

NATURAL HISTORY, TORONTO REGION

5. *Equisetum variegatum*, var. *jesupi* (?). This occurs locally, but is quite common in certain localities—at Toronto Island, along Humber River, Toronto, and at one locality in Eastern Ontario near Madoc. Found in damp sand.

6. *Equisetum scirpoides*, Michx. Appears to be the second most common *Equisetum* around Toronto. It is to be found growing on moist mounds in low woods.

LYCOPODIACEAE.

1. *Lycopodium selago*, L. This species, as far as reported, has been found only in Northern Ontario in low rocky woods.

2. *Lycopodium lucidulum*, Michx. (Shining Club-moss). Frequent in High Park, Toronto, but rapidly disappearing.

3. *Lycopodium inundatum*, L. (Bog Club-moss). Found mostly northward along the boggy shores of lakes and ponds.

4. *Lycopodium annotinum*, L. (Stiff Club-moss). Reported common in woods, Peel Co. (White); also common northward.

5. *Lycopodium obscurum*, var. *dendroideum*, D.C. Eaton (Ground Pine). Found occasionally in rich woods. Common northward.

6. *Lycopodium complanatum*, L. (Ground Pine or Trailing Christmas-green). One plant found at Credit Forks, Ont. (White). Common northward.
