

Toronto, Monday, Juiy 1a.-The hot wave has proven a drawback to builtees in the eily and country. Morehants have homes. The usual mideummer hull is quite marked, although not so much so as in former years. Parmers are busy haying: This has a tredency to make builtees in small centre slack. Butter has strengthened its position: Butter has strengthened its position: the stock market usual though Mon-the lite stock market usual for fair: Rumors of rust on wheat in the West cause a slight nervousness in the Chi-cago market.

## MONTREAL HOG MARKET

MONTREAL HOG MARKET Montreal, Saturday, Juji Ja.-The de-liveries of live hogs this week were light and bardy sufficient to supply the de-mand, and, as a consequence, the market 86 d a cwit, for selected loik, weighed off cars. There was a good demand for dressed hogs, and prices were advanced 75 a cwit, owing to the limited supples available, fresh-killed abattor scoke seliing at \$12.25 to \$12.50 a owt.

FXPORT BUTTER AND CHEESE Montreal, Saturday, July 13.—The fea-ture of the cheese trade this week has been the fierce demand for colored che which is coming, from all parts of United Kingdom and has resulted prices being advanced on colored as high as 13.1.5c at the factories: whereas, the highest price paid for white cheese at highest price paid for white cheese at any point was 13-4c at Brockwille, the bulk of the white, however, selling at from 12.74c to 12.945c. This high pre-ium for colored cheese is not likely to exist very long, as makers all over the country will be changing from white to colored and making the proportion of white lower than usual, and 11 would not be surprising to find white cheese which ensure the start of the start of the start of the start of the surprising to find white cheese which the surprising to find white thesess com-manding a premium over colored inside of a fortnight Apart from the demand for colored, there is no strength in the situation, and dualers generally are look-ing for lower prices it the near future. The receipts this week amounted to over the strength of the barrier than the order of the barrier than for any week during the past season, and would indi-cate that the make this season is heavier than it was at this time last season. The make of cheese in England is also heav-ir, and it is probably that allorgether the season weight the strength of the during the past season and the season the generation of the barrier is steady and

high prices now current. The demand for butter is steady and prices still further advanced owing to the activity of the local houses, who are putting butter away for next winter's requirements: Zo is the general asking price to-day for finest Eastern Townships price to-day for finest Eastern Townships creamers, and in some cases even more money is asked. These prices will con-tine advanced as long as the demand continues, but, as soon as there is any falling off in the specialize demand, we shall see a reaction in any statistic demand, we shall see the control and is all being make of he sha control to meet the remake of butter is large and is all being retained in this country to meet the re-quirements of the Canadian consumers, not a package having been exported so far this season.
