

Council Shorts

Money, Motions, and Memo's

By Elwood Johnson Student Council Reporter

Students' Council has invested another \$335 in CUS. The monies were required to cover a deficit incurred in the banquet for Congress delegates, to pay various Western Regional Seminar obligations, and to pay a small debt outstanding at the national office since last year.

Also in a financial vein, Doug McTavish reported a net profit of \$381.77 on "The Travellers" show.

Three vacancies on the House Committee will remain empty until the 40-odd applications are process-

ed. Dave Cruikshank proved adept at presenting half-finished motions.

The chair of the science rep is still vacant. However, the personnel board has been directed to select a returning officer and two assistants to arrange for an election.

Low-cost memo sheets are to replace the inordinate number of high-cost letters in an effort to reduce office waste.

At times the meeting ground to a near stand-still as it became entangled in fine points of logic and

principle. Council agreed to pay one-half of the travel expenses for sending the cheerleaders to UBC this weekend. Council will also pay one-half of the Dean of Women, Mrs. Sparling's expenses. UAB will contribute equally.

Jubilaires, the UN Club, and the Amateur Radio Club gained recognition in principle as Students' Union clubs.

Council was treated to a reading of Department of Transport regulations regarding amateur radio. Representatives received the discourse quietly.

Cameron Library Idle, Transfer Complete Soon

By Valerie Mae Becker

"Planned with graduate research in mind," the new Cameron Library stands idle.

Started in July, 1962, the library was originally to open in September. However, due to the late arrival of furniture and constructional "touch-ups," the actual move from Rutherford Library to Cameron is now scheduled for November 1.

According to Bruce Peel, library director, the move should take from two to three weeks. MED MOVED FIRST

Rutherford Library is to be emptied in sections, with the medical library being transferred first. It is hoped that during this time no department will be closed for more than two days.

Designed by Mr. D. L. G. Macdonald and Mr. W. Wood, the new graduate library has been received with mixed reactions. "You can't see the thing—it's just stuck there." This comment was made by a member of the arts faculty last week.

"LOOKS LIKE HELL"

According to Professor Pocklington, professor of political science, the library "looks like hell from the outside" and "if the delay means inconvenience to students and faculty, it's unfortunate." One student commented that "it just doesn't belong here." Still others thought that it adds something to the campus.

Squeezed between the ancient remains of the North and South Labs, the Cameron Library does look a bit odd, but Mr. Peel explains that the library was built with the understanding "that these two labs would be torn down."

MORE IN 1975

By 1975, if the library continues to expand at its present rate of 50,000 volumes per year, two wings will be added.

Although primarily intended for the use of graduates, the Cameron Library will be open to all students. The old Rutherford Library, after a two to three month renovation period, will become an undergraduate library.

NEW FEATURES

The Cameron Library is to be operated far differently from Rutherford. A new innovation is the "open stack" system, which allows students to browse through the books. Individual study tables, windows above the eye-level of seated students, smoking lounges, typing rooms, and moveable walls are all new features of the building.

A Commissioner will be employed to check all outgoing books, once the library has been opened. "This is a new idea, begun by many American libraries," says Mr. Peel, "and is a fine safety measure to be initiated on over-due books."

Jubilaires Meet

The Jubilaires Club, the group that puts on Varsity Varieties each year, held its first meeting Sunday at the Wauneita Lounge.

Glen Reid, president, introduced the in-coming executive, and also introduced the heads of the show: Wes Stefan, producer, Bill Somers, musical director, and Phil Silver, director.

For further information contact Glen Reid at 599-6326 or Susan Semeniuk at 433-0402.

WANTED PROFESSIONAL "EXPLORERS" FOR THE DYNAMIC DECADES

"The project was daring and visionary and became the largest industrial plant in Alberta", wrote a leading business writer about Chemcell's fascinating role in Canada's post war growth.

To-day Chemcell urges its researchers, chemists and engineers to put liberal measures of imagination into their plans . . . and to use bold action in making them work.

This go-ahead spirit is a vital part of Chemcell's philosophy.

It offers stimulating outlets for graduates . . . a challenge to those who seek that extra ingredient of adventure in their future as chemists; chemical, mechanical and electrical engineers and engineering physicists.

A 430-acre site at Edmonton, Alberta comprises three plants to make organic chemicals including alcohol, ester and ketone solvents, acetic acid,

glycols, pentaerythritol and formaldehyde, another to produce cellulose acetate flake and a third to make acetate and Arnel yarns and fibres.

Noted for its integrated operations and, strongly allied with leading companies in the pulp, textile and plastics industries, Chemcell is able to offer you wide-open opportunities for advancement in research, product development, process engineering, plant design, important phases of production and sales.

Sound professional growth in the dynamic decades ahead can be yours at Chemcell. Let's discuss it.

Write Canadian Chemical Company, Department A, 1155 Dorchester Boulevard, West, Montreal 2, or to the Personnel Department, Canadian Chemical Company, P.O. Box 99, Edmonton, Alberta.

Representatives of the Company will visit this Campus for interviews on November 14th and 15th.

SERVES THE CHEMICAL WORLD!
