

THE GREAT ABSOLINE MEDICINE

A POSITIVE CURE FOR BALDNESS.

Where the glands are only torpid, the Vigor will excite them to activity, and produce a new growth of hair on bald heads, and even of persons advanced in years; but where the glands are atrophied, decayed or absorbed, nothing can produce them. When successful, and the new hair has become plainly visible, excessive brushing should be avoided, but the scalp should be sponged occasionally with soft water, and gently pressed and rubbed, on the bone beneath, by the finger-ends. This quickens the circulation, and removes the hardness which characterizes places long bald.

Falling of the Hair is the result of inaction of the follicles of the hair, or of a morbid condition of the scalp. When it begins to fall a few applications of the Absoline will arrest it. Where the loss of hair is only partial, and the scalp is covered with a thin growth, the vivifying influence of the Absoline will be perceived sooner than when baldness is established. The vital forces of the organs, on which the hair depends, will be re-established, and the growth will present the colour and luxuriance of youth. The virtues of the Absoline are further shown on brashy, weak, or otherwise diseased hair, to which it imparts vitality, gloss, and freshness, and restores its original beauty.

SMITH'S BROWN OIL FOR HORSES

And all kinds of Animals

SMITH'S LIQUID BLISTER.

For Horses and Cattle for Removing Ring Bones, Spavins, etc.

From the peculiar nature of the Liquid Blister, and the unparalleled success it has met with in the hands of those who have the care of horses, it is but justice to say that, of the great number of so-called remedies which have been offered, none have been so successful for the purpose as this.
