What delightful swells our grandmothers were; with their dear old faces framed in those immaculate starched, ironed, and crimped caps. We have nothing so attractive in our modern outfit. Children's caps and ribbons were also crimped in the very same way, and with a very pretty effect. This little machine, with its tarnished brass, and rusty framework and begrimed with the dust of years was anything but attractive. It was found by me in the "big house" (Garland's) Trinity, and kindly given to me by Mr. E. J. Ryan. Now, however, with its polished brass work, and the those days; but this one is an aristocrat. What delightful swells our with its polished brass work, and the framework coated with gold, and colored enamel, it is in every respect a thing of beauty, and a credit to our grandmothers. I would give a good deal to possess its history from the

> me and give me its history." ter go to St. John's by the Prospero. Miss Ash will go on to New York with her sister, Mrs. D. Baird, and expects to be away for two or three months. Mrs. Foster will remain at St. John's till Miss Ash returns from New York. During their absence from Trinity, the "Anchorage" will be shut up, and Mrs. Ash will take rooms at the Garland Hotel. Miss Ash and Mrs. Forster are so much parts of our paro-chial machinery, that we shall miss

them very much. Bon voyage and a The wharf of Ryan Bros., has been a scene of busy activities beyond the ordinary during the past fortnight. Labrador fish has been taken out of schooners, packed in barrels on the wharf, and then sent to the market via St. John's. It is good for sore eyes to see so many men at work on hat wharf; and it takes one back in memory to the scenes enacted there in days gone by. The season's shipment will total, at least a thousand barrels, each containing 386lbs., of "Genuine Labrador Fish."

6 Exclusive Advantages:

Gentine Beaver Wall Board is the only wall board made of VIRGIN SPRUCE FIRE through and through. Our experience has proved it is the best and strongest material for wall board use. Millions of these long, tough, sinewy, yet light, spruce fibres, give to Beaver Wall Board its greatest toughness and durability.

Genuine Beaver Wall Board is a NAT-URAL INSULATOR. Due to the use of long, virgin sprace fibre, it is filled with millions and millions of microscopte "voids" or dead air pockets. And build-ing engineers will tell you that "dead air" is one of the most powerful non-conductors of heat, cold and sound.

Gentine Beaver Wall Beard is of 26
LAYER CONSTRUCTION. Laminating
several layers of wood together is widely practiced as a mean of overcoming
warping and buckling. Beaver Wall
Board is made up of 26 LAYERS of
virgin spruce fibre pressed and laminated into one perfect panel. This is
another reason for its pronounced durability.

Genuine Beaver Wall Board is kilndried and seasoned before leaving the
factory. This is another exclusive Beaver
process,

Gennine Beaver Wall Board is rendered practically impervious to moisture or elimatic changes by our acclusive, patented SEALTITE FORMULA. This treatment penetrates into the fibre and becomes part of it, securely sealing both sides of each panel against moisture. It also effects an important saving in decorating costs.

LIUNDREDS of merchants have found in Beaver Wall Board the quick, easy, inexpensive solution of how to obtain a brighter, more modern store and more beautiful windows with the minimum interference with busi-

ness. Nailed right over old walls and ceilings, it readily lends itself to attractive and lasting decorative schemes. Ideal, too, for quickly building parti-tions, window-trims, stock-bins and many other uses. Yet its cost and the cost of applying it are very low.

Genuine Beaver Wall Board has been the standard for years all over the world. It alone has the important features listed here. See that the Red Beaver Border is on every panel.

The best lumber and building material dealers in all localities sell genuine Beaver Wall Board, or can easily get it for you. Your carpenter can figure costs and apply it.
