The bulk of his securities, valued at more than \$20,000,000, was in stock of the American Tobacco Company and its subsidiaries.
The share left to Payne Whitney, the favorite nephew of Colonel Payne, was appraised at \$3,951,427, of which \$3,714,043 was a sixth interest in the residuary estate. WASTED AS A THIEF.

Man With Clever Brain Robs a Chicago Police Station.
There are degrees in the gentle art of thievery, as in other things; but about the highest point was reached by the man who walked into a police station in Chicago last week, broke open the strong box where the money, watches and other valuables taken from prisoners for safe-keeping were stored, and got away with

everything that the box contained. The brains of this man must be admirable, although the use that he made of them is detestable.
If the galle that had crept into this man's head at some point in his life had only been goodness, what a master he would have made; what a master of men for their benefit instead of for their harm! Or if his natural skill and audacity could have been turned into the military field, where, as a commander, he could use the ordinary run of human beings as pawns in the great game of war, he might easily have become the Napoleon Bonaparte of this century, and possibly have made the bones of the great Corsican, now lying quietly under the dome of the gorgeous tomb facing the large Court of the Invalides in Paris, move with generous joy that at last a soldier had been found who could share in and carry on the fame of the Bonapartist traditions for military genius.
As it is, however, the wonderful brains of this capable thief merely serve to provoke a laugh at the Chicago police. It is a pity that the brain power of man has to prove itself before any one knows what its capacities are. The social order wastes a vast deal of excellent raw material by the inability of any one to perceive in the boy what he might be made into as a man.—Hartford Courant.
