

WOMAN INVADES TRAPPING FIELD

TO RELIEVE MONOTONY OF WESTERN WINTER.

Mrs. Chamberlain, of British Columbia, a Pioneer in Feminine Enterprise.

In the past, woman's connection with the fur trade has been limited to the finished product—to adorn or to be adorned. But Mrs. William Chamberlain, the wife of a rancher in the country north of Invermere, British Columbia, has brought about a revolution by introducing herself into the fur industry at the very initial stage. She has proved her prowess as a hunter and trapper adequately, and incidentally very profitably.

In the early days of last November, finding the winter days closing in, work on the ranch shutting down, and little employment and much monotony in sight, she bethought her of a novel feminine enterprise, to both pass the time and aid in combating the high cost of living. She determined to trap.

An investment of only \$30. Investing the sum of thirty dollars in traps, she obtained a license for a territory six miles in length along the bank of the Columbia River, covering the overflowed lands. Here she set out her traps, some sixty in number, and made her solitary rounds daily, leaving the shack at break of day, lurching in the open, and returning after an exhaustive day's tramping at night.

She was eminently successful, and the arduous work gave most satisfactory results. Seven hundred muskrats were included in her season's catch, which also contained a number of weasel and mink. When spring broke, in the first days of April, she ceased her labors, having received as the result of the season's work the sum of eighteen hundred dollars.

Woman has invaded the trapping field and this year, doubtless, many other women, fired by this success, will be out stringing their lines of traps.

The Deed's Creature.

The great dramatists of Shakespeare's day, though all of them inferior to him in man respects, had all more or less of his profound and passionate interest in human life and character. They filled their scenes with imaginative beauty. They also filled them with human truth. Even when they carried their personages through the most bloodcurdling adventures, they realized that what counted was the living soul and not the mere melodramatic climax. They were honest and careful, and inconsistent, as Shakespeare himself was, when they could throw a flash of blinding light on the deepest motives of the spirit and make them stand out so that they never forget them.

In a minor Elizabethan play a woman is led by vanity and selfish folly into instigating murder. When the terrible act has been performed and she for the first time realizes what it means, she cries out in agony, "I am the deed's creature!" The deed's creature! Has the sequence of human wickedness and human suffering ever been expressed with more penetrating brevity? The deed's creature! No longer free to live and move and breathe happily in the comfortable light of heaven, but chained and bound eternally in the clinging fetters of that inescapable, remorseless fate. The deed's creature!

Most of us do not habitually commit, or instigate, murder, and it might seem that the heavy weight of such a tragic phrase could not descend upon us. It does, just the same. It is not only the murders, the great tragic actions, that enslave and tyrannize. The little words and gestures of today and yesterday, so easily forgotten unless some striking chain of consequence attaches to them, may have their significance also and their vast, enthralling force. Every hour, every minute, we are the deed's creatures, some deed's creatures; perhaps the creatures of some ugly deed, hardly realized at the moment, but casting its close grip about us until we feel that we would give all we have to shake it off, and cannot.

Since we are to be the deed's creatures anyway, let us see to it that our deeds are such that slavery to them may not be intolerable.

No Need to Be Told.

A lad of fifteen was driving along a country road, taking a load of calves to market, when he chanced to meet a company of young folks who were evidently on a pleasure jaunt.

The young men of the pleasure-party thought that they would have some fun at the expense of the farmer's boy, and commenced to moo like calves.

But their merriment was of short duration, for, without hesitation, as the vehicles were passing, the country lad called out to his would-be tormentors:

"It's all right! I know what you were before!"

A wireless gramophone has been constructed for the transmission of music to vessels at sea.

No. 9725—Ladies' Dress. Price, 35 cents. Two styles of sleeve; with or without loose side panels; 37 or 35-inch length from waistline. Cut in 7 sizes, 34, 36, 38, 40, 42, 44 and 46 ins. bust measure. Size 36 requires, with side panels, long sleeves, 3 1/2 yds. 40 ins. wide, or 2 1/2 yds. 54 ins. wide; without side panels, without cape collar, 2 1/2 yds. 54 ins. wide. Width around bottom, 1 1/2 yds.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

Minard's Liniment Relieves Distemper

Novel Way to Fumigate Fowls.

Henry Windahl, of Indiana, has invented what he calls a "sanitary chicken roost," which is guaranteed to dispose of the insect parasites that afflict poultry, while incidentally killing bacterial germs.

