

### CARL BELIEVED END WAS COMING

#### Declares Tanlac Restored Him Fully When in Despair From Stomach Trouble

"I just think Tanlac is the last word in medicine," recently said James Carl, well-known carpenter and bulker, of 123 John St., Hamilton, Ont. "In 1916 my health began to run down and in spite of all I could do my condition got worse. Every bone in my body seemed to ache and my stomach caused me no end of trouble. During all the winter of 1920 I was so miserable I never expected to live to see the snow off the ground. I would almost smother from the gas on my stomach and many a night I never closed my eyes in sleep."

"Before I got Tanlac I was simply a physical wreck and would walk the floor not knowing what to do. The first few doses of Tanlac showed me it was what I needed and four bottles built me up fifteen pounds and put me in the best of health. Mind you that was a year ago, but I have felt fine ever since. No one can go wrong by taking the Tanlac treatment."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

#### PREFERRED TO TAKE A RISK

A business man says the talk about risky investments remained him of an interview between a merchant, who has since retired from business and a banker. The merchant had been unfortunate in some of his investments and the banker said to him, "Why don't you put your money in a savings bank instead of risking it in stocks the way you do?" Said the merchant, "I would rather take a risk on it at 7 per cent than put it in your bank at 3 per cent." There are many people who feel the same.

### ABBIES WIN CHAMPIONSHIP

Charlottetown, March 27—The Abegweits, Champions of the New Brunswick and Prince Edward Island Amateur Hockey League, won tonight the Maritime championship by defeating the Windsor team, the champions of the Nova Scotia League, in a hard, fast, close and clean game by the score of four to three. The Morton and Thompson Trophy thereby remain in Charlottetown for a second year.

Tonight's was a worthy battle between champions. Windsor scored their three goals in the first ten minutes, scored them before the Abbies found the net, the first period ending 3-1.

In the second period the Abbies shot another goal and in the third, two more.

The game was one of the fastest ever seen in Charlottetown, and only three penalties were handed out by the two referees, Jack Twaddle and Neil Wilkie.

The Abbies played a brilliant combination going down the ice time and time again three abreast. The individual work of the Nova Scotians was magnificent. The star performance of the wing men, Ernie Mosher, and his burly associate, F. Poole, was among the features of the game which kept the 1300 fans roaring in their excitement. S. MacDonald the whirlwind right defence, did noble work in breaking up the Abbies dangerous combinations. J. MacDonald and McCann giving very strong support.

#### SASH EVER PRESENT IN SPRING MODELS

The sash is the tie that binds Spring Suits together. Whatever be the lines there is bound to be a sash there are several types of suits for the coming season but the type which will be universally accepted is the two piece suit with the short jacket which fastens at one side with a bowknot or looped sash end. Coat blouses or printed silks and jersey cloth will be worn with them and there never has been such a vast display of printed blouses as now.

Youthfulness is the keynote of Spring styles. Straight slender lines are to be the thing for the coming season. Jackets are confined rather snugly about the hips over slender skirts. One of the most successful models is the suit of tan vicuna cloth.

### FIVE YEARS' AGONY ENDED

#### When He Took "Fruit-a-lives" For Rheumatism

#### The Medicine Made From Fruit

There can be no doubt that "Fruit-a-lives" is the long sought remedy for Rheumatism and Lumbago. From all over Canada come letters testifying to this fact.

Mr. John E. Guilderson of Parrsboro, N.S. writes: "I suffered badly with Rheumatism for five years. I tried different medicines—was treated by doctors in Amherst—and here at home—but the Rheumatism came back."

In 1916, I saw an advertisement for "Fruit-a-lives" and took a box and got relief, so I took them for about six months and the Rheumatism was all gone and I have never felt it since. 50c. a box, 6 for \$2.50, trial size 25c. A. G. dealer or Fruit-a-lives Limited, Ottawa, Ont.

#### B. C. MAY HAVE BLUE SKY LAWS

Victoria, March 27—As a result of the L. R. Steel collapse and the loss of thousands of dollars by British Columbia investors, the provincial authorities here are again considering the advisability of adopting sky blue legislation which is something that the province has always lacked.

#### Here and There

Vancouver as a grain port has gone over the top and is assured of achieving the 15,000,000 bushel objective set for the 1922-1923 crop year, according to statistics issued at the Vancouver Merchants Exchange.

A Canadian Pacific Railway train, over half a mile long, left Oshawa for New York recently. The train was composed of 52 flat cars, each carrying from four to six automobiles, and was the first solid train to leave Oshawa for New York.

Making the heaviest loading since the big crop year of 1915, grain loaded on the western line of the Canadian Pacific Railway from September 1st, 1922, to March 7th, 1923, inclusive, totalled 118,565 cars. This is 16,000 more cars than were loaded during the corresponding season of last year.

