The wonderful success of the United tates emigration agents has overrun that country with Europeans in search of homes and work, and the disposal of constantly arriving thousands has become a problem in New York. "What shall we do with them?" is the question of the hour. Every trade and employment is well supplied, and there is no work for thousands of those already in the country. The agents who send emigrants with the assurance that work may readily be obtained are loudly denounced. The situation is clearly stated | Tea, &cin the following New York telegram to a Boston paper:

The Paily Tribune.

J. L. STEWART, EDITOR.

The swindling agents who induce people to leave the old countries and come to America are more successful at this time than they have been before in a long Cauliflower do time than they have been before in a long time. This morning a very large number of emigrants were at Castle Garden in a very destitute and disconsolate condition. One of the emigrants who came here from London said: "The agents came through our town and told us that we would find all the work we wanted here, sold us tickets, and two hundred of us started. He told us we would find another agent New Queen Onion-He told us we would find another agent here who would give us work, and we can't find him. It took all our money to get here, and now what shall we do?" The other Swedes shall we do?" The other Swedes were in the waiting room and standing about the door. The Cuba brought 311 emigrants, the Columbia 430 and Westphalia 760. On Tuesday 3800 landed. There are some Swedes, Scotch and Irish, but most of them are Germais. A new were met by friends, but nine-tenths are strangers in a strange land. They had no money; knew not where to go, or what they should do. Like thousands who have preceded them, they e nigrated under false representations of scheme ing agents, who, having sold them pas sage tickets, disapp a ed.

It is a curious fact that New York is thus overrun with immigrants for whom there is no work while our official agents are scouring Europe fo emigrants to come and take possession of land and houses. Wouldn't an ent secure a larger number by merely ent who could go among the thousands of newly arrived people there and found it weighed over three and one fifth ffer them homes and work in New probability is that he could get fully as sirable people as are usually brought

from Europe.

The glut in the labor market in the States is also shown by the return of Canadians who have vainly sought to bet-ter their fortunes there. This is more articularly noticeable in Quebec. The The St. John's News says:

A Serious Fire.

About 7 o'clock last night an alarm of fire was sounded from No. 3 Engine house. The fire broke out in a barn occupied by Mr. John Smith, grocer, corner of Union and Coburg street. This building was used as a store-house and had a large quantity of inflammable materials in it, such as, baskets, barrels, &c.
