

PELT BRIDES WITH FLOWERS.

An Improvement Over the Custom of Throwing Rice After Them. The question of showering brida couples with rice is as old as the conumental hills. It is sometimes attended with disagreeable results, but is still persisted in at most matrimonial functions. An improve nent upon this custom which seems likely and ought to become popular was observed at a pretty wedding served at Lake Geneva just before the close of the outing seaon. The plazzas and lawn of the bride's home were beautifully decorated with hydrangeas, which the extensive gardens of the bride's home furnished in unusual profusion. The altar arranged at one

sion. The altar arranged at one i end of the parlor was beautifully decorated and bowered with the same blooms mingled with ferns and evergreens. Bunches of the blos-soms stoold in large jars and cases in the spacings hall and banked the great fireplace. When the newly wedded pair started away in the late afternoon the guests lined the way from the house to the entrance gate of the grounds, everyone progate of the grounds, everyone pro-vided with hydrangeas, and through this land of pelting flowers the bridal carriage was driven. It was a poetic and picturesque change from the usual rice shower.

Crossing the Limbs When Sitting.

Women who sit with their legs crossed, to sew or read, or to hold the baby, are not aware that they are inviting serious physical ali-ments, but it is true, nevertheless. ments, but it is true, nevertheless, When a man crosses his legs he places the ankle of one limbacross the knee of the other, and rests it lightly there. A woman, more mod-est and restricted in her movements, rests the entre weight of one limb on the upper part of the other, and this pressure upon the sensitive nerves and cords, if indulged in for continued lengths of time, as is often done by ladies who sew or embroider, will produce disease. Sciatica, neuralgia and other serious troubles frequently other serious troubles frequently result from this simple cause. The muscles and nerves in the upper portion of a woman's leg are ex-tremely sensitive, and much of her whole physical structure can be-come deranged if they are over-tasked in the manner referred to.

#### Economy in Stockings.

A woman who is very particular about her nosiery gives the fol-lowing practical points as to the care of stockings:

les. kings too large make the tender,

Tchenp black stockings are a def, usion and a snare. Thin stockings should be darned

Thin stockings should be darned with fine worsted. Try tacking a piece of net-old veiling or plann net will do-across a large hole; then take the threads in and out through this. A good plan is to strengthen the knees and heels of children's stock-ings by darning them for some dis-tance on the wrong side when they are boucht.

are bought. It saves stockings to wear them systematically, each pair in turn. As to washing stockings— Don't use soda; have the water moderately warm for both washing and ringing

and rinsing. Wash lisle thread stockings in topid water; use a little scap on the feet only. Rinse in hard water. Dry quickly in the breeze and press

with a warm iron. Silk stockings should be washed in tepid water with mild soap. Rinse them in soveral waters. Shake them

out the spiral spring which balance the yolk in the white. the yolk in the white. One cup of sauce means one cup of liquid, regardless of the amount of thickening or butter that you use If the thin white curtains blow into the gas and catch fire, sew email lead weights into the seams.

**Ultra Stylish** A stunning coat and hat which will be worn by a girl with a fat pocket-book this winter.

The Ruffled Skirt. It seems to be impossible to get away from the ruffled skirt. The most decidedly tailor gown makes this concession to grace, and it cer-tainly does add to the beauty. As a rule the ruffles are still shaped cir-cular and only one is used on a skirt.

See Her Smile.

Her Father-You are going to marry that insignificant little cad. Percy Millyuns! Wily, you once said you would never marry a man less than six feet tall. Ethel-Oh, I know, papa; but I decided to take off 20 per cent. for eash. for cash.

She-What did papa say? He-He said he'd be delighted to have me for a son-in-law, only he couldn't afford it.

She (angrlly)-How dare you, sir? He (after stealing a kiss)-But I couldn't help myself. She-Don't add falschood to your crime. You did help yourself.

Pana-I think nuneteen is altoge-

Papa-I think mnetcen is altoge-ther too early for a girl to marry, Don't you? Mamma-Well, yes; but I remem-bor the time when I didn't, and I remember the time when you didn't.

