

And THIS week, right now, we offer exceptional values in NEW ready-to-wear clothing.

**MEN'S SUITS**, a fine line, guaranteed right in every detail, \$10 to \$25.

**FALL OVERCOATS**, made to increase our reputation for selling serviceable as well as stylish clothing, \$7.50 to \$25.

This week you can have your choice from the entire line of the season's best clothing—FIRST choice. A large line and every size is here.

**A. GILMOUR,**  
68 KING STREET.  
Established 1841.

## New Fall and Winter Underwear.

Never before have we had such an assortment of Men's Underwear made by the best makers, such as Stanfield's and Penman's. A very fine garment, all wool, 50c. The very best of all wool fleeces, "Penman's" make, special price 50c. A very heavy ribbed garment, all wool—well worth \$1—our price 75c. We are selling the very best of Stanfield's at two special prices, \$1.00 and \$1.25.

Be sure and see our stock before you purchase elsewhere.

**THE CASH CLOTHING STORE**  
C. MAGNUSSON & CO.,  
73 Dock Street, St John, N. B.

## A REVOLUTION GOING ON IN PHOTOGRAPHY

No branch of science has shown greater progress during the last few months than photography, and it seems as if almost a revelation were taking place in photographic methods. By an invention which is now being tried it may be possible to take photographs without any apparatus whatever excepting the plate, and by another process photographs may be printed without any light at all.

It is Professor Lippmann, of the Paris University, that we are indebted for the wonderful Argus-eyed plate, which requires neither camera, lens, nor camera. The surface of the plate is covered with tiny lenses, of which there are fifteen thousand in the square inch, the whole forming a kind of gelatine honeycomb.

**A WONDERFUL PHOTOGRAPH.**

This plate has merely to be exposed to the object for a certain time, and then it can be covered and treated. The result is a wonderful photograph, which is far different from any now known, as the objects stand up in relief as though seen through a microscope, and the perspective is not distorted, which is the case with most present methods.

By the Doublin process, photographs need no longer be taken upon glass or similar transparent substances. The photographs are taken upon black paper. Prints can be taken from these negatives, and also the usual kind, by immersing them in a dye; the paper is placed in close contact, and when pulled off the negative contains a faithful reproduction of the same color as the dye used. Thus a multitude of various colored photographs can be obtained, irrespective of illumination.

**INVISIBLE OBJECTS.**  
New uses are being found for photography in all the branches of human labor. As an example, it may be mentioned that flaws in metal which cannot be detected by the human eye are rendered visible by the photographic plate.

In astronomy photography has widened the field enormously. Not only can the stars be recorded with the greatest accuracy, but the photographic plate sees more than twice as many stars as are visible to the human eye aided by the most powerful telescope. More than this, the sensitive plate is capable of resolving what appears to the human eye to be stars, photography has shown to be of a nebulous constitution.

The same assistance has been given to the diametrically opposed science of

stopping and getting under headway again is a loss of time from a schedule that isn't appreciated by some of the officers of a great railway company.

Some of the fastest trains into Chicago may spend an hour covering the last twenty-five miles into the city.

One of the modern giant racers in passenger service can pull 700 tons of train after it, and in stretches of favorable track in favorable weather may make eighty miles an hour. The modern sleeping car weighs about 120,000 pounds; a dining car, 118,000; a buffet car, 110,000; and the ordinary day coach, about 90,000 pounds.

## AMUSEMENTS.

ANOTHER NEW BILL AT THE NICKEL.

Despite the great holiday crowds at the Nickel more masses of people swarmed to the popular picture theatre yesterday afternoon and last evening to see the sensational realistic picture "A Race For Millions" by the talking picture people and to enjoy the rest of the excellent bill of fare. It goes without saying the vast crowds were carried away with the contagious enthusiasm of the mining drama, particularly in the racing scene between train and auto and with cheering rent the air for minutes at a time. Today the star picture outside of this Humanov film will be Pathe's "A Trip Through Russia" and two comedies as well as a pretty romance of the middle ages in England, "A Royal Jester." Miss Felix, Mr. Weston and the orchestra.

