

Made in Canada

Pointe Claire Road, Quebec.
Tarvia Filled Macadam.

An Economical Roadway—

HERE is a handsome, economical tarviated road. It will take a large amount of traffic without developing a dust nuisance in dry weather or a mud nuisance in wet, without getting rough or changing contour.

This road has been constructed with "Tarvia-X" as a binder throughout.

Once a year, or once in two years, it would be advisable to go over this road and spray it with "Tarvia-B", a lighter grade, which requires no heating to prepare it for use on the road.

A light coat of screenings should, perhaps, be spread down at the same time, and with such inexpensive attention this road will

keep its contour and perfect waterproof surface for many years.

The cost per year of the Tarvia treatment will be very *much less* than the ordinary maintenance expense of a plain macadam road and the results will be vastly more satisfactory.

Modern engineers have given up building plain macadam roads and expecting them to withstand modern automobile traffic. They recognize the need for a bituminous binder. The cheapest, the simplest and the best binder is Tarvia.

Illustrated booklets describing the treatment free on request. Address our nearest office.

Special Service Department

This Company has a corps of trained engineers and chemists who have given years of study to modern road problems. The advice of these men may be had for the

asking by anyone interested. If you will write to the nearest office regarding road problems and conditions in your vicinity the matter will have prompt attention.