While in mid Pacific, the wireless operator of the Canadian Pacific Steamship "Empress of Russia" was in touch with the Leaflet wireless station in England, and received a number of news items. "The ether waves were evidently carried across the North Pole, as we were on the other side of the world," said Captain A. J. Hesken, commander of the liner.

An Owen Sound deputation which recently interviewed Canadian Pacific Railway officials in Toronto, urged the building of a line from Owen Sound, through Meaford and on to Collingwood and then on to a point on the Sudbury line near Coldwater. The officials are reported to have been interested by the suggestions made by the delegation.

Captain A. J. Hesken, R.N.R., of the Canadian Pacific Steamer "Empress of Russia," has been awarded the Medaille d'Honneur de Sauvelage de premiere classe by the French Government, for the part taken by him as commander of the liner "Monteagle" in saving the crew of the French steamer "Hsin Tien," off the China coast.

There is a gold rush on to Rouyn township, in northern Quebec, to Labrador and now to the Soe district. In fact, the whole northern district has immense areas of rock bearing more or less gold, and the question is whether the quantity is large enough to make a real mine. Gold mining will be one of Canada's greatest industries twenty-five years from now.—"Mail & Empire."

Still another case of children travelling alone. Elmer and five years old and Roland Callwell, seven years old, both living on St. Denis street, Montreal, were missed by their parents who did not hear of them after their disappearance until notified by Canadian Pacific Railway officials that the children were in Quebec city, to which place they had begged a ride.

The initial shipment of cattle since the Eschargo removal was recently inspected by the Hon. W. P. Metherell, Minister of Agriculture, in the C. P. R. stock yards, Montreal. They were stall-fed Ontario cattle from along the Canadian Pacific west of Toronto, with the exception of one car load of Western cattle, the latter being in the best condition despite the fact that they had had a 28 hours run from North Bay. The minister expressed the opinion that the cattle being shipped were of the first quality.

It has remained for the Canadian Pacific experimental farm at Strathmore to demonstrate beyond the possible shadow of doubt that the inexpensive trench silo system of providing winter fodder for cattle is, under favorable conditions, quite equal to the costly structures which have in the past been utilized and that the silage is in every sense excellent. This was proved to the satisfaction of a large party of agricultural and business men, who recently visited Strathmore as the guests of the Canadian Pacific Department of Natural Resources in

### REPORT OF RENOUS SCHOOL

#### January-March

Grade V—Ruby Hambrook, Helen Young 1st, Alice Schofield 2nd, Frances McNeil 3rd.

Grade IV—Genevieve McLaughlin 1st; George Schofield 2nd; John Young 3rd.

Grade III—Donald Mitton 1st; Harold Mitton 2nd; Tom Hambrook 3rd.

Grade II—Lenore Joyce 1st; Emily Young, Ernest Jardine 2nd; Cletas Young 3rd.

Grade I (a)—Bernice Young, Forrest Jardine 1st; Edison Hambrook, Carl Jardine 2nd; Harrison Hambrook 3rd.

Grade I (b)—Harold Young 1st; Grade I (c)—Helen Hambrook 1st; Keld Joyce 2nd; Katie Hackett 3rd.

Perfect Attendance—Edison Hambrook.

One Half Day Missed—John Young. One day missed—Tom Hambrook, Cletas Young.

Two days missed—Helen Young.

Three days missed—Frances McNeil, Lynetta Young.

Pupils enrolled—37.

Average Attendance—27.

M. H. RAE, Teacher

### New Treatment Of Pneumonia Meets Notable Success

New York, March 22—Remarkable success in treating pneumonia by a new process was reported today by physicians connected with the staff of St. Mary's Hospital in Hoboken.

It was asserted that several patients who seemed to have little chance to recover had improved greatly under this treatment, which is called the diathermic treatment. It was introduced in Hoboken, it was said, by Dr. H. V. Broeser, an X-Ray specialist of St. Mary's Hospital, after it had been tried in 20 cases in the United States Marine Hospital on Staten Island. Dr. Harry E. Stewart, of Yale, well known as a coach and athletic leader, and an instructor in the department of physiotherapy at Yale, developed the treatment and used it on Staten Island.

The method consists of the application of plates to the chest and the back, and the passing of an electrical current through the lungs. This increases the temperature within the lungs and its beneficial effect in pneumonia is said to be in breaking up congestion.

"The use of heat in the treatment of pneumonia," said Dr. Natrass, "is very old. Mustard plasters and similar means of producing heat have saved the lives of many pneumonia patients, but that kind of thing is inefficient in getting heat inside the lungs."

"The diathermic treatment used by Dr. Stewart introduces heat deep in to the lungs without burning the surface."
