SHOP IN YOUR OWN CITY FIRST

This "Made in Canada" movement can be brought a little nearer home to each individual by emphasizing this suggestion: "Patronize the stores of your home town." Each man is entitled to spend his own money where it will buy the most—whether it be in Rome or Rome.

But in fairness—

Is it not wisdom before purchasing elsewhere to see what the stores of our own town have to offer?

The prosperity of each of us is tied up with the prosperity of his neighbor.

Acquaint yourself with what the stores of your own town are offering by reading the advertisements in The Union Advocate.

Notes and Comments

THE SERVANT OF ALL WORK

Because of the number and character of their water powers, the development and utilization of electricity is relatively to population more extensive in Norway and Sweden than in any other country of the world. The advances made in electrical science have nowhere conferred a greater boon, dependent as these nations were on imported coal. It is not surprising, therefore, that these intelligent peoples turned eagerly to the white coal produced by the transformation of water power into electrical power. They have also been quick to seize upon the value of electricity as an indispensable servant of all work upon a farm, and Norway especially has been making strenuous efforts to demonstrate to the farmer the numerous ways in which it can assist him both in his industry and in his home.

At last year's agricultural show held in Christiania, the Norwegian capital, a model farm formed one of the most prominent features. Energy was supposed to come from a small waterfall in the vicinity that had been duly harnessed, and it supplied the farmhouse and outbuildings with the needed light and heat. Devices were also shown for cleaning knives, boots and ordinary utensils, grinding coffee, juice press-

ing washing and drying clothes and ironing. Workshops were filled with electrically driven tools, food for the stock was prepared by electricity, while grooming and sheep-shearing were carried out, cows milked and the incubator electrically heated. Evidently the Norwegian farmer is not going to suffer from lack of applied information.

Indeed, the uses of electricity are continually being extended. About five years ago it was suggested by a Mr. Lushy that electricity, if properly applied, ought to kill all the fungus found on the tobacco leaf. If this were accomplished, not only would the tobacco keep in condition indefinitely, but it would be sweetened, since the current has the property of converting mold or fungus into a sweet and sterilized form. A quantity of tobacco was so treated and left for four years. The experiment proved so successful that the method is to be used on a large scale commercially. In the borough of Poplar, London, England electrolysed salt water has proved a great success for disinfecting purposes in hospitals, baths, public schools and other institutions. This process is also used in Finland, Buenos Ayres and Rangoon, and a large plant is now being installed at Portsmouth, England, where actual set water will be electrolysed in place of the artificial fluid used in inland places.—Ex.

OUR PULP MILLS

What Canada Loses by Export of Un-manufactured Wood Product

What the "Made-in-Canada" policy means in a practical way is seen in the statistics of the pulp and paper industry as published in the "Journal of Commerce" of Montreal a few days ago:

"During the calendar year 1913 Canadian pulp mills consumed 1,109,034 cords of pulp wood valued at \$7,243,368; during the same year there was exported to the United States an almost equal quantity of unmanufactured pulpwood which was valued at \$7,070,571. This quantity of unmanufactured wood was sufficient to have supplied 60 mills of the average size operating in Canada in 1913. It would have made 1,035,020 tons of ground-wood pulp, or 517,515 tons of chemical fibre. Ground-wood pulp is worth at least \$14.00 a ton, which would give \$14,490,420 for the value of the pulp that could have been made from this wood by this process. Chemical fibre is worth at least \$35.00 a ton, which would have brought the value up to \$19,665,570. In reality only \$7,070,571 was realized by the sale of this material. The pulp industry lost the profit that could have been made in manufacturing this wood into pulp, and the country as a whole lost the value represented by the cost of manufacture in the form of wages, etc.

"Laws forbidding the export of raw pulpwood cut from Crown lands in the different provinces have tended to reduce the proportion of unmanufactured pulpwood exported, although up to 1913 over half of the pulpwood in Canada was exported in this form."

The wisdom of the law prohibiting the export of unmanufactured pulpwood from Crown lands is demonstrated by the fact that the manufacture of pulp in Canada in 1913 showed an increase of over twenty-eight per cent over that of 1912, increases taking place in every province but Nova Scotia.

Similar increases have been reported in the past three or four years since Quebec and other provinces determined on a "Made-in-Canada" policy for the pulp industry as far as Crown lands are concerned. It would be well if some means could be devised whereby the export of unmanufactured pulpwood from privately owned lands could be prohibited. As will be seen above a law of this kind would result in about \$19,665,570 being realized in Canada and circulated through the pay rolls of the sixty additional factories that would be required to manufacture the wood now exported in its raw state. A vast number of the unemployed at present in Canada would find remunerative work, and there would be a quickening of business in all channels as a result of the increased circulation of money.

If your grocer tries to substitute another tea for "SALADA" you may be sure his object is to obtain larger profit than "SALADA" shows him, and you can be just as sure that the other tea will be inferior in flavour and strength, and remember that "SALADA" Teas are free of dust. London, "The Russian fleet in the Black Sea has fired upon the Turkish cruisers Breslau and Hamidieh, causing them severe damage. The Russian fleet then proceeded along the coast to the bay of Sinop, Trebizond and Paphos and set fire to and destroyed a large number of the enemy's merchant ships. It also bombarded the port of Hepa."

TWO WOMEN SAVED FROM OPERATIONS

By Lydia E. Pinkham's Vegetable Compound—Their Own Stories Here Told.

Edmonton, Alberta, Can.—"I think it is so more than right for me to thank you for what your kind advice and Lydia E. Pinkham's Vegetable Compound have done for me.

"When I wrote to you some time ago I was a very sick woman suffering from female troubles. I had organic inflammation and could not stand or walk any distance. At last I was confined to my bed, and the doctor said I would have to go through an operation, but this I refused to do. A friend advised Lydia E. Pinkham's Vegetable Compound, and now, after using three bottles of it, I feel like a new woman. I most heartily recommend your medicine to all women who suffer with female troubles. I have also taken Lydia E. Pinkham's Liver Pills, and think they are fine. I will never be without the medicine in the house."—Mrs. FRANK EMBLEY, 903 Columbia Avenue, Edmonton, Alberta.

The Other Case. Beatrice, Neb.—"Just after my marriage my left side began to pain me and the pain got so severe at times that I suffered terribly with it. I visited three doctors and each one wanted to operate on me but I would not consent to an operation. I heard of the good Lydia E. Pinkham's Vegetable Compound and was doing for others and I used several bottles of it with the result that I haven't been bothered with my side since then. I am in good health and I have two little girls."—Mrs. R. E. CHILD, Beatrice, Neb.

You Can't Make BEAVER FLOUR Bread with a western wheat Flour,

YOU can't get the delicious, nutty, homemade flavor, with western wheat flour, that you get with "Beaver" Flour.

You can't get the lightness—the snowy whiteness—the fine texture—the uniform, dependable quality and strength—with western wheat flour that you get with "Beaver" Flour.

The Agricultural Colleges have proved—by experiments—that a true blended flour like "Beaver" Flour, is the only one suitable for both Bread and Pastry.

The bakers, in the big cities like Toronto, have proved that it pays to use a blended flour like "Beaver," because all their customers want "that delicious Bread with the tasty, homemade flavor."

Try "Beaver" Flour yourself. Test it for Bread and for Pastry—and you'll see that it IS BEST for both. Your grocer has it.