His idea is to attach beneath the roost-perch an ordinary preserving jar, with a screw top, the receptacle being filled with a strong disinfectant, and from it to conduct a thick wick all along the top of the perch and along the bottom of the latter. The fluid disinfectant follows the wick, keeping it saturated.

Along the top of the perch the wick runs in a deep groove, so as to keep it out of the way of the chickens' feet, but along the bottom it is stretched without a groove.

Evaporation of the fluid, while the fowls are roosting, gives a sense of extreme discomfort to the insects hidden among their feathers, causing them to drop out and seek safety on the under side of the perch. There, always seeking a hiding place, they crawl between the wick and the perch, and the disinfectant kills them.

The lid of the jar (which has a hole for the emergence of the wick) is permanently fastened beneath the perch. When the jar needs refilling, it can be unscrewed at a moment's notice. The inventor prefers a series of short roost-perches, with a jar beneath the middle of each.

Pacific insects not only make chickens uncomfortable, but impair their vitality and reduce egg production. Hence the economic importance of Mr. Windahl's idea.

The antennae masts of two new Japanese radio stations consist of reinforced concrete poles 660 feet high.

The Land of Fire and Ice.

Geological map of Iceland by Dr. Thoroddsen, who has spent many years on the work, gives much information about one of the world's most wonderful islands which few visitors ever see.

An example of the strangeness of Iceland is furnished by the volcano Katla. This is buried under immense snow fields, but from time to time its fires burst through the glittering blanket, and then such floods are poured from the melting ice that a great stretch of country between the volcano and the sea is inundated and huge masses of ice are carried out into the ocean.

It is unsafe to choose the territory lying between Katla and the sea, so suddenly come the floods.

CHILDHOOD AILMENTS.

The ailments of childhood—constipation, indigestion, colds, etc.—can be quickly banished through the use of Baby's Own Tablets. They are a mild but thorough laxative which instantly regulate the bowels and sweeten the stomach. They are guaranteed to contain no harmful drugs and can be given to the youngest baby with perfect safety. Concerning Mrs. Alcide Lepage, Ste. Beatrix, Que., writes:—"Baby's Own Tablets were of great help to my baby. They regulated her bowels and stomach and made her plump and well." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Grateful Tribute.

Great Britain has done a fine thing in deciding to inter the body of an unidentified soldier in Westminster Abbey alongside of those of her kings, statesmen, poets and distinguished warriors who have there found their last earthly resting place, says the Editor of the Philadelphia Ledger. In no more effective and impressive manner could the debt of the nation be acknowledged, for the grave will stand forever as a memorial that the empire realized and appreciated the sacrifice of those who did not only in the defense of its liberties but those of the world as well.

Westminster Abbey is the resting place of those who have contributed in the greatest measure to the well-being of their country. Nevertheless, it contains few memorials which mark the existence of those who died to better purpose than the grave of this unknown soldier, who rests unknown but not unhonored amid the ashes of the elect of the earth.

Use for Chinkers.

When the householder's furnace gets out of whack, there is usually reason to suspect an accumulation of chinkers in the frepoot. It is rather a job to clear them out. Now, however, a practical use has been found for these exasperating things, representing incombustible material in the coal. They are turned to account for building blocks.

For this purpose they are crushed and mixed with sand, lime and cement, the material thus prepared being molded into blocks. Such chinker blocks are used for walls, cellar floors, warehouses, garages and pavements. They are cheap or than brick, and being made in larger sizes, facilitate quick construction. They take plaster on the interior and stucco on the exterior of buildings.

In a humid climate chinker blocks are specially desirable because they withstand moisture and do not drip, as brick does sometimes, on the inside of buildings.

Gasoline is Dangerous.

Gasoline fumes came in contact with a lighted lantern. Ten buildings destroyed, loss, \$250,000.

Gasoline is dangerous. It is one of the most rapidly volatilizing fluids. One pint of gasoline will impregnate 200 feet of air and make it explosive. Many serious fires have been started from the careless use of gasoline.

Gasoline should only be used in the open air, and, clothes, after being cleaned with it, should be hung outside to allow it to evaporate. It should always be kept in tightly closed metal cans, never in glass bottles or jars. The latter are liable to breakage and the consequent freeing of the dangerous fumes when open flame may ignite them and cause a serious fire.

