Most folks think it would be quite right to speak of the growl of a tiger. As a matter of fact, this creature does not growl at all. SUGGESTION No. 4. Women's Help Necessary for the Proper Running of the City

I have always been a strong advocate for giving women vote, both Municipal and Political. I understand that women perty owners are permitted to vote in Municipal Elections, but personally consider that women should have absolutely rights with the masculine sex where all matters of administration of the city and country are concerned.

The reason is obvious. Think of the number of intellige clever women there are right here in the city. Many business are conducted solely under the management of women in John's, and did you ever hear of one of these businesses that other than successful? As far as that goes, I bet ninety per of of the successful business men of St. John's owe their success the fact that they discuss their business problems with their will Again, take the various organizations with which different of of us are connected. Which are the most successful? In cases out of ten the one that have "Women's Auxiliaries" nected with them. Isn't that a fact? Take the N. I. W. A. Is in previous instances. And these successful, clever women are the people whom masculine governments do not consider persons to have a say in the government of country and city.
