

Listerine

**A Non-toxic, Non-irritant, Non-escharotic
Antiseptic.**

ABSOLUTELY SAFE, AGREEABLE AND CONVENIENT.

Listerine is a well-proven antiseptic agent—an antizymotic—especially useful in the management of catarrhal conditions of the mucous membrane, adapted to internal use, and to make and maintain surgically clean—aseptic—all parts of the human body, whether by spray, injection, irrigation, atomization, inhalation, or simple local application. : : ; : : : : : : : : :

For diseases of the uric acid diathesis:

LAMBERT'S LITHIATED HYDRANGEA

A remedy of acknowledged value in the treatment of all diseases of the urinary system and of especial utility in the train of evil effects arising from a uric acid diathesis. A pamphlet of "Clippings" of editorials on this subject may be had by addressing:

Lambert Pharmacal Co., St. Louis, U. S. A.

Be sure of genuine Listerine by purchasing an original package.

We desire to thank the profession for the many kind letters received recently indorsing the stand taken by us during the cod liver oil famine. From the very start we have felt that at least one emulsion of cod liver oil should be absolutely reliable and unvarying in quality, despite whatever changing conditions might confront the market. This position Scott's Emulsion has filled for thirty years and it is gratifying to know that our efforts are appreciated by those who are in the best position to judge such matters. We are always satisfied to let the verdict remain in the hands of the physicians throughout the country, knowing that Scott's Emulsion will almost invariably secure preference over any other cod liver oil preparation. It is a pleasure to assure the profession that Scott's Emulsion will always merit the confidence it has earned and will continue to be the best emulsion of cod liver oil it is possible to make.

SCOTT & BOWNE, Chemists, Toronto, Ont.