Mistress (to servant)-Be careful not to spill any soup on the ladies'

laps. Piddy (new in service)—Yes. mum; where shall I spill it?

Miss Peart-Did you ever look at yourself in the glass when you were angry? Rival Belle-No; I never am angry

when I look in the glass.

Mrs. Dawn-You hateful thing! You told Millie Meadows you only wished you were single again. Mr. Dawn (with happy inspiration) -Of course; I did. It was only that I -of course, I dd. It was only that I might experime once again the joy I felt when you accepted me, darling. Mrs. Dawn-You dear boy! I knew you couldn't be so craal. Father (calling from head of stairs

THE SIGNS OF PALMISTRY. lany Truths Told by a Study of the Lines in the Hands. (Notes From Cheiro.) Lines should be clear and well

Lines should be clear and well marked, neither broad nor pale in color, and free from all break; is-lands or irregularities. In reading the hand, no single evil mark is ac-cepted as final. If the evil, is im-portant, almost every principal line will show its effect, and both hands must be consulted before the decision is final. It is the custom of palm-ists of recognized worth to examine both hands, but they depend more upon the right than the left, which proves the truth of the old saying that the left is the hand we are born with, but the right is the hand we make. The line of life rising under the Moint of Jupiter goesdown the hand and embraces the Mount of Venue. On it is marked time, also illness and death, and events fore-shadowed by other lines are verified. Venus. On it is marked time, also illness and death, and events fore-shadowed by other lines are verified. All lines that rise from the Line of Life are marks of increased powers, gains and successes. The student can predict mariages by considering the relations which the Mines and cross-lines influencing it bear to the Line of Life. The line of the head relates principally to /the mentality of the subject. It is of extreme im-portance in connection with this of the subject. It is of extreme im-portance in connection with this line that the peculiarities of the va-rious types be borne in mind. For ex-ample, rising from Jupiter, and yet touching the line of life, it is, if a long line of head, the most powerful of all. Such a subject will have tal-

ent, energy and daring determina-tion of purpose, with boundless' am-bition, combined with reason. Such a one will control others, yet not seem to control them; will have caution even in the most daring designs, takes pride in the management of people and things; is strong in rule but just in the administration of power. The science of reading the ent, energy and daring determina but just in the administration of power. The science of reading the character, aptitudes and mental conditions of men by a glance at the formation of their hands is an inter-esting one. It points out for us what we are best fitted for in life and is therefore an aid to success. There

we are best litted for in life and is therefore an aid to success. There are few, if any, of us, who, looking back upon the past, will not at some time confess to months, years, and often the greater part of life's span having been lost through the fault of parents or guardians or our own ignorance combined.

# \* **GOOD MANNERS OF** PRIME IMPORTANCE.

### \*\*\*\*\*\*\*\*\*\*\* A contributor to Harper's Bazar discusses in this month's issue of the

magazine the prime importance of good manners, and furnishes some very practical ideast for her readers. She says; "An essential element of good man-

"An essential element of good man-ners is self-control. Not to say the thing that leaps to the lips first, to enoke down a bright speech that is at the expense of a companion, to stifle the first desire to say 'no,' when a plan is eagerly proposed, to put aside a book when one's com-pany is needed, to enter plensantly at game that does not particularly attract, to suppress an inclination to oriticize-these are only a suggestion of the almost numberless ways in which the control of self increases one's ability to please. It goes a great deal deeper, too, girls, and it is a good beginning to practice it in the lighter side of life. Write out this sentence in plain text on a card, pln it on your dreesing bureau and take a did of its meaning every day: "He that' ruleth himself is greater than he that taketh a city."

Latter Day Maxims.

Mrs. Louis Brovosts' Publishes What She Thinks About Dodd's kidney Pills.

Convincing Piece of Evidence as to the Wonderful Power of this Rem-edy-Bright's Discase, Heart Dis-case and Rheumatism Each Affilted Mrs. Brovests-Dodd's Kidney Fills Positively Cured Her.

