How a DAIN HAY LOADER and DAIN SIDE DELIVERY RAKE More than PAY for Themselves in One or Two Seasons

HERE are actual hay-harvesting facts:
A pretty big percentage of the hay-crop of the country is left in the field each season—
And a still bigger percentage of the feeding value of the hay is lost in getting it into mow or stack—
Lots of hay is left on the ground in shocking and pitching-out-of-the-shock—
After you've got your hay out of the field by hand-loading, you can mark the location of every shock and windrow by the loose hay lying around—That's absolute waste.
Another thing—either hand-loading or the ordinary loader and rake, scatter-off the leaves—and authorities all agree that much of the nutrition, the feeding value of hay, is in the leaf.
Now, a Dain Hay Loader gets all the hay—either out of the swath or windrow—
Two sets of raker-teeth gently gather all the hay from the ground and the elevating-fingers carry it up the elevator onto the load—well forward—where one man can easily handle it—It cannot drag the hay back off the wagon like the return carrier Loader will do. And there's
No Bunching, Wadding or Tangling to make hard work for the man-on-the-load—or to choke-up the loader.
The raker-teeth are self-adjusting, taking the hay as-it-comes, heavy or light—they can't clog or get stepped-up.
The Dain Loader is entirely free from complicated mechanism—

And it is the smoothest-and-lightest-running—lightest-draft loader on the market.
It works close up to fences and ditches—
And over any kind of ground. It is hammock or swing mounted—which saves it from all "rack" and jar.
And here's the big advantage in using a Dain Side Delivery Rake ahead of the Loader—
First, it delivers two swaths of hay upside-down into a loose, continuous windrow—
And the loader following it will take up a load in half the driving or traveling necessary when loading from the swath—
And then this rake, with its raker-teeth slowly revolving on a reel, leaves the windrow loose and open—
Permitting a free circulation of sun and air through the hay, producing air-cured hay, preserving all the rich, nutritious juices, making the hay worth from 75c to \$1.00 more a ton.
The Dain Rake has three sets of raker-teeth, which take the hay up clean without thrashing it.
These tools save enough hay in one or two seasons to pay for themselves.
Both loader and rake are substantially and dependably constructed throughout—
The name Dain on any hay tool assures superiority at every point.
Your implement dealer will show you how these tools "work"—
Or write us—we'll tell you about them.

I Cured My Rupture

I Will Show You How to Cure Yours FREE!

I was helpless and bed-ridden for years from a double rupture. I wore many different kinds of trusses. Some were tortures, some positively dangerous, and none would hold the rupture. The doctors told me I could not cure it without a surgical operation. But I fooled them all, and cured myself by a simple method which I discovered. Anyone can use it, and I will send the cure free by mail, postpaid, to anyone who writes for it. Fill out the coupon below and mail it to me to-day.

Free Rupture - Cure Coupon.
