

Wayside Gleanings

By W. G. Orvis, Field Representative, Farm and Dairy.

School Exhibits

DURING the last few years much attention has been given by many Fair Boards to encouraging school children to exhibit different articles of their handiwork. The De-

Fire Extinguishers in Barn.

Every year reports come in of barns being burned and stating that the blaze was started by the upsetting of a lantern, or from some other source very small and at the time easily extinguished if the means were at hand. Mr. R. A. Penhale, of Elgin county, has provided a suitable means for controlling such fires in their initial

U.S. Milk

The situation with regard to milk produced in the United States is developing rapidly. The production of milk supplies a large part of the milk trade, according to say: "The price of milk has increased 15 per cent. and for the six months ending last month we have received for our feed, labor, and other expenses considered at this price. The market price of butter is demanded for the output of proportion may be reasonable sold to cheese factories."

In last week's Dairy, reference was made to the investigation of the federal authorities surrounding the milk for city investigation. The complaint received from the city causes the milk to be against the violation of the investigation. The Department
