## THE MORNING COURIER, FOR THE COUNTRY, DECEMBER 1, 1830

ial organs, on the other hand hore emphatic tone, in regard ures, which have been, un-timidly handled by Mainsters. against which, of some kind txt to impossible to provide ure, have already manifested The terial organs, on the other hand, abat to several mea sures, which have been, in questionably, too timidly handled by Ministers. Certain abuses, against which, of some kind or other, it is next to impossible to provide liquidation of the claims, but owing to some cause which I have never been able to fathom, it was only partly carried into effoct: but out of it, as I shall show by and by, in concequence of a very extraordinary Genetic Extraordinary pub-lished in 1823 in Upper Canada, rose the Canada Company, founded by me and my connections, a olely in the hope that the proceeds of the Re-serves would be applied to the payment of my a constituents. It has not been done, and I con-ceive a very shameful breach of implied and un-deratood covenant has been committed. But before I have done with these letters I will give the private history of the Canada Company, which I have reaso to believe is not unknown to the King and some of His Ministers. The public history is all potent in mittiniters. The public history is all potent in the Vervince, where Province is a monument of my gratitude for the favoure I have reasived from the other concern. It was also ary woas: in a new measure, have already manifested themselves in the working of the present system of registration of voters, and will have immediate remedies applied. The Ministry will, it is certain, in the coming Session, assume, if possible, a higher position in regard to the Irish Church and Municipal Reform

asures, that were thrown overboard by the Lords. So that the non-co-operation,which was at one time seriously threatened even on points where Whigs and Radicals could meet without any sacrifice of principle on either part,--- has now become improbable.

It may not be smiss to subjoin a few re-marks from the *Marning Chronicle*, which were elicited in consequence of a public meeting for the formation of an Anti-Church Rate Society in London, and which place in

a true light the real position of a Britist 

Province is a monument of my grant use for use favourse is have rescienced from the other concern. It was also ar woat These incidents and their corollaries make, as have said almost a proof of a predestined re-gard for a country in which all my children are settled, and in which I thought at one time to have found a house for myself. They constitute indeed no very common scenes for the intensit I have down taking in its values, even though they may be regarded as more casualities. In my withing with by these communications, namely, --to show by these communications, inder colonization is a thing to be regulated by instinct, like the adding to population; and e-condly, that I did not work without principle, when in the superintendency of the Canada Company; or in other words, before playing on the fidle I thought in necessary to lear it, not being of, the Irishman's opinion altogether, that I did not know whether or not I could play be-cause I had avere their I fam, &c. &c. JOHN GALT. A there is the solid in the solid of the solution of the solid in the solid in the solid of the oan place the

Greenock, 1836.

We are requested to publish the following mnouncement :---

"The Committee superintending Dr. BAR.

and a popular lectures, conceiving that the great object in view is to introduce as quickly, and as generally as possible, all practical improvements in the science of education into the schools of this country. do hereby respectfully invite all teachers of youth to attend the said bectures, and consider amongst themselves have much of the mation, nor men after new strata which had ous principles : they are those who occupy the medium condition out of which you must bring them by working them well, and by the power of agitation."

"All teachers of schools in the city or suburbs Un the 21st instant, several docume were sent down to the House of Assembly of Montreal, of either sex, will be presented with tickets for the course, on application to JOEN E. MILLES, Banker, or JOHN DOUGALS, by the Lieut. Governor, Sir F. B. HEAD, containing extracts from Despatches from Lord lerchant. GLENELQ, approving of the conduct of Sir

FRANCIS in dissolving the last Parliament-

concurring with him in his views with respect to the Executive Council, and expressing nce in him ; also Mr. C. DUNCOMBE's letter to Lord GERNELS respecting the con. try, the citizens are carnestly requested duct of his Excellency-Mr. BALDWIN's send whatever articles of clothing they can which were read.

All the documents were referred to a Committee.