"DIFFERENT WAYS OF SMUGGLING" AT THE BIJOU.

More new pictures at the Bijou today. Three changes in as many days, a procedure that makes some people sit up and take notice, as it's just because so many people have attended the Bijou within the last three days that this course has been decided upon by the management. "Something different for the people" is the Bijou motto. A picture sure to please and of much interest being shown today is, "Different Ways of Smuggling" and shows the ingenious means taken to defraud the customs on the borders of France and Belgium. The last description would fail to fully convey an idea of the ingenuity and daring of these people and one can better grasp the ideas by seeing it. In real good fun, comedy, the Bijou is not lacking today as in the "Burglar's Slide," "The Complicated Duel" and "Straight-giving Pills" there is lots of that hilarious joy producing kind. In drama "The Walf and the Statue" is one of those heart-rending pictures, depicting the miseries of a poor, friendless little girl alone in the world with no one to pity or comfort her until at last she is restored to a loving father who through a vision finds his long lost little one. Miss Smith is singing "Tun Starving for Sight of You" the same song in which she delighted the people last night.

**NEW PICTURES AT THE UNIQUE TODAY.**

The management of the Unique theatre again offer their many patrons something strictly new and first-class in the way of dramatic pictures. The last picture today is called "Dick's Sister," and is one of the best dramatic pictures ever placed before the public. Dick's sister refuses the attentions of a young man who is employed in the same office as her brother. In order to be revenged she steals a sum of money which had been entrusted to Dick's care. Dick receives the blame of the theft and is discharged. His sister suspects this villain and by a clever stroke of work recovers the money. The next picture is called "The Manual of a Perfect Gentleman," and tells the experience of a young man who tries to live up to the rules of etiquette as set down by the book. The last picture is called "A Woman Jealous," and is an excellent picture. The story told by it holds the spectators almost breathless with attention. The Unique has grown to be looked upon as the home of good songs, and those that will be presented today will bear out this excellent reputation.

**AT THE PRINCESS.**

The Princess Theatre continues to be the popular amusement place in the city and hundreds of people enjoyed the performances yesterday. The pictures were excellent and are voted the best that have been shown in the city for some time. Harry Newcombe, the favorite baritone, continues to make a hit with his songs and comedy. He has been secured by the management. The new programme of dramatic and comedy pictures that will be shown today for the first time should not be missed.

**ROMEO AND JULIET AT HAPPY HALF HOUR.**

Today the Happy Half Hour has a great programme for its patrons. Miss Gertrude Holmes will sing "Flirty Little Doodle," from the musical comedy "The Girl of the Year," and her admirers don't want to miss hearing it. By request of many local musicians, Mr. Buchanan will sing "In the Time of Roses," which was last sung here by Van Hoose, the famous tenor. The feature picture is one of Shakespeare's greatest tragedies, "Romeo and Juliet." This picture is 1,200 feet long and is the greatest dramatic picture yet presented here. The acting, costuming and scenery are perfect, between fifty and sixty actors and actresses being in the cast, some of them being of the first dramatic rank in England. Two other pictures will be shown, the titles of which will be announced in the evening papers, and two illustrated songs will conclude a full hour's show at the same old price. Those who are wise will attend early.

**COMEDIAN AT THE CEDAR.**

Al. Dillon is still making good at that house. Why not? He is the star of all comedians. He will be seen in a new hit tonight, introducing some clever dancing and comic songs. The picture end of the programme is far superior to that of any change yet. The Redman and the Child is the feature film. The name speaks for itself. The Be-visited Tricycle is a real good comic picture, one that will drive all worries away. A Week in Russia is a beautiful and accurate picture. Mr. Wallace, the poor vocalist, will render a new and catchy song hit. Admission always 5 cents.

Two engineers made a successful test of a new aeroplane at Oakville, Ont. yesterday. Loaded with fifty pounds of sand the machine flew about 1,000 yards, and was under perfect control. It is the design of a Toronto man, and those who saw it say it is a wonderful success.

