CHINA BOWS TO POPULAR DEMAND

Continued from page one. The whole empire is seething. The spirits of our nine deceased Emperors are unable to enjoy the sacrifices properly, while it is feared that the people will suffer grievously. All these things are my own fault, and I hereby announce to the world that I swear to reform, and, with our soldiers and people, to carry out the constitution faithfully, modifying legislation, promoting the interests of the people and abolishing their hardships, all in accordance with their wishes and interests. The old laws that are unsuitable will be abandoned. The union of the Manchus and Chinese, mentioned by the late Emperor, I shall carry out now. Finance and diplomacy have reached bed rock.

BORN

POWERS—On the 28th inst. to Mr. and Mrs. Thomas E. Powers, a son.

DIED.

MALPINE—At her residence, 131 Princess street, Oct. 29th, Jennie Shenton, beloved wife of Dr. L. A. McAlpine, and daughter of the late Rev. Job Shenton, leaving husband, mother, and a sister, to mourn. The funeral will take place at 2.30 p. m. on Tuesday.

MISTY VISION

Comes with advancing years, but can be cleared by properly fitted glasses. Spectacles are our opportunity. When we fit them, they give satisfaction. Call at D. BOYANER'S, 38 Dock Street, Optics Exclusively.

"Even if all unite, I still fear that we may fall. If the empire's subjects do not regard and do not honor me, and are easily misled by outlaws, then the future of China is unthinkable. I am most anxious they should unite. My only hope is that my subjects will thoroughly understand."

The throne promises to organize a cabinet without nobles forthwith. The Manchu Prince Shih Hsu, president of the assembly, is permitted to resign. Li Chia Chu succeeds. The Manchu Kiel Chun, minister of consular affairs, has been removed, and the Chinese Chao Ping Chun supersedes him in that office. The lines around Peking are tightening. While there is no great panic observable in the capital among the higher classes, the foreigners, there has been a perceptible tension, and the legation quarters are preparing for emergencies and in some cases, temporary fortifications have been placed in position. These consist largely of bags of sand. Detachments of troops guard the palace and the gates of the city while the throne has made haste to comply with the demands of the soldiers of the third and twentieth brigades, composing the second mixed army for the Yang-Tse campaign which were presented by the national assembly. It cannot be said that Peking is yet safe from attack.

Edict Has Good Effect.

The imperial edict has been widely discussed and it is generally believed that it was issued in order to provide Yuan Shi Kai with a powerful lever to use in his negotiations with the rebels. The fear of the people, which was great this morning, when it became known that the capital was threatened with an attack unless the government acceded immediately to demands of far-reaching importance, had somewhat subsided tonight. Although 600,000 while 100,000 Manchus are in dread of a Chinese attack. At Tien Tsin today the foreign troops marched around the cessation for the purpose of impressing the natives with their numbers, arrangement and general preparedness

for trouble. The customs commissioner received a letter signed by Shih Yen Fang in behalf of the Tien Tsin branch of the revolutionary committee, announcing the intention of the committee soon to take possession of both Tien Tsin and Peking.

Natural Cure for Catarrh Obviates Taking Drugs

It Has Superseded the Old-fashioned Stomach-dosing Remedies, and Invariably Cures Quickly.

It was their inability to reach the real source of catarrh and bronchitis that caused the medical profession to drop liquid cough medicines and adopt "catarrhones" instead. Catarrhones provides a method of breathing right into the lungs certain rare medicinal vapors which are so healing and comforting as to entirely banish coughs, catarrh and throat trouble in a very short time. The most wonderful thing about Catarrhones is that no matter where the germs of bronchitis or catarrh are hidden, Catarrhones will reach and destroy them.

"About five years ago I took a cold in the head and Catarrh set in. It kept increasing by leaps and bounds. I kept trying of getting anything until at last I found I would have to try putting several things I heard of your remedy, Catarrhones, and procured a bottle and began using it. After trying several things I heard of your remedy, Catarrhones, and procured a bottle and began using it. After trying several things I heard of your remedy, Catarrhones, and procured a bottle and began using it.

A Fine Display. No doubt Nova Scotia, Ontario, and British Columbia, will compete for a large quantity of fruit for some years than New Brunswick, but the fruit industry of this province will develop rapidly. There will be little room in finding a market for our apples. I am told by experts that the New Brunswick apple is equal to any that is shown in any part of the world.

The display of apples here is equal to any that is shown in any part of the world. There are fruit dealers here from England who are looking over the exhibi-

NEW BRUNSWICK FRUIT SHOW, FINEST EVER HERE, OPENED LAST EVENING

Continued from page 1. blem of utilizing the fruit lands of the province on an extensive scale. The company has acquired 80 acres of land at Burton on the St. John River, and is converting it into orchards with the intention of eventually cutting it up into small holdings and selling them to settlers. The company intends to start an advertising campaign in Great Britain this winter with the object of making a market for apples and bringing out settlers for its fruit lands. Its exhibit, which is in charge of A. C. Parker, was picked from some of the old trees on the estate.

