

WATER POWERS OF CANADA REVIEWED IN FULL REPORT

Leo. G. Denis and A. V. White Have Submitted Results of Investigations to Commission of Conservation.

The present coal strikes and rumors of coal strikes, which are the worst kind of industrial and economic war, nothing could be more timely than the exhaustive consideration of the fuel and power resources of Canada. This has been brought before the nation in the 400-page report of the Commission of Conservation of the Canadian "Water Powers of Canada," recently issued at Ottawa. It is the work of Leo G. Denis, B. Sc., M. E., and Arthur V. White, C. E., and is submitted to the governor-general by Hon. Clifford Sifton, chairman of the commission. One of the most interesting features of the report to a student of the question is the very full bibliography by Mr. White, a recognized authority on the subject, which covers no fewer than thirty pages. Two years ago Mr. White himself prepared a highly important article on "The Exportation of Electricity." The article was submitted to "The University Magazine," Montreal, in March, 1910, but publication was delayed until the following October. Meanwhile W. K. McNaught, to whom the article had been submitted, prepared and published a pamphlet on "Ontario's True Policy in Regard to Black and White Coal," and Mr. McNaught told the World that he was indebted to Mr. White's article. We are all now indebted to Mr. White for his share with Mr. Denis in the preparation of the present valuable and comprehensive survey of the whole series of problems involved.

James White, secretary of the commission, in his presentation to the chairman, states that the report is the result of nearly two years' work. Mr. Denis wrote the chapters dealing with the water powers of Quebec, Manitoba, Saskatchewan, Alberta and the Northwest Territories; a chapter on the water powers of British Columbia was contributed by W. J. Dick, M. Sc., and one on "Irrigation in Western Canada," by George B. Hill, C. E. Mr. White, however, wrote the greater part of the report, including the introductory chapters, and those on Ontario, Nova Scotia, Prince Edward Island and New Brunswick. Owing to scanty material Mr. White has determined to institute surveys in the prairie provinces and in British Columbia. Mr. Denis and Mr. White respectively have the direction of the work. The results are to be published later.

Develop Water Powers.

In a country like Canada, which has two and a half times the water area of the United States, there is a great natural reservoir of the great lakes maintains the most equable and the greatest single water power in the world in the St. Lawrence. It is natural that attention should be given to the problems of making good the deficiency in coal by the development of light, heat and power from the water resources. It is necessary, however, to get an accurate idea of what these resources are worth. It is pointed out that the water power available bears no necessary relation to the water area. A serious note of warning is sounded in this connection. An illustration of the case of Lake Abitibi is taken with nearly 400 square miles area. But the mean summer depth does not exceed ten feet. Pennsylvania has only 75 per cent. of this area of water, but that state has installations of 300,000 horse power. To supply as much power would drain Lake Abitibi dry in a month. And what is true of water areas is correspondingly true of water-shed basins. The problem of estimating water powers is gone into carefully and some obvious but frequently disregarded points emphasized. The great point is that the minimum flow of the stream during the year is the basis of estimating the maximum power to be developed. Storage facilities may help to raise the minimum flow, and in some cases where certain types of industries permit it, a greater amount of power than the minimum might be used for nine or ten months in the year, while for the remaining time the supply had fallen away. It is thought that the available water power is much over-estimated. The conclusions arrived at in this chapter are of lasting and general interest. They are as follows:

First.—Water power is dependent primarily upon precipitation. Other interests such as municipal and domestic water supply, navigation, agriculture and irrigation are likewise dependent upon the same source. The subject of water powers, therefore, cannot be properly considered without making fair allowances for the demands of the other interests that have just claims upon water as a natural source.

Second.—Knowledge of the circumstances intimately associated with the water powers is essential to an intelligent classification of them. It is an unreasonable not to differentiate between water powers as it would be not to differentiate between timber tracts, mineral lands, or the items of any other natural resource varying in quantity, quality and situation.

Accurate Data.

Third.—The accuracy of published data relating to water powers must be accepted with qualifications unless these data are based upon carefully ascertained facts obtained in the field.

Fourth.—General statements so commonly made of vast numbers of existing water powers are misleading, and tend to disguise the fact that the number of water powers in Canada, at present desirable from an economic standpoint, is much smaller than is generally supposed.

Fifth.—Reliable data upon water-powers have definite characteristics. At the present time there is urgent need for such data and for detailed topographical maps.

Should Be Careful.

Sixth.—Certain steps are necessary to secure water power data that are thoroughly reliable. Motoring stations should be established at carefully selected points on the principal rivers and streams, and accurate cross-sections of the river beds made at such stations. Permanent bench-marks should be established. A substantial gauge should be erected in an accessible place at each gauging or motoring station. Carefully conducted discharge measurements should be taken from time to time during the

SUDEN DEATH IN EGLINTON.
Mrs. Alfred Sellers of Sherwood Ave., Was Ill Only an Hour.

