Page 99 (Terminology):

Delete the Statement of Understanding and add the following new Terminology:

"Modified" in the context of "software":

Software" which has been intentionally changed such that it has properties that make it fit for specified purposes or applications other than those for which it was "modified".

"Usable In" or "Capable Of":

Equipment, parts, components or "software" which are suitable for a particular purpose. There is no need for the equipment, parts, components or "software" to have been configured, modified or specified for the particular purpose. For example, any military specification memory circuit would be "capable of" operation in a guidance system.
