

The Razor That Caused A Revolution

It was not so very long ago that a man who thought enough of himself to look neat, was considered a "dude". The Saturday night bath, Sunday morning shave, baggy trousers and dull boots, were the general rule. Then came the "GILLETTE" Safety Razor with its message of cleanliness and comfort. And the revolt began.

Men saw the value of appearances. The fresh collar every morning, polished boots, stylish clothes and personal cleanliness, came with the daily shave.

Today, the progressive, successful man is the man who is clean, physically as well as morally.

And the "GILLETTE" started the revolution. Have you the "GILLETTE" face?

An Enterprising Young Man.

Editor Evening Telegram: Dear Sir,—The school holiday season will soon be on. Mr. E. Molloney, Esq., teacher of the Superior School will make a visit to his people north. He is just now engaged in the erection of a summer residence and was very lucky in securing two good workmen. He is meeting with small difficulty in the plan of the roof, as the plan got damp and some of the tracings are partly blotted out. Anyhow Mr. M., I trust will be equal to the occasion and that this mishap will not cause him much serious delay. Mr. Molloney is an enterprising young man and I hope he will have every success in his present undertaking. He is also a splendid billiard player, and is well posted in the art of cultivating the ground. And he strongly recommended the importation of the Sable Island ponies or mules. Placentia, July 5. B.

Gas Tank Burst Killing Five.

Minneapolis, Minn., June 29.—Five men were killed and eleven injured, two of them probably fatally, by an explosion which first wrecked and then set fire to the saloon of Edward Bushay five miles north of Minneapolis, on the Anoka road, last night. The identified dead are: Eugene Hamlin, Edward Hammish and Chas. Siggekow, all residents of Minneapolis. Two bodies remain unidentified. Edward Bushay, the proprietor of the place, and George Miller, were so badly burned that they will die. The explosion of a gas tank in the basement blew the roof from the building and fire immediately started. In half an hour the building was a mass of burning wreckage. Ernest Osterhill, a porter, rescued both Bushay and Miller, from death in the fire.

Marine Notes.

Mayor Ellis Honored.

At the T. A. Hall last night a special meeting of the T. A. & B. S. was held in the theatre. The attendance of the adult members was large. The Juveniles were also there in large numbers. At 8.30 V. P. Griffin explained the object of the meeting. It was to present their President with an address of congratulation on the honour done to him by his election to the Mayoralty by acclamation. It was an honour in which every member of the Society felt a just pride. The President responded. The address and the response will be found appended.

Seated around the Executive Board were the members of the Presentation Committee: Messrs. Myler, Wallace, White, Grace, Bates and Power, and with them were the guests of the evening, Rev. J. Bell, Rev. Levi Curtis, D. D., Mr. I. C. Morris, J. J. Spratt and J. J. Norris. Congratulatory speeches were delivered by Rev. Dr. Curtis, Rev. J. Bell, Messrs. O'Neill, Bates, Wallace, Myler, Spratt, Norris, Power and Morris and every member of the Executive of Society. At intervals the bands of the Adult and Juvenile Branches discoursed appropriate selections. At the conclusion of the addresses those present were invited to the club rooms to partake of lemonade and cake, and a very pleasant hour was spent, closing with cheers for the Mayor and the National Anthem. Outside the Hall strings of flags added attraction to the festive occasion, which was further enhanced by a brilliant display of fireworks.

To His Honor W. J. Ellis, Esq., Mayor of St. John's:

Dear Mr. Ellis,—We, on behalf of the officers and members of the St. John's Total Abstinence and Benefit Society, desire to offer to you our congratulations on the occasion of your election to the high position of Mayor of your native town.

We, of course, because of your long connection with and eminent services to our Society, have ever known and appreciated your worth, and we rejoice that now a wider recognition has been given to your many estimable qualities. Your election by acclamation to your present high position, in a most marked manner testifies to the value of your services to the town as a Councillor, and we do not at all doubt that as Mayor you will not only retain the esteem of your fellow citizens, but that by your experience and your knowledge of Municipal Government you will guide your Council wisely in the city's administration, inspire the public with complete and perfect confidence in the prudence of your management and the integrity of your role. We cannot wish you greater success in your new office when we say we trust that at the end of its term the citizens of St. John's will hold their Mayor at as high an appreciation as the members of this Society now hold you as their President.

We remain, Mr. Mayor, On behalf of the members of the St. John's T. A. and B. Society, Yours very truly,

G. TRIFIN, Vice-Pres. GEO. J. COUGHLAN, Sec. T. A. Hall, July 7, 1910.

REPLY.

Mr. Vice-President and Gentlemen of The Adult Society; Mr. President, Guardians and Members of Juvenile Society:

When it was intimated to me a few days ago that the Society had decided to take cognizance of the honor recently conferred upon their President by his selection for Mayor of this city, it was indeed to me an agreeable surprise, and the words I may give utterance to in replying to your flattering congratulatory address will, I assure you, but feebly express the feelings that well up in my heart at this moment.

