## The Waltham Watch

TRAINS run very largely on Waltham time, for the reason that such a large proportion of railway men carry a Waltham. The "Vanguard" is the railway man's first favorite, because it is designed especially for railway service. It has an improved steel barrel containing a mainspring of extra length and width that enables the watch to keep accurate time for more than forty hours at a stretch. It has double roller escapement and steel escape wheel. Both balance pivots run on diamonds. On the 16 size there is also a winding indicator, preventing the watch running down unawares.

Ask your jeweler to show you his range of high-grade Waltham Watches.

## Investment of Life Insurance Money

The weakness in the plan of providing for one's family by life insurance is that the policies are frequently made payable to widows or others, who have had little or no experience in the investment of funds, and are often influenced to make investments of a hazardous character. The appointment of this corporation as Trustee ensures that the capital will not shrink, and that the largest income consistent with the safety of the capital will be produced.
