THE CANADIAN MINT.

One of the Most Interesting Institutions in the Dominion.

The pince where money is made or what is perhaps not becarde where it is created has always appeared as most secretary mysterious things do to the general reader. In Canada the Mint is located in Ottawa. Here are made our gold and silver coins—the real money of the country. The paper medium of exchange is in the hands of the engraving firms and one does not see any trace of it in the Sussex Street establishment.

firms and one does not see any trace of it in the Sussex Street establishment.

The Mint is open to visitors after certain formalities have been complied with. The essence of these, with every thing connected with the institution is punctuality.

Unless the workman arrives exactly on time he finds himself locked out. It is necessary for him to telephone in and get a written order, before he is allowed to enter. Prior to the worker beginning his day he must change his clothes, put them in a locker which is locked and donn special garments supplied by the Mint. The employees are not permitted to leave for dinner, therefore each department has a kitchen of its own, which supplies the midday meal to the staff. The metal to be used for the day's work is weighed out in the morning and no employee of the Mint is allowed to leave the building till the weight of the coins madand the material left over tally exactly with the weight of gold and silver handed out in the morning. Aside from all this, each member of the staff is locked in his or her department and is not permitted, even in case of illness to leave without a written permit. Thus, in the Mint chances for dishonesty are reduced to a minimum.

The concluding process of weight.

chances for dishonesty are reduced to a minimum.

The concluding process of weighing and automatically packing the coins into packages requires the most finely adjusted machinery of all.

In this department is a scale so delicate that it had to be mounted on a concrete pier, sunk in the ground Cown to bedrock.

This machine automatically weighs

cown to bedrock.

This machine automatically weighs the coins, throwing them into three different compartments, to the centre go the periest ones, those under or overweight are deflected to the other

A Rising Financier.

A Rising Financier.

The old man was perched upon a high stool, figuring up the day's sales of dry goods, greceries and hardware, when his son came in with a rush "Say, pop," exclaimed the young man, "if I can buy a \$300 horse for \$150 will you take a chattel mortgage on him and help me out with the cash?"

"What kind of a hoss, my son?" en-

"What kind of a noss, my son: en-quired the father cautiously.

"Bay, four years old, fifteen hands high, weighs a thousand pounds, and sound in wind, lind and bottom."

"That sounds good to me, my son, and I want to do all I can to help you all the world." and he reached

Cranks and Climate.

Under the title, "An Englishman in America," a writer in the New Age has been writing about things American. His point of view is not always accurate, but he says some interesting things. Among others, in a recent screed on New Thought in America, he condemns many of their "isms," attaching them to "superficial thinking." He says:

there are in the winds of the continuous and the continuous and the continuous and the continuous consideration. America who have either this interesting question any actions consideration. America is the home of the cynic and the sentimentalist, the materialist and the metaphysician, the philosopher and the fanatic. Extremes meet here in society as in the climate. I am convinced that the climate has much to do with all these outbreaks of strange and impossible "issue." The atmosphere being highly electric, imaginative brains become overcharged with thought and an outlet is needed. Mere sphere being highly electric, magner ative brains become overcharged with thought and an outlet is needed. Mere impressions and whims are mistaken for truth, and the victim begins to write or to preach, to form some small groups and then securities.

This does not then by foreign transient visite a way the strong trunsient visite as the for less than cight days or by these from the victous crown hands, the grand tend is not less than \$45,000.

Some idea of the volume of business transacted at the great Echemica

Generous London.

Generous Lendou.

A young Spanish gentleman who recently arrived in the metropolis to be trained in the Lendon office of his father's firm, has formed a very flattering opinion of the tradesmen. One day he was requiring a rubber catch for his umbrella, and entered a Bond Street shop for one.

The shopkeeper was very polite, put on the rubber ring, and rolled up the umbrella neatly. "And what am I to pay?" asked the young Spaniard. "Oh, we make no charge for that!" was the

make no charge for that!" was the

reply.

A day or twe later, and again in Bond Street, a button had come off one of his boots, so he promptly went into a shop and had a new button fixed. For this the shopman also

How Money Wastes in Circulation.
Money, both, gold and silver, wears
out at a startling rate. It is reckoned that there is usually a hundred
million pounds in gold coin in England, a very large proportion of which
is lecked in the strong rooms of
banks. Yet of that which is in active
circulation the wastage is so great
that Euring every twelve months
seventy thousand pounds (\$350,000)
worth of gold and silver are rubbed
off into fine doct.

ETIQUETTE ON TIPS.

Schedule of a Chicago Walter Who Will "Do" Europe.

John Henry Williams Rehm, a Chicago waiter, who will pass the summer in Europe, travelling on the proceeds of tips paid him, gives the following precents on tipp. He plans to follow them in giving his own money away:

cents.

When entertaining a party, 50 cents

when entertaining a party, so conts or more. When in doubt, 10 per cent, of nill, Deduct accordingly, when the watter refuses to smile. Never offer a tip until after service

a proper violin.

First the virtueso handed to Paget

a proper violin.

First the virtuoso handed to Paget the Emperor violin which is claimed to be the most perfect specimen of the workmans...] of Stradivarius, and upon this instrument the boy, at Kubelik's request, gave a further demonstration of his powers. At the end of the performance Kubelik seld to Paget, "You must let me give you a violin," and the boy, with eyes filled with tears, nodaed his acceptance of the offer.

The little party went to a violin shop and after twine ene, or two lateruments Kube a science of for his protege one with a strong and beautiful tone, upon which the youth place the internezzo once eagin, and again elicited the praises of Kubelik.

Instructions were given that a good supply of requisites should be previded for Paget, and Kubelik ordered that they would be attached to the

"That sounds good to me, my son, and I want to do all I can to help you along in the world," and he reached to five much do you want?"

"A hundred and forty-nine fifty."

The old man gasped and caught hold of the desk.

"What!" he exclaimed.

"A hundred and forty-nine, fifty."

Slowly the old man shoved the roll teck into the safe.

"Ly son," he said softly, "you are westing time trading hosses. What you ought to do is to go into the loan and trust business."

Cranks and the my son, and I can to help you along in the world," and he reached supply of requisites should be provided for Paget, and Kubelik. Instructions were given that a good supply of requisites should be provided for Paget, and Kubelik he prov old or young and of either sex, but at each and every case he or she is an uncomfortable ectapanion. We are all in agreement on that point, yet we are very apt to love sight of the lan portant fact that we are all lighbe to fall into the same mental condition. A cherished desire remains unrealized or a plan fails. Teel array with the conformation of the conformati or a plan fails. "Fee allery wiftee or circumstates and we refut to be comforted. ARE THE STANDARDS OF THE WORLD

53 Highest Awards in Europe and America

THE NEW MILL AT 1000 ALBERT STREET, MONTREAL

I For over 131 years these well-known preparations have been made only at the company's mills (the largest in the world) at Dorchester, Mass., U. S. A. In order to keep pace with the rapidly increasing demand for its goods in the Dominion of Canada and the British Provinces, a large mill has

been put in operation in Montreal.

With the finest possible equipment of modern machinery, with the accumulated experience of more than a century and a quarter in the selection and blending of cocoa beans and by the employment of a perfect mechanical process of manufacture, consumers and dealers are assured that the uniformity of quality and delicacy of flavor which have made these goods the standards of the world will be maintained.

I To facilitate the distribution of goods, selling offices are located at Montreal, Winnipeg and Vancouver.

We guarantee the absolute purity of these goods under the pure food laws of Canada