In addition to the large exhibit in the rear of the fruit lands, the department of agriculture has special exhibits which it collected in Carleton, Sunbury, Albert and Queens counties. Private exhibits are very numerous, coming from ten of the counties of the province, and representing all varieties and classes of fruit.

There is a fine exhibition of jellies and also of small fruits, preserved in jars. On the right of the entrance there is a display of spraying machinery, pruning and grafting implements, and a collection of nursery stock. On the left of the entrance the department of agriculture have fitted up an information bureau, supplied with literature setting forth the possibilities of the province in the way of fruit raising.

The exhibit has been tastefully decorated, and with the streamers of bunting and gay little flags overhead, and the long rows of tables bearing their lustrous and many colored fruit, the scene is very pleasing, and there should be a large attendance of people during the four days the show will be in progress.

The admission is only ten cents. The government makes a grant of \$500 to the New Brunswick Fruit Growers' Association, under whose auspices the show is held, but in view of the importance of the show as a means of advertising the province, it is hoped there will be a larger attendance than last year.

The show was formally opened last evening by Dr. Landry, the commissioner of agriculture, assisted by Hon. Robert Maxwell, Prof. W. S. Blair of the MacDonald College, and C. N. Vroom, President of the Fruit Growers' Association.

Better Than Last Year. C. N. Vroom, President of the Fruit Growers' Association, presided at the opening of the show. In opening the proceedings he made a brief speech, and promised that the orators of the evening would not detain the audience long. "The exhibits," he said, "were larger than at last year, and the fruit was somewhat better. During the year there had been a marked increase of interest in the fruit raising possibilities of the province, and this augured a great advance in orcharding in the near future."

The association had increased its membership, and improvements were noticeable in all the methods employed in orcharding. The disposition of the fruit raisers to take advantage of their opportunities was manifest in the quality of the exhibits.

"The association would not be able to hold such a show without the generous grant from the provincial government. But the interest displayed in fruit raising by the government, announcing the intention of the possibility of the province, and advertising its resources," Mr. Vroom, minister of agriculture, Dr. Landry, commissioner for agriculture.

Dr. Landry's Address. On rising, Dr. Landry, who was welcomed with applause, said he was pleased not only because he had been requested to speak at the opening of the show, but also because the chairman had decided that the speeches should be brief.

He did not think it was necessary for him to dilate on the merits of the exhibits—they spoke for themselves.

The fruit industry in this province was only in its infancy. In some districts farmers had been cultivating orchards for years with success, but not on a large scale. It was only a few years since the provincial government had begun to encourage the fruit raisers, and the old government started the illustration orchards, and these had served to direct attention to the possibilities of the province, and advertised its resources.

bits and will probably become interested in putting New Brunswick fruit on the market in England. I have no doubt that in a few years we will be exporting as many apples to England as some of the other provinces. The show is something of which all our people may be proud. The entries show that the exhibition is patronized by fruit growers from nearly all sections of the province. We have recently had exhibitions at Fredericton and Chatham, and other private exhibits are very numerous, coming from ten of the counties of the province, and representing all varieties and classes of fruit.

In conclusion the professor said the people of the province when to be grateful to the government, the association and Mr. Tume for making such a splendid show possible. He great weight he attached to a close Mr. Vroom said the object of the show was to convince the people that their province is a good one for fruit raising, and that we don't put up our fruit as well as they do in the west. However, we are learning, and we will soon be well known in the markets of the world.

Champion Spender IS POOR MAN AGAIN. Tulsa, Okla., Oct. 30.—William H. Roesser, champion spender of this section was the other day a man of great wealth, but is now a bankrupt with liabilities doubling his assets. Yet he still has hopes. After burning out a vast fortune in the most extravagant way he has some oil leases in the new Cleveland field and there is no telling when he will make a "strike" that will enable him to resume his expenditures where he left off.

Roesser is thirty-five years old and comes from a family of oil people. His father before him made a lucky strike or two and he also had a reputation as a spender. When William Roesser graduated from the University of Oklahoma he was a very rich man. He was taking him and some friends over the country in a private car.

William first tried his hand in the Beaumont field, but failed to make headway. He arrived in Tulsa in debt but got some leases in the Glenn Pool field that almost immediately made him wealthy. Then he started out to spend the money.

Roesser's most magnificent home this city boasted, but did not like its furnishing, which was of mission style. He would not sell it nor that there was nothing else in the neighborhood worth seeing, and that the Grand Trunk Pacific would pass through a region of little interest from the point of view of the tourist or mountaineer.

There was no mistake about Mount Robson. It is without doubt, as was stated by one of the most travelled and skilled mountaineers of the day, Dr. Norman Colbie, one of the most eminent mountaineers in the world, whether seen from the south, the view that is most familiar, or from beautiful Berg lake, it still stands supreme in the hundred mile circuit of the great mass of all sides were found mighty snowfields, peaks, widespread snowfields, huge icefalls, rushing torrents, waterfalls, flower-cold meadows and vast stretches of dark pine forest. Many of the peaks were named by the surveyors, but they are legion, and it will be many years before they are familiarly known as individual mountains.