The cobourg Slar states, that he has " received eight letters from Mr. GALT.

on the improvement of the Province, which " have never before been published." We differs only 68 bales from the quantity exhave transferred to our columns,-from the ported up to the same time this year, and the Star, the first of these letters. The genius, and literary abilities of the writer, in conne tion with his intimate knowledge of the affairs of these Provinces, will, undoubtedly, produce something both interesting and in structive.

LETTERS CONCERNING PROJECTS OF IMPROVEMENT FOR UPPER CANADA .- BY JOHN GALT, ENQ. LETTER I.

To the Editor of the Cobourg Star. Sin .- Heing unable to move from my seat. of old matters and things ;--among others, my notes relative to Upper Canada seem not to be value ins ; indiced some of them may yet perhaps

Upper Canada Some weeks use we mentioned that an ex-ploring party, consisting of Mr. MN aughton, Deputy Surveyor General, and Mr. Treadwell, had left this to pass up the river Oltawa, and proceed through to Lake Haron, in orier to so-cortain if it was practicable to open a water communication by this routs. We have now the satisfaction to say that the party is returned, who not only insist woon the sweeticability of the communication by this route. We have now the satisfaction to say that the party is returned, who not only insist upon the practicability of the route, but speak highly of the facility with which it could be accomplished. This point being de-aided, the next is how is this bask to be done. It will be fresh in the recollection of many of our readers that this project was so successfully advocated in England, that a Company of capi-talinis of the first standing and respectability was formed, ready to advance the necessary funds to open this route. This Company, we believe, are still prepared to prosecute this ob-ject; and the only hinderance to immediately protocoling, is the want of an set of incorpora-tion, the application for which has been hitherto frustrated, partly from the timidity and imbedile conduct of the Ministry, and partly from the un-settled state of the affairs of a re-union ; and we hope His Excellency will are his influence in the proper quarter to promote this object, and we hope His Excellency will are his influence in the proper quarter to promote this object, and we hope His Excellency will are his influence in the proper quarter to promote this object, and we hope His Excellency will are his influence in the proper quarter to promote the object. are deranged in their functions, and in conse-quence of these being impaired, the brain is not duly nourished, and is rendered unfit for its important functions. Hence moral and intellectua tent than is usually supposed, -on Physical Education the system. It repairs waste, and upon its quality and due distribution depends the finese of the fluids separated from it to rebuild the body. The heart is the great organ of the circulation of the blood ; but that circulation depends also

we hope His Excellency will as his influence in the proper quarter to promote this object; as well as the rises of the Company towards their obtaining a charter for this desirable purpose. —Bytown Gazette. —According to the intimation in our last, the meeting called for the purpose of petitioning the Legislature in favor of an augmentation of the Bank capitala, and to device the means of rais-ing, by a Joint Stock Company, the necessary funds to establish a new line of stans mavigation on the Ottawa, was held in the Court of Request Room, here on Monday last. Both proposals met with the warmest approbation of the meat-ing juice of the former, under certain to the Legislature, for the former, under certain restrictions. On the second object of the meet. to the Legislature, for the former, under certain restrictions. On the second object of the meet-ing, it was resolved to raise the sum of 230,000, in shares of £10 each, to form a new line of steam mavigation on the Ottawa. This propedial was embraced with avidity, and a number of shares subscribed for at the time. We have heard that it is intended to appropriate a certain proportion of the stock for Montreal, where it will be readily taken,—a portion for the Ottawa, and a portion for the line of the Rideou Canal, and the tract on the SL Lawrence. The avidity with which the share of stock appropriate for Bytown and the banks of the Ottawa is taken up, is such, that we would earnestly recommend up, is such, that we would carnestly recommend those wishing an investment to make an early application  $-\ell b$ .

United States.

Mr. Augunon .--- The Charleston papers of th 9th, announce the arrival of the bird-hunte through the white, in getting ready for publica-tion the descriptions and drawings of some new species from the Rocky Mountains. In the spring he will take a ramble through Moxico and up the Yeilow Stone river. Government has authorized and invited him to avail himself of revenue cutters and other facilities; and his book will be completed, he hopes, in another year.