Death came very suddenly to Mrs. Alfred Sellers of Sherwood avenue at an early hour on Sunday. Mrs. Sellers, who has been in good health, on Saturday was seized with a severe pain in the back of her head. Her death was of a young woman was dead. The deceased was only 23 years of age, and leaves a husband and a child. Her death was a surprise to all who knew her. She had been feeling unwell for some time, but her illness was not considered serious. Her death was a sudden one, and she was found dead in her bed on Sunday morning. Her husband, Alfred Sellers, was notified of her death at about 10 o'clock on Sunday morning. The funeral will be held at the residence of Mrs. Sellers on Monday afternoon at 2:30 o'clock.

WHITEVALE.
Whitevale, March 17.—(Special.)—J. H. Turner and family will remove to Milton in the near future, and general regret is expressed at their intention.

PICKERING VILLAGE.
Electric Line May Follow Kingston Road After All.

PICKERING VILLAGE, March 16.—(Special.)—The Methodist Church today held a meeting to discuss the proposed electric line from the station to the village. The meeting was held in the evening, and a large number of people were present. The Rev. J. M. Combs, minister of the church, presided. The meeting was held in the evening, and a large number of people were present. The Rev. J. M. Combs, minister of the church, presided. The meeting was held in the evening, and a large number of people were present. The Rev. J. M. Combs, minister of the church, presided.

NORTH TORONTO, March 17.—(Special.)—Saturday's session of the town council, presided over by Mayor Brown, and attended by every member of the council, dealt with many matters of importance. The first item on the agenda was the report of the committee on the proposed electric line from the station to the village. The committee recommended that the line be laid along the Kingston road, and that the power be generated at the station. The council agreed to the recommendation, and the matter will be taken up again at the next meeting.

WEST TORONTO, March 17.—(Special.)—The funeral of the late J. C. Boughner, a well-known local business man, was held at the residence of Mrs. Boughner on Sunday afternoon at 2:30 o'clock. The funeral was attended by a large number of friends, and the services were conducted by Rev. J. M. Combs. The deceased was 65 years of age, and had been ill for some time. He was a member of the St. Paul's church, and was a very popular man in the community.

CANADIANS GET PLACES OF HONOR

Ontario Educational Association Convention, Which Will Be Held in Toronto During Easter Week, Will Be Addressed by Some of the Best Speakers in Dominion.

The Ontario Educational Association, which holds its fifty-first meeting in Toronto during Easter week (April 5 to 11), is making this year an interesting departure from its usual procedure. For many years past it has had the chief speakers at its evening meetings distinguished educators from abroad. While these visitors have been cordially welcomed, and while their remarks have been much appreciated, the association has decided to give this year the places of honor on its program to Canadians.

Archdeacon Coady of Toronto has consented to address the association on "Education in Relation to National Character," while Principal MacIntyre of the Winnipeg Normal School will bring a message from the western provinces and will deliver an address on the topic, "An Efficient Education."

Additional interest is given to the program by the fact that Dr. Henry E. Cope of Chicago, secretary of the Religious Education Association, and a speaker at the convention, will be present to give two addresses—one before the training department of "The Wider Approach of Religious Education," and one before the general assembly on "The Public School as a Factor in the Development of Religious Character."

The president for the present year, J. H. Laughton of Parkhill, represents the public and high school trustees of the province. This emphasizes the scope and activities of the association and the representative character of its membership. The board of directors is anxious that the attendance at the forthcoming meeting shall be the largest in the history of the association. Special rates are granted on all the railroads, and the University of Toronto is co-operating with the local committee to provide ample accommodation for the meetings of the large number of departments and sections into which the association is now divided.

The secretary, R. W. Doan, 218 Carlton street, Toronto, will be pleased to send copies of the program to all who may be interested and give any assistance within his power to those who are planning to attend.

THE COUNTESS OF WARWICK.
Does it not seem strange that whenever a movement is launched for the benefit of mankind, socially or morally, the promoter is lauded to the highest pinnacle, and his name goes forth as a great benefactor. But when a woman comes forth in a similar movement for women and girls she is considered out of her sphere.

THAT FOOT PAIN

Broken down arch causes pain in the foot, heel and ankle. Sufferers imagine that it is composed of joined bones. When they get out of place the bones rub against each other, causing intense pain often mistaken for gout and rheumatism. School's "Foot-Easers" give instant relief. You can walk all day without cramp or pain. Callouses, corns and bunions soon disappear. School's "Foot-Easers" make walking a pleasure instead of a torture. Sold by all druggists and shoe dealers. Try them today. The School Manufacturing Company, Limited, 472 King Street West, Toronto.

WITH OR WITHOUT GLASSES
A girl may look pretty, but though the fair sex know that glasses add to the dignity of the appearance, the majority of the ladies would rather endure headache than get glasses. School's "Foot-Easers" give instant relief. You can walk all day without cramp or pain. Callouses, corns and bunions soon disappear. School's "Foot-Easers" make walking a pleasure instead of a torture. Sold by all druggists and shoe dealers. Try them today. The School Manufacturing Company, Limited, 472 King Street West, Toronto.