THE ATHENS REPORTER OCTOBER 23 1901

These Broyests-Dodd's Kidney Pills a Positively Cured Her. St. Magloire, Que, Oct. 14.-(Spec-ial)—The following was written by a well-known and highly respected lady of this place, being a copy of the original sent to the Dodd's Medi-cime Company, of Toronto. "When I wrote you for some Dodd's Kidney Pills I was so discouraged that I had no hops of being able to find any remedy to save my life. I suffered with Bright's Dis-ease, Heart Disease and Rheu-matism, and I was much bloated also with Dropsy. I was so feeble that I was unable to do anything. I suffer-ed for sixteen years with Rheuma-tism. There were two years and a half that I suffered with Bright's Disease, I have tried all the remedies in the workl and always grew worse and worse. "Thero was one time when for three months I abandoned all my remedies and resolved to let myself dis without taking any medicine. I received by chance one of your alman-acs and a paper. I read them and I datched to write you and try again with your remedy. "Great was my surprise at the

with your remedy.

"Great was my surprise at the good that Dodd's Kidney Pills gave me with the first box you sent. I took them and my health was great-ly improved. Since than I have taken twenty boxes. I am cured of 'my Bright's Disease, my Heart Disease and my Rheumatismi I have still two boxes to take and by the time I have Indshed them I shall be in perfect health I will permit you to publish this letter with pleasure, and I hope later to give you facts of my recov-ery more completely than at present. I am still weak, but with time I shall be strong as ever. I recommend be strong as ever. I recommend Dodd's Kidney Pills to all who suffer with any of the diseases that I did."

### Delicious.

Delicious. Of fillings for between the layers of anyer cake a nut filling is one of the best. Beat up the yolk of one egg and one cupful # nutments chopped or cut fine. Whip one-hall cupful of oream, mix with three tablespoon-fuls of powdered sugar and add. Season with a mere dash of salt and lastly add one stiffly-beaten egg white, Mix with an ordinary boiled frosting and use both for filling and frosting the cake.—Exchange.

CONSUMPTIVE PEOPLE

Can Secure Renewed Health and Strength.

The Rich, Red Blood Made by Dr. Williams' Pink Pills Gives New Strength to Every Nerve, Fibre and Organ of the Body.

(From the Budget, Shelburne, N.S.) Among the young ladies of Shelburne, there is none to-day who more fully bears the impress of perfect health than Miss Lilian Durfee. Unfortunately, this was not always the case, as a few years ago Miss Durfee became ill, and her friends feared that she was going into decline. A doctor was called in and prescribed, but her medicines did not have the desired effect. Her

strength gradually left her, her

Gives a Talk.

Prof. Carlyle, of Wisconsin Experi-mental Station, an old Dundas County boy and a graduate of the Ontario Agricultural College, in a discussion at the Pan-American the other day is thus quoted:

Speaking as a man of science, he corroborated what two practical

corrotorated what two practical farmers with a continental reputa-tion had said. "Analysis, he admit-ted, does not give an absolutely re-liable test of the food value of any given grain." "There is," he said, "nothing like a little oats for long-continued work in the dairy." Then he proceeded to make a state-ment, based on experiments now go-ing on at Wisconsin, which seemed to show that even oats, although analysis declares that there are al-most a perfectly balanced ration, are not exactly a safe thing to use alone. "We have," he said, "for some time past been conducting a series of ex-periments with a view of determin-ing the results that will follow the use of oats alone and corn alone as feed for dairy stock. For this purpose we began, some eighteen months ago, feeding one cow oats in every pos-sible form and combination, from oats to oat chop, at the same time we here an feeding another corn in we began feeding another corn in all its forms-green corn, ensitage, cornneal and all sorts of corn com-binations, using gluten to make the corn ration balance. Both cows were Guernsey grades and apparently healthy when the test began, and they were at the same period in milking."

