Build a Better Silo and Save Money

BUILD the kind that will keep your ensilage always at its best. Build the kind of silo that does not have to be repaired or painted every other year. Your dairy herd will show its appreciation in the additional quantity of milk it gives. The best silo, by keeping ensilage perfect, increases output and soon pays for itself.

A Concrete Silo

is the dairyman's surest dividend payer. It keeps ensilage in just the right condition, and does not permit it to dry out or get mouldy. A concrete silo cannot leak, rot, rust or dry out. It has no hoops to replace. Requires no paint and needs no repairs during an ordinary lifetime.

Send to-day for this free book, "What the Farmer Can Do With Concrete." It tells how to build a concrete silo and many other things on the farm that will save many dollars.