Living Them Over.

What good comes of living them over. All the wearying, wearing things? Those phantom shapes from the past, that hover

So oft about us on night-black wings, With their horny thrusts and their cruel stings?

Who is stronger for bearing a burden Twice as heavy, or twice as far As need requires? Lay it down. A gerdoun

Is beckoning you from Hope's beaming star.

But, oh! the joy of living them over—The friendly bloom and the kindly smile

That, like blooming roses or wind-blown clover,

Cheer with their fragrance the weary mile,

And warm and strengthen our hearts the while.

For hearts grow stronger when

Lead to the present their afterglow

Of softened light and we catch the measures

Of the old-time melodies, sweet and low.

Then live them over—the joy and gladness

Of all that has made the past life bright.

Let their memories banish the care and sadness

That signal and sigh from a by-gone night.

And sear the soul with their canker-blight.

And as ever the changes of time shall reach us—

Its joy and blessing; its pain and fret—

Be pleased, O Lord, in thy love to

vanish us

How to remember and how to forget.

RICH, RED BLOOD NECESSARY TO HEALTH

When the Blood Becomes Weak and Watery a Tonic is Needed to Build it Anew.

Why are we being continually told that good health-giving blood must be bright red? What has color to do with the quality? Just this—the oxygen in the air is the great supporter of all organic life. One function of the blood is to take the oxygen from the air—which it meets in the lungs and deliver it to the tissues of the body. When the blood, filled with life-sustaining oxygen, is sent out by the heart, it is bright red. When it returns, impure and deprived of oxygen, it is dark.

You will see, therefore, that there are two prime requisites of health, pure air and bright red blood—the pure air to furnish the oxygen, the red blood to carry it where it is needed. Dr. Williams' Pink Pills make your blood rich and red because they increase its power to carry oxygen, actually making it so much more able to carry increased life and strength to every corner of the body.

Pale, anemic people whose nerves are on edge, whose cheeks are pale, and who tire out easily, should try Dr. Williams' Pink Pills, and note the steady improvement that follows their use. A case in point is that of Mrs. J. P. Rolston, South River, Ont., who says: "About two years ago my system was in a badly run down condition, and I kept growing worse all the time until I could hardly do my housework. I had severe headaches, and pains across my back and under my left shoulder. I did not sleep well and would feel just as tired when I got up in the morning as when I went to bed. Life seemed a burden. I had taken doctor's medicine for a long time, but it did not meet my case, at least it did me no good. Then as a result of reading about Dr. Williams' Pink Pills I decided to try them. When I had taken a couple of boxes I felt much better, and when I had taken five boxes more I felt that I was again a well woman. I have not since felt any return of the trouble and I advise all women who are broken in health to give Dr. Williams' Pink Pills a trial."

These pills are sold by all medicine dealers or will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50, by The Dr. Williams' Medicine Co., Brockville, Ont.

Power of Jaws.

The U.S. Bureau of Standards has ascertained that, when you eat, the pressure exerted by your jaws is more than eleven tons to the square inch.

No wonder, then, that your teeth are made of a material almost indestructible except by decay. A sound tooth comes pretty near to being the hardest thing in nature, and the most enduring.

It follows that artificial teeth must be made of an extremely tough quality of porcelain. The material dentists use for fillings nowadays is usually either a cement of great hardness or a metal composition that is mostly silver, and which may contain zinc, copper and tin.

The fillings are liable to break down under the tremendous chewing pressure. Various materials used for the purpose have recently been tested by the U. S. Bureau of Standards, and the conclusion it draws is that a standardization of dental cements and amalgams is needed in order that their relative resistance to wear may be definitely known. It says that too much copper in fillings discolors the teeth.

AUTO SPARE PARTS

for most makes and models of cars. Your old, broken or worn-out parts replaced. Write or wire us describing what you want. We carry the largest and most complete stock in Canada of slightly used or new parts and automobile equipment. We ship C.O.D. anywhere in Canada. Satisfaction or refund in full our motto. Salvage Parts Supply, 555-551 Dundas St. W., Toronto, Ont.

Western Farmers Building Silos.

It is to be anticipated that before many years have elapsed almost every farm in the Canadian prairie provinces will have its silo. The growth of the dairy industry would naturally bring this condition about in course of time, but the movement is being expedited by the success farmers are having in growing sunflowers. Small fields of from three to thirty acres have been planted in various parts of the three prairie provinces of Canada. The yields are proving more satisfactory than the farmers generally dared to hope, and each acre yields on an average from fifteen to thirty tons of ensilage.