The corn-fed aqimal, on the other hand, has lived, but she has lost in a measure her nervous dairy tem-perament, has put on flesh, and becom esluggish. Moreover, while a regular breeder before the experi-ment began, she has come in heat only twice since it did begin, and did not remain long in heat on either occasion. She has kept right or milking, though, but, of course has naturally fallen off in milk flow with the lapse of time. "How do I account for the death of the animal fed on oats? Well, I am not as yet trying to account for it, as we never base official

for it, as we never base official results on single experiments. But for it, as we never base billing results on single experiments. But the sugar from oats is difficult of change into digestible form, and the passing of large quantities of this to the liter may have caused the trouble in that organ. What about the Scotch and oatmeal? True, the peasants of Scotland live largely on oatmeal, but it must be remembered Prof. Atwater, the greatest American authority on foods, tells us stomach trouble is almost a national disease in Scot-land. In the case of this particular cow, however, the trouble may have begun before the experiment com-menced at all. Experiments on the Same Line. Experiments on the Same Line.

Experiments on the Same Line. "We have since begun further ex-periment. In this two Jersey grades are being fed on an oat ration. One of these has been on this ration for ilve to six months. She weighed about 1,100 pounds in starting, but is now down to 825 or 830 pounds; and this not with standing the fact that during that time she has been fed 10 to 14 pounds of grain daily. She picked up a little while we were able to give her green cut oats, but now that her roughnege consists of oat straw she is roughage consists of oat straw she is going back again. The second cow on the oat ration has been in the experi-

of Cod Liver Oil is the means of life, and enjoyment of life to thousands: men women and children.

When appctite fails, it re-stores it. When food is a burden, it lifts the burden. When youlose flesh, it brings the plumpness of health.

When work is hard and duty is heavy, it makes life bright.

It is the thin edge of the wedge; the thick end is food. But what is the use of food, when you hate it, and can't digest it?

Scott's Emulsion of Cod Liver Oil is thefood that makes you forget your stomach.

If you have not tried it, send for free sample, its agreeable taste will surprise you. SCOTT & BOWNE. Chemists. 50c, and \$1.00; all druggists.

Hydrogen as an Illuminant.

Guernsey grades and apparently healthy when the test began, and they were at the same period in milking." Hydrogen as an Illuminant. Oxygen and hydrogen are produced on a large scale in Germany by the electrolytic decomposition of water. The hydrogen so produced is largely used for inflating military balloons, but it is thought that it may soon five months our oat-fed cow died. An examination of the carcass showed that the liver was enor-mously enlarged, weighing 28 lbs., while the heart was also affected. The corn-fed animal, on the other hand, has lived, but she has lost in a measure her nervous dairy tem-

## Deafness Cannot be Cured

Deafness Cannot be Cured By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafuess, and that is by constitu-tional remedies. Deafness is caused by an in-flamed condition of the mucous l'uning of the Eustachian Tube. When this tube is inflamed you have a vumbling sound or imperfect hear-ing, and when it is entirely closed, Deafness is the result, and unless the fuffammation can be condition, hearing will be destroyed forever-which is nothing but an inflamed condition of the mucous surfaces. Under the logical condition of the mucous surfaces.

the mucous surfaces. We will give One Hundred Dollars for any case of Donfness (cansed by catarrh) that can not be cured by Hall's Catarrh Cure. Send for circulars, free.

Ostrich Plumes. An authority states that white ostrich feathers can be cleaned by mak-ing a mixture of white soap shaved into small pieces, boiling water and a little soda. After this has dissolved and cooled dip the feathers into it and then draw them gently through the hand, repeating the operation several times. Then rinse thoroughly in clean water, with a trifle of bluing added. Shake, dry and curl by drawing each fiber between the thumb and the edge of a dull table knife.

Ankles Must be Warm.