It is speaking of the Robson Glacier, which lies on the east side of the monstrous mountain, Mr. Wheeler said: "It struck me with amazement that anything so stupendous, so superb so unimagined should exist. As our feet flowed the great river of ice ever clearly portrayed. Directly opposite from the mass, it's outline clear from the base to summit for fully 8,000 feet. From the beautiful meadows at the head of Resplendent Valley, twenty-five peaks were counted all unknown to the Canadian mountain scenery were everywhere."

At the summit of the Yellowhead Pass, Mr. Wheeler's party erected a monument defining the boundary between Alberta and British Columbia at the intersection of the Great Divide. On the huge post set up, which is surrounded by a big stone mound, are carved the words British Columbia, on the west face; Alberta, on the east face; and on the south, 3,727.92 feet, being the altitude of the summit at the point where the post is set.

To buy for a trifling amount, can be had with the original cost of the machine, and the offer was accepted. Roesser had a penchant for diamonds and he gathered one of the rarest collections of blue stones to be found in this country. It is said that his collection of diamonds at one time represented a value of \$100,000.

On one occasion Roesser bought an automobile racer of one of the best makes. At the Tulsa race track he tried to break an established speed record, and because the machine did not do it he was preparing to send it to the junk heap when a friend offered

Another story told of Roesser is that he was once making a fast automobile trip across Kansas. That he might have the right of way he took along an unlimited supply of silver money, and when he saw that some farmer or other person was likely to block his journey he would shout, "Get out of the road; I'm in a big hurry!" and as he swept by the astonished and oftentimes indignant occupant of the slow-going vehicle he would toss him a few dollars as a bribe for his offense.

How Robert Maxwell, the next speaker, said the commissioner had covered the ground so well that there was little for him to say about the attitude of the government to the fruit industry. But he was glad as a citizen of St. John and on behalf of his fellow citizens to welcome the fruit growers to St. John. He felt the fruit growers were doing much to arouse the people to the possibilities of the province, it was only within a year or so that anybody suspected what the fruit growers could do. After the show last year he had seen many people who were simply thunderstruck by the magnificent nature of the display.

Scientific Farming. Continuing his speaker said that the reason why fruit raising was that the way of fruit raising was that the had been a lack of co-operation. The Fruit Growers' Association was giving the people an education in the value of mutual aid and advancement. Farming was becoming a scientific industry. The farmer realized that the greatest amount of knowledge and organization was needed in his province.

Through the efforts of the public authorities and such organizations as the Fruit Growers' Association both the knowledge and co-operation were being supplied, and a new era was being opened up for the people of the province.

In conclusion Mr. Maxwell complimented the fruit growers for their magnificent exhibit.

Prof. W. S. Blair, of MacDonald College, said the association was congratulated on the excellence

SUFFERING FROM ECZEMA

Unnecessary White Poslam, the Perfect Remedy, Quickly Heals.

Eczema, that many formed skin malady, which authorities assert is usually caused by a disordered diet, never proves fatal and is generally found in those who are otherwise healthy. Poslam has probably accomplished more remarkable cures of this and other skin diseases than any remedy known. It is applied directly upon the disorder, stops itching, once and clears and heals the skin, restoring it to perfect condition. The great majority of cases yield in from two to four weeks. Acne, tetter, barbers' itch and similar aggravating troubles are likewise speedily cured. Merely a small quantity of Poslam used for clearing the complexion, removing eruptions, pimples, rashes and blemishes is sufficient to show what it can do. Poslam is sold for 10 cents by Chas. R. Wasson, Clinton Brown, F. W. Munroe and all druggists everywhere. For free sample write to the Emergency Laboratories, 32 West 20th St., New York City.

Poslam Soap, medicated with Poslam is the best soap for your skin. Antiseptic, prevents infection. Large cake, 25 cents.

SPENT SUMMER IN ROCKY MOUNTAINS

A. O. Wheeler, Director of Alpine Club of Canada Returns to Vancouver After Delightful Trip.

A. O. Wheeler, F. R. G. S., director of the Alpine Club of Canada, has just returned to Vancouver from a summer spent in the Canadian Rockies, in the vicinity of the Westward Pass, and is greatly impressed with his trip.

In an interview with Mr. Wheeler, he stated: "It has been the general impression that the Rocky Mountains of Canada attain their greatest average height not very far north of the boundary line. True, of late years much has been heard of Mount Robson which dominates the region of Yellowhead Pass, but the popular notion was that there was nothing else in the neighborhood worth seeing, and that the Grand Trunk Pacific would pass through a region of little interest from the point of view of the tourist or mountaineer."

There was no mistake about Mount Robson. It is without doubt, as was stated by one of the most travelled and skilled mountaineers of the day, Dr. Norman Colbie, one of the most eminent mountaineers in the world, whether seen from the south, the view that is most familiar, or from beautiful Berg lake, it still stands supreme in the hundred mile circuit of the great mass of all sides were found mighty snowfields, peaks, widespread snowfields, huge icefalls, rushing torrents, waterfalls, flower-cold meadows and vast stretches of dark pine forest.