Many farmers have erected silos on their farms during the summer to take care of this crop, but most of them have under-estimated their requirements and will have more crop than they can put in their silos. Sunflower silage is due for a more extensive trial this winter than it has had before. The results in previous years have been very satisfactory but only comparatively few farmers have grown the crop for silage previous to this year. If in its more extensive use the crop proves to be as satisfactory as it has already proved in a few cases where it has been tried, it is safe to say that in a few years the farm without a silo will be an exception in Western Canada.

Since last year's results have become known, considerable interest has been shown in silos and ensilage in Western Canada and several hundred silos have been erected during the past summer. Typical of this movement is the Carleton district in Southern Alberta, where eight silos have been erected this year and where about fifty acres of sunflowers were planted. The crop has proved so successful that it is predicted that one hundred silos will be built in the district next year and more than a thousand acres of sunflowers planted.

Similar plans are being made in other parts of Western Canada, and the already rapidly growing dairy industry promises to grow much faster with the general acceptance of the sunflower as a silage crop. Another evidence of the value of sunflowers as a forage crop will be the big gain in finished steers. Many of the larger livestock raisers are growing sunflowers and erecting silos for this purpose. Thus will be considerably increased the finishing areas of Canada, which, hitherto, have been somewhat restricted, compared with the large feeding areas throughout the country, and the livestock industry in the West will be placed on a sound basis.

Minard's Liniment Co. Limited.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for the every day ills and accidents of life I consider it has no equal.

I would not start a voyage without it if it cost a dollar a bottle.

CAPT. F. R. DESJARDINS.

Schr. "Stork", St. Andre, Kamouraska.

Taking No Chances.

An American paterfamilias patiently followed for several weeks a wife and daughter who were more keen than he was about visiting Roman ruins. At last he rebelled and laid down this rule:

"I'll go with you to see any buildings that still have roofs on 'em, but as to the rest, I say, let bygones be bygones."

MONEY ORDERS.

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Bermuda celebrated recently the 300th anniversary of the founding of its House of Assembly. It has the distinction of being the oldest self-governing British possession.

BITS OF HUMOR

FROM HERE & THERE

Missing.

Wife (after their two weeks' outing)—"That was a delightful trip we had up on the steamer. Can't you still feel the roll? I can."

Hub—"No, the landlord has mine."

Very Candid.

Mrs. Jones was entertaining some of her sons little friends to a birthday party.

"Willie," she said, addressing a six-year-old who was apparently enjoying a plate of cold beef, "are you sure that you can cut your own meat?"

The child, who was making desperate efforts with his knife and fork, replied: "Yes, thanks, I've often had it as tough as this at home."

Father Was Once a Boy.

Johnny liked ice cream, but he drew the line at turning the freezer. One day when his mother returned home she was agreeably surprised to find him working away at the crank as though his life depended on it.

"I don't see how you got him to turn the freezer," she said to her husband. "I offered him a dime to do it."

"You didn't go at it the right way, my dear," replied her husband. "I bet him a nickel he couldn't turn it for half an hour."

Minard's Liniment For Dandruff.

The actual process of making baskets has altered very little since the earliest times, only very simple tools being used.

MOTHER!

"California Syrup of Figs"

Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

Mr. Herbert Osborn

Tells How Cuticura

Healed His Wife

"My wife began to be troubled with itching and burning of the palms of her hands and the soles of her feet. Later the skin cracked and became inflamed, making walking or even standing very painful and preventing sleep at night. Later it became necessary to bandage both hands and feet."

"She was treated but obtained no relief. She saw an advertisement for Cuticura Soap and Ointment and sent for a free sample. She bought more and after using two boxes of Cuticura Soap and two boxes of Cuticura Ointment she was healed." (Signed) Herbert Osborn, 135 Sherbrooke Ave., Ottawa, Ont., Sept. 2, 1919.

Cuticura is ideal for every-day toilet use. Soap to cleanse and purify, Ointment to soothe and heal.

Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion, Canadian Depots: London, Limited, St. Paul, Montreal, and Cuticura Soap without charge.

ONLY TABLETS MARKED

"BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

BAYER

M.D.

The name "Bayer" identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer!"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacid of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.
