PAINS SO BAD STAYED IN BED

Young Mrs. Beecroft Had Miserable Time Until She Took Lydia E. Pinkham's Vegetable Compound.

Hamilton, Ont. — "I have suffered for three years from a female trouble and consequent weakness, pain and irregularity which kept me in bed four or five days each month. I nearly went crazy with pains in my back, and for about a week at a time I could not do my work. I saw Lydia E. Pinkham's Vegetable Compound advertised in the Hamilton Spectator and I took it. Now I have no pain and am quite regular unless I over-work or stay on my feet from early morning until late at night. I keep house and do all my own work without any trouble. I have recommended the Compound to several friends." — Mrs. EMILY BEECROFT, 269 Victoria Ave. N., Hamilton, Ontario.

For forty years women have been telling how Lydia E. Pinkham's Vegetable Compound has restored their health when suffering with female ills. This accounts for the enormous demand for it from coast to coast. If you are troubled with any ailment peculiar to women why don't you try Lydia E. Pinkham's Vegetable Compound? It is made from native roots and herbs and contains no narcotics or harmful drugs. For special advice women are asked to write the Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of forty years experience is at your service.

LOCAL DEATH ROLL

MRS. HENRY LOCKHART

It was with deep, sincere regret the relatives, friends and acquaintance learned on Wednesday, Jan. 4th, of the sudden death of the late Jane Lockhart, wife of Henry B. Lockhart, of East Leicester, N.S. She was the daughter of late Robert and Mary McKennie, born in East Leicester, November 24th, 1845. She was one of a family of nine, of which only two remain, namely, Mary, wife of M. T. Shipley, Amherst, and Robert, of Leicester.

The deceased is survived by a husband and nine children, Annie, wife of M. D. Forrest, Amherst; Chas. E. of Notre Dame, N. B.; Mrs. Minnie R. Miller, Bridgetown; Bertha, wife of J. N. Grace, Roxbury; Bent W. of Moncton; Lillian, wife of J. M. Ferguson. Northport. Hugh, Florence and Mable at home.

It may be noted that the death is the first break in the family—the nine children all attaining manhood and womanhood, and all present at the funeral, except Mrs. Grace, deceased by illness.

The funeral held on Friday afternoon Jan. 7th, was conducted by the Methodist minister, Rev. Mr. O'Brien, Oxford, Chairman of the District, and largely attended by her numerous friends. Among the beautiful floral offerings—the flowers she loved—was a handsome spray from the W. F. M. S. of which she was a most interested and valued member. The pallbearers were the three sons, Chas. Bent and Hugh and the three sons in law, Morton D. Forrest, J. N. Grace and J. M. Ferguson. The deceased was a woman of unusual sterling character and her home was always open to one and all, especially the ministers, who labored on this circuit and the absent children and loving grand children, who loved to gather within the old home.

PERCY COVERT

The death of Percy Covert occurred on Saturday, Dec. 4th, at the home of his father, Frank Covert, Lower Granville, after a lingering illness of tuberculosis, at the early age of 24. Deceased was a young man very highly esteemed by a large circle of friends. Of a kindly disposition, generous nature and genial manner, he was a favourite. He is survived by a widow and one son, besides his parents, one sister and brother. He went overseas with the 112th Batt., and while in England took pneumonia. After arriving home he spent eighteen months at N. S. sanatorium. The universal sympathy of the community goes out to the bereaved ones in their sad loss. Funeral took place on Tuesday, Dec. 7th. Burial at Port Wade.

JOHN GAUL

On Sunday, Jan. 2nd, John Gaul died at the home of his brother, Samuel Gaul, Inglisville. He was 48 years of age and had been in failing health for a number of years.

While living at Morrisstown he was baptized by Rev. L. F. Wallace. He was a young man of excellent character. He is survived by seven sisters and two brothers. The interment was in "Fairview Cemetery," Lawrencetown, and Rev. H. Jones conducted the service Tuesday afternoon.

JOHN J. PHINNEY

Mr. John J. Phinney, aged 72 years, passed away at Falmouth, N. S., Saturday, after an attack of pneumonia. The deceased was the father of Mrs. (Dr.) Ralph Woodbury, of Halifax, and he is survived by a wife, three daughters and one son. The funeral was held from his former home, Victoria Vale, Annapolis County on Monday.

A Yarmouth despatch says: Ar. schr. Rose Anne Belliveau, Comeau, Vineyard Haven. This vessel will lay up for the winter, no business offering.

MISS BESSIE F. CROWELL, pastor of First Monmouth, received ordination at Monmouth, Maine, on Oct. 20. The service was held in the evening and was largely attended. The ordination sermon was a masterly one, preached by Dr. J. H. Eob of Augusta. Rev. W. H. Palmer of Hallowell, Assistant Superintendent of State Work, made the ordaining prayer. The charge to the candidate was given by Rev. H. S. Capron of Bangor. Rev. O. E. Barnard of Winslow gave the right hand of fellowship and in well chosen words gave a cordial welcome to Miss Crowell to the fellowship of the Kennebec Association and the church at large.

Miss Crowell became pastor of the church at Monmouth, Dec. 1, 1919. She has had wide experience in Christian work, having been a missionary in India for seven years, and so brings with her into the ministry a broad knowledge and experience gained by work with other races and in other lands.

[Miss Crowell is a sister of Mrs. L. R. Miller of this town.]

