## ANATOMY AND PHYSIOLOGY,

(*Omitted on pages 63, 64.*)

**Marshall's Physiological Diagrams** : Produced under the direction of John Marshall, F. R. C. S. for the Department of Science and Art, London. Size, 3 feet 8 inches, by 9 feet. Price, per set of nine.....\$35 00

The nine plates illustrate the following subjects: 1. The skeleton and ligaments. 2. The muscles, joints, and animal mechanics. 3. The viscera in position. The structure of the lungs. 4. Heart and blood vessels. 5. Lymphatics and absorbents. 6. Digestive organs. 7. Brain and nerves. 8. Organs of the senses. 9. The textures—microscopic structure.

These beautifully colored diagrams are on a single sheet, each of them having been printed at one operation. Zinc plates and paper had to be expressly made for the purpose, and a Leviathan press designed, experimented upon, and perfected, to permit so large a sheet to be printed in colors, otherwise such a diagram must have been printed in six parts and then joined together. Printed by Day & Sons, Lithographers to the Queen.

### ERRATUM.
