The sale will start with a rush. Why? Because the folks living anywhere near the site realize the need of a live town to supply the needs of farmers who own from 160 acres upwards of the 200,000 acres for which there is no trading point nearer than 13½ miles. Chin is situated right in the midst of this wonderfully rich community and has as promising a future as Sterling, Magrath, Grassy Lake, Bow Island and Taber, all of which have sprung out of the prairies within the last five years and

are thriving little cities where real estate has doubled and trebled in value. We put Warner on the map three years ago. It has made good several times over We have sold more than 300,000 acres of farm land in this section of Alberta within the last four years, and every buyer is now prosperous or wealthy.

Chin is not the visionary scheme of professional town site boomers. It is a legitimate enterprise backed by one of the largest land companies in the Northwest. There is urgent need of a town at the site selected. A red blooded, wide awake man might drop out of a balloon onto any lot in Chin and be sure of making money.

Chin is not to be simply a good business town. We have planned to make it a comfortable place in which to live by donating sites for a School, Church, Parsonage, City Market and we are going to put in a city well. There are openings for many lines of business.

Is a country where the average yield per acre, of wheat, oats and barley cannot be equaled by any state in the Union;—spring wheat running from twenty to fifty bushels per acre, winter wheat from twenty to sixty-five bushels, oats from sixty-five to one hundred and thirty five bushels, and barley from thirty to sixty bushels. The cost per acre to raise an average crop of wheat is \$8.00. Take an average yield and the market price, and figure out what the net returns are to the man owning a section of land. This indicates the resources back the town of Chin.