Doctors say that cold ankles kill more women than nerves and disease put together. This may be an exaggeration, but it is not too much to say that, when the ankles are well er is not likely to suffer from colds. "Stock breeders say that cold can be borne by animals only at an ex-pense of fat or muscle, or warm vibe borne by animals only at an ex-pense of fat or muscle, or warm vi-tality, and so it is with women," said a shoe dealer, recently, "and vet they persist in wearing thin stockings and thin, low-quartered shoes long after the summer has passed. But they are improving in this respect, as well as in every other as time goes by. Ten years ago we sold as many low shoes in winter-shoes with an excuse for a sole-as we did in summer. Not so now. What low shoes in the cold season for out low shoes in the cold season for out door wear, we know that she is one we did in summer. Not so now. When a woman comes in and buys a pair of low shoes in the cold season for out-door wear, we know that she is one of two things—vain or silly."—Ro-

appetite failed, headaches, was very pale, and finally grew so weak that a walk of

a few rods would completely fatigue her. The young lady's family sorrowfully observed that she steadily falling, and fcared that ption would claim' her as a consumption would claim' her as a victim. One day a friend urged that she should give Dr. Williams' Pink Pills a trial, but the idea at first was not favorably entertained; it seemed hopeless to expect that any medicine would help her after the doctor's treatment had failed. Howdoctor's treatment had failed. How-ever, this good friend still urged, and finally prevailed. By the time the third box was used, there was an unmistakable improvement in Miss Durfee's condition. Clieered by this, the pills were continued, and in the course of a few weeks the former invalid, whose strength was taxed by the slightest-exertion, was almost restored to health. The use of the pills was still continued use of the pills was still continued and a few weeks more found Miss again enjoying perfect health.

To a reporter who interviewed her, she said: "I believe that Dr. Williams' Pink Pills saved my life, and I earnestly recommend them to all who fear that consumption has laid its grasp upon them." That the facts related above are not in any way exaggerated, is borne out by the following statement from Robt. G. Irwin, Esu, the well-known stipendiary magistrate for the municipality, who says: "I dis-tinctly remember the pale face of Miss Lillian Durfee and the regrets of friends as they expressed their Miss Lillian Durfee and the regrets of friends as they expressed their conviction that she would soon be compelled to say farewell to earth. Miss Durfee, however, carries the unmistakable credentials of good health, and frequently expresses her indebtedness to Dr. Williams' Dirk Fulls."

six pounds daily. "The experiment, as far as it has gone, has proved a surprise to us all," continued Prof. Cariyle. "But we in-tend to push it a good deal further-taking all kinds of grain, separately and in combination-boung in the and in combination-hoping in the end to show what is really, as demon-strated by actual experiment the best grain ration for dairy cows."

Single Grain Ration for Hogs. Single tirain Batton for Hogs. Going beyond dairying, Prof. Car-lyle gave the results of some experi-metns in hog feeding at his station. This experiment was in the use of corn and peas. Two lots of pigs, lit-ter brothers, were selected for the purpose of the test, all the pigs being weaned at three months. One lot of five, after weaning, was fed on peas alone. Although the pigs were

lot of five, after weaning, was fed on peas alone. Although the pigs were fed until about 10 months old, and received from three to five pounds of peas per lay, they weighed but 220 pounds when killed. They did not make a gain of a pound per day. The corn-fed hogs, litter brothers, as stated, and killed on the same day, gained a little more in weight, and ate perhaps a little more in doing it.

The most notable difference in re suits was in the condition of the hogs. Judges were called in to pass upon both lots before and after killing. "What the judges all noticed," said Prof. Carlyle, "was that the pea-fed hogs showed a much heavier coat of hair, and presented a firmer feel-ing to the touch. When slaughtered the pea-fed also showed a much fir-mer flesh; the lean meat on their carcasses was of a brighter red than the corn-fed, and the weight of blood was perceptively greater." sults was in the condition of the The chief value in all these expe-riments is that they demonstrate afresh the truth of the old lesson either that to get the best results, in dairying or bacon production, a mixture of grains is necessary; and they show, too, what had already been shown, the value of peas in the finishing of hogs, for the making of firm bacon