Coming as it does from a body with whom I have had a life long connection, and for my adherence to the objects and principles of which I attribute every success I have had in life, your cheering words on this occasion are such as any public man might justly feel proud of, and I regard the honor as a compliment to me personally.

The attainment by a member of this Society to this position, the highest in the gift of the city, should be an inspiration to our fellow members, and especially to those of the Juvenile Branch, to firmly adhere to the flag of Fr. Matthew and to so identify themselves with the work of the Society that they must not alone escape temptation personally, but that their devotion to temperance may contribute to their material advancement and prove to them a valuable asset in winning for them the confidence and esteem of the community in which they live.

I fully appreciate that my unanimous election to the Mayoralty is an unusual testimony of public confidence, and it shall be my unfeeling endeavor to justify this confidence and to assist so far as lies in my power in making the administration of the affairs of St. John's during the next four years as progressive as its next four times upon its being carried out in a manner that will be above suspicion. I fully realize the responsibilities and duties appertaining to this exalted position, and also the magnitude of the work that the newly elected Council will have to contend with but I have great hopes that with the united assistance of the new board, together with your co-operation and the co-operation of the citizens generally, by the time the end of our term comes round, to have added to the homes of our people many of the blessings of Municipal Government.

In conclusion, I again renew my grateful acknowledgement to you for your additional token of confidence and friendship, and remain, Very truly yours, WM. J. ELLIS, Mayor.

Editor Evening Telegram:

Dear Sir,—You very truly say that emigrants from Newfoundland to U. S. A. or Western Canada are liable to many dangers, especially young inexperienced people. All sorts of traps are laid for such. Parents and guardians in Newfoundland should begin to set their faces against emigration altogether. Newfoundland should soon learn to compete against any country in the world. This country is generally admitted to be rich in metals, timber, peat and agricultural wealth. But we want to educate our young people in their ideas. We want to teach young Newfoundlanders that their own country holds out for them as many prizes as foreign lands, provided they are content with industrious lives and have spirit enough to insist on fair, honorable competitions.

(2) Young Newfoundlanders leaving this country should know in advance that in any of the big cities abroad they will have to work like slaves merely to survive. The competition is literally murderous, as it needs must be where so many millions of people are fighting for dollars. In such a crush the strong as well as the weak are ground down by the sheer force of numbers. Also the very fact that Western Canada and U. S. A. are called great countries implies that they will have become overcrowded. The two extremes of wealth and destitution will be strongly marked and the majority of emigrants will not find themselves on the millionaire side. People who want independence without excess either of wealth or poverty should learn very young that Newfoundland has by Nature's gifts all the elements of sufficient prosperity. If the agricultural wealth of Newfoundland were thoroughly studied and scientifically explained to the people—say by lectures and Societies, this country would be admitted to have comfortable capacity for at least a million people. Besides advocating Newfoundland abroad we should now begin to advertise Newfoundland in Newfoundland. It is merely brute stupidity to decry the agricultural resources of Newfoundland. This whole subject should be thoroughly and scientifically explained in press and platform. Mere indifference on the part of citizens in a country is worse than foreign hostility. The whole industrial growth of Newfoundland, and notably its agricultural possibilities, should be a useful theme and an intellectual stimulus. No better subject could be chosen for a winter course of lectures. But as regards the emigrants from Newfoundland to Western Canada or U. S. A. we may venture to remark that no precautions can be too great to save them

from the sharks of foreign cities. Young people should have safe letters of introduction to a definite address before going abroad. Parents should know precisely where their children are going and what occupation they are to take up. It is mere stupidity or worse to be indifferent in such a matter. Our young Newfoundlanders are counted, competent to fill any position in foreign lands better than most natives, but they would do better to direct their ambition towards situations in their own native land which their education certainly fits them for. Apart from that those of our young natives who do go abroad should know in advance where they are going; they should receive letters of introduction and recommendation from and to reputable persons only. This matter should be under the eyes of public authority so that persons leaving for foreign lands could protect themselves by law against all agencies of destruction. Naturally this requires co-operation and strict supervision so that young people be secured against bogus advertisements or agencies of any kind, local or foreign. The country can have no worse destiny than that of sending its citizens to foreign lands—and this evil is made worse when young people instead of going to useful, honorable careers are entrapped by agents of hell—of either sex. An emigration agent should get no footing in any part of Newfoundland, and if (he or she) those get recognition in any way parents will curse themselves when they hear of their children fooled into going to some wretched place, out of which as out of hell there is no redemption. Those sharks and infamous harpies (male or female) that make a trade of inducing young people to become members of their dirty trade should be very much worse than tarred and feathered. In fact it would soil clean tar to touch them with it. And every city has a number of these filthy old hags and reprobrates of both sexes. These are the wretches that encourage young people to go abroad or even to remain in the city provided they can make a few dollars by it. Such animals should be swept into the cesspools they properly belong to. But evidently we must encourage our young Newfoundlanders to fill situations at home such as they fill abroad most successfully, and also we must look after our young people going abroad and direct and commend them wisely.

Yours truly ANTI-EMIGRANT.
