BALDWIN TO ANNOUNCE PROPOSALS

(Continued from page one.)

London, Oct. 23.—What will Premier Baldwin say on Thursday?

This is a query over which political circles here are agog with speculation, for it is felt generally that what Mr. Baldwin has to tell his party is likely to have a vital bearing on the British fiscal relations with the Dominions and the future course of the imperial conference.

The Daily Express, in its news columns today, forecasts that Premier Baldwin will declare for changes in the British fiscal system sufficiently drastic to entail a general election. His proposals are predicted as follows:

All round protection of home industries by means of a scientific tariff.

No tax on imported wheat or meat with a preference to the Dominions.

Revenue derived from the scientific tariff would be devoted to subsidizing shipping freights from Australia and New Zealand, giving a bounty on corn production, subsidizing cotton growing within the Empire and the shipment of this raw cotton to Great Britain.