## Made to Order Fur Garments

Each year the demand for Made-to-order Fur Garments is increasing, and ladies are realizing that it pays to place orders early, so as to have their garments WHEN they wish them to wear.

It is none too early to order NOW.

We have some choice skins in Alaskan, Seal, Persian Lamb, Broad Tail Russian Pony, Muskrat, Squirrel, etc. and can make up Jackets or Coats to order in any style at once.

SATISFACTION GUARANTEED.

You will need very soon. New stock opened. Good value at **A. B. Wetmore's (Baiting for Quills) 59 Garden St.**

## JAILBIRDS WHO WENT ON STRIKE

The recent mutiny at Rion prison, Paris, which ended by the officers being starved into submission, had an amusing origin. A few weeks ago the trade union of the convicts who are engaged in boot making held a meeting and decided that the government rate of remuneration was much too low. They sent a strongly-worded ultimatum to the governor of the prison through the warden. They not only asked for an immediate increase in the rate of pay, but also declared that if the rate was not raised, they would strike. The governor, in order to avoid a strike, decided to meet the demands of the convicts, and decided to increase the rate of pay. The convicts, however, were not satisfied with the increase, and decided to strike. The governor, in order to avoid a strike, decided to meet the demands of the convicts, and decided to increase the rate of pay. The convicts, however, were not satisfied with the increase, and decided to strike.

**TOOK POSSESSION.**

The new arrivals were drafted into the bootmaker's shop at Rion. That was the last straw. The trade union held a hurriedly-called meeting, and decided upon a strike. The convicts, however, were not satisfied with the increase, and decided to strike. The governor, in order to avoid a strike, decided to meet the demands of the convicts, and decided to increase the rate of pay. The convicts, however, were not satisfied with the increase, and decided to strike.

**UNFORTUNATE ARRIVAL.**

The governor turned a deaf ear to the complaint, whereupon the trade union transmitted through the proper channels, a demand for an interview with the Minister of the cabinet who happened at this meeting to be at Rion, or, failing him, the prefect of the department. The governor this time took up a conciliatory attitude, and explained that the minister and the prefect were too busy with civic junketing at the

## PORTUGAL IN DEBT TO ITS KING.

A King, surrounded by all the pomp and luxury of his court, is in the eyes of some a favored individual who never knows the inconvenience (to put it mildly) of being "hard up." But he does—often. Then many are the means he employs to get money. Since the assassination of King Carlos of Portugal there has been a committee formed to inquire into the late monarch's debts, which has ascertained that since the year 1880 the sum of \$1,100,000 has been advanced to the Crown. Deducting a sum of \$180,000 which still remains to its credit, there is a debt of \$920,000 left.

**EXTRAVAGANT KING.**

A very remarkable sequel to this has arisen with the new Portuguese Civil List which was published a few weeks ago, according to the official figures contained therein, not a single penny of income has been received by the royal house since the accession of the young King Manuel.

This is, indeed, reversing matters with a vengeance, but this omission has been since rectified, for a few days ago parliament granted the young King an income of \$1,000 a day.

The debts of the late King of Serbia, too, were matters of severe anxiety to his government, and there were rumors floating about at the time of his murder that it was partly due to the embarrassed state to which he was reducing the country by his extravagance. A single debt of his to one man alone was said to have been over \$500,000.

**A CHARGE OF FRAUD.**

Perhaps the most notorious of modern cases is that of the King of the Belgians. The Congo atrocities which horrified all the civilized world are matters of common knowledge, but it is not generally known that well over \$5,000,000 found its way into the pockets of King Leopold.

A charge of fraud by a crowned head occurred during the China-Japanese war, when it was stated that a certain monarch had in five years, appropriated about \$3,000,000 in English money, which should have gone to buy warships.

This seems a very great sum to spend thus; but the statement was made broadcast in the papers at the time, though it was repudiated by a certain ambassador.
