

THE INCREDIBLE HERK

People for peace
(Continued from p. 11)

pressure and allowed free elections or respect for human rights? Vietnam? Its puppet in Cambodia? The wonderful Afghan, Angolan, or Ethiopian governments? Better a right of center administration in El Salvador with a chance to reform under American urgings, than another "Cuba" in Central America with a government whose only dedication is towards further subversion in that region. Right-Wing landowners in our modern era can, when prompted, read the "writing on the wall." Communist insurgents and governments with Soviet backing, can ignore it.

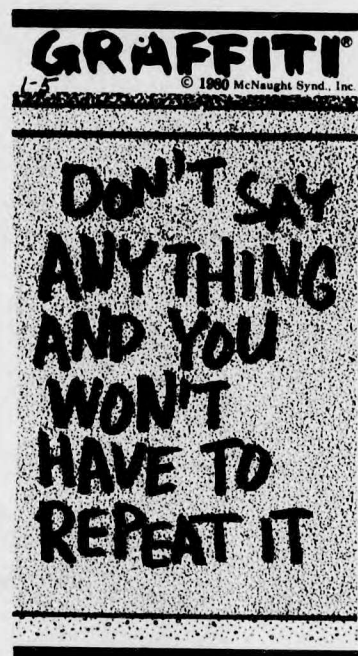

One more comment on the "Peace" letter - why the implied link between the so-called "right-wing rhetoric" of the present U.S. president and the John Lennon murder? Although fanatical killers and terrorists are as noticeable in the ranks of the far-left as they are in the far right, why connect a murder with no political motivation behind it to the political ideology of the Reagan government? Possibly, just some "hype and propaganda". It smacks of Tass-type editorials on "decadent Western societies."