VALLEY HOSPITAL NOTES

Percy Staratt of Falkland Ridge was admitted on Monday the 3rd. J. P. Stronach of Margerville was operated on the 3rd and is doing well.

Harold Bowlby, 3 year old son of Neil Bowlby of Wilmot was a patient last week.

W. C. McPherson of Lawrencetown operated on Dec. 30th is improving very satisfactorily.

Yarmouth schooner Loran B. Snow was at Liverpool on Saturday with 20,000 lbs of fish.

FRIENDS ADVICE MADE MAN OF HIM

Was Just About All In When They Urged Him To Try Tanlac— Now Feels Like Old Self

"I'm only too glad to tell you what I think about Tanlac. This is the fourth bottle I have bought and if it wasn't doing me good I wouldn't be wasting my time on it," said Charles Neel, of 31 Meadow St., St. John, N. B.

"When I returned from overseas my digestion was so upset I could eat a thing scarcely without suffering the worst kind of distress and pain afterwards. After every meal I had a heavy feeling like I had swallowed a lump of lead, and my food would sour and bloat up till I was in perfect misery. I also had such pains in the back I could hardly get around and could sleep so little on this account I often heard the clock strike every hour of the night. I was tired and weary all the time and in fact became so run down I was just about all in when I started on Tanlac."

"When my friends saw what a terrible shape I was in they urged me to try Tanlac, and it has made a man of me. By the time I had taken two bottles my stomach was in fine condition and I could eat anything I wanted and never suffer the least ill effects. I have gained ten pounds in weight and am so much stronger I can do as much work in one day as I used to be able to do in two. I am no longer bothered with pains in the back, I sleep like a log all night and get up in mornings feeling ready for a good day's work."

Tanlac is sold in Bridgetown by S. N. Wearie in Middleton by Clifford A. Mumford and in Bear River by L. V. Harris.

A FORDSON TRACTOR SPEEDING

WINDSOR Jan 15—Essex public officials are somewhat perturbed by a new problem in traffic administration. They find no great difficulty in coping with trucks, automobiles and motorcycles, but when the driver of a Fordson tractor gives him as an excuse for speeding that he is not driving a motor vehicle and anyhow was off to fetch the doctor, this situation becomes a difficult one.

Legally the driver is said to be within his rights as tractors are not required to carry numbers and are not motor vehicles according to statute.

The normal speed of the make mentioned, when equipped with rubber road wheels, now so closely rivals that of a motor truck, even when the tractor is hauling two or more loaded wagons behind it that local authorities are seriously perturbed as to the future growth of this traffic.

It is claimed that to license all tractors would be a hardship as the majority of the types on the market are too slow to be seriously considered for road transportation purposes. The matter may be taken up with the Hon. F. C. Biggs in the near future.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are changeable—one bright, the next one cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

ONLY THIRTEEN DEATHS IN SHELburne IN 1920

(Gazette)

A year ago we spoke of the light death rate in Shelburne for 1919. In that year eighteen persons died in the town. Last year the record was even better, there having been only thirteen.

KEEP IT SWEET

WINTER LAYERS OF DIFFERENT AGES

(Experimental Farms Note)

ABOUT WINTER LAYERS—It is thought that farmers keep hens until too old for profitable winter egg production and it is also a common belief that late hatched pullets commence to lay only during the following spring. To throw some light on this subject, it was decided in 1915 to compare early pullets, late pullets, yearling hens, and old hens as winter layers, at the Cap Rouge Experimental Station.

THE EXPERIMENT—The experiment began on the first day of November and ended on the last day of February, during five consecutive years. The number of birds in each pen was about twenty five and the whole lot occupied the same house. A strict record was kept of all feed consumed, also of all eggs produced by every pen. At the beginning and at the end of each experiment the birds were weighed so that, in the spring, the gain or loss in weight could be credited or debited to them.

THE RESULTS—If the cost of production of one dozen of eggs, during winter, is taken as 100 for early pullets, hatched before May, it would be represented by 249 for yearling hens, by 280 for late pullets, hatched after April, and by 848 for old hens. In other words, when pullets hatched before May produced a certain number of eggs at a cost of \$1.00, yearling hens produced the same number at a cost of \$2.49, pullets hatched after April at a cost of \$2.80 and old hens at a cost of \$8.48.

WEIGHT OF EGGS—It is sometimes objected that, though early pullets lay more eggs than yearling or older hens, the size of the eggs is such that they would bring much less if ever eggs were sold by weight. Taking the figures from the present experiment, we find that, for the same weight of eggs, when it cost \$1.00 to produce them with early pullets, it cost \$2.35 to produce them with yearling hens, \$2.92 with late pullets, and \$8.10 with old hens. It will be seen that, as expected, the weight of eggs from hens was a little larger than that from early pullets, but the difference does not materially change the figures for the cost per dozen.

SAME BIRDS COMPARED—The birds used for this experiment were not specially bred for eggs production, so that the early pullets put in each year were not from best stock than the yearling or older hens. Two seasons, the yearling hens used for this experiment were the same birds, with the exception of a very few which had died, as the ones in the pen of early pullets of the previous year, and in both cases they were, for cost of production, below the new lot of early pullets taken indiscriminately in the farm flock.

EARLY PULLETS BEST—That early pullets are the cheapest producers of winter eggs has been told and written so often that it is like an old story. But a carefully conducted experiment will again remind farmers of a well known fact which they often seem liable to forget.
