OTTAWA' LETTER. SMITH'S KIDNEY OTTAWA, April 28 .- The health of the commons is a matter that causes some talk these days. While there are few cases of serious illness, there is a broad wave of physical weakness and debility not known for many a year. Members who have stood the strain of several parliaments complain that session they have that tired feeling so much spoken of in patent medicine advertisements. Meaical men, when asked the reason why, reply in general terms, and guardedly suggest that the trouble is chiefly due to bad water in the town and bad air in the commons chamber. Early in the session about every other man had a cold in his head. Later on came the debilitating epidemic of diarrhoea and almost enteric fever. The symptoms were identical with those shown by

our soldiers in South Africa, who had

Ottawa people are now drinking boiled water, but some parliamentarians from other parts of the Dominion who, like Kentucky colonels, do not take kindly to water, have escaped with whole skins. As to the bad water experts differ, but the enormous present death rate in the nearby city of Hull (Ottawa and Hull correspond to St. John

east and Carleton, divided only by a comparatively narrow stream) demonstrates that there is something audit act. wrong in the Quebec town. A sample

takes long odds.

The big death rate in Hull and the prevalence of ill health in the city of Ottawa, however, they may be ac-counted for, have no relation to the debility that prevails on parliament The best and most strenuous Because there is not on the entire North American continent a worse ventilated building for legislative purposes. Bad air, dead air, foul air accumulates, day by day and week by week. It cannot be driven out, ex-

cept under a fair pressure that would sweep papers off the members' desks as if hit by a cyclone. True, there is pert counter. supposed to be an in-take of fresh air from the river bank near by, but the This communication had the effect of by the British. He had the pleasure tunnel through which this air passes had not been cleaned for years and the smoking Colonel Gourdeau out of his an fresh at the mouth, reaches the

mons chamber, with a mouldy, graveyard flavor, imbibed in its pass age, like unto the atmosphere on which Shakespeare harps in Hamlet as well as Macbeth. There is good reason why the air here is bad. When the tenders for the construction of the present parliament building were in November, 1859, that of Thomas McGreevy for \$348,500 was accepted. Work preparatory to building progressed for a time, when it was cepted.

suddenly discovered that the plans contained no adequate provisions for ventilation or heating; -
