

A WOMAN'S BACK. NOT TRAINED

Not One Woman In
Twenty Has a
Stong Back.

The kidneys are to blame nine times out of ten.

Mrs. A. H. Hutton, Jr., McCreary, Man., writes: "Two years ago last spring I had a very severe pain in the small of my back. When I would rise it seemed as if my back would break. My kidneys were very badly out of order, and I would have to get up three or four times during the night. I took one box of Doan's Kidney Pills and they effected a cure."

Doan's Kidney Pills are 50 cents per box or 3 for \$1.25, at all dealers or mailed direct on receipt of price by the T. Milburn Co., Limited, Toronto, Ont.

If ordering direct specify "Doan's."

When the blood isn't properly filtered by the kidneys are sent back through the system, and it's hardly to be wondered that backaches and lame backs come to make life miserable.

Doan's Kidney Pills are a specific for all kidney troubles. They begin by expelling all the poisonous matter from the kidneys, and then heal the delicate membranes and make their action regular and natural.

OWEN SOUND BOARD OF TRADE FAVORS IT

Majority of Businessmen Decide
That Reciprocity Would
Benefit This Country.

Owen Sound, March 6.—At its regular meeting the Owen Sound Board of Trade adopted a strong resolution approving of the reciprocity agreement. The resolution was moved by Mr. J. M. Kilbourne, one of the "big men" of the Canada Cement Company.

In a short, but well-reasoned address, in which he dealt with the arguments of opponents of the agreement, showing that there was little ground for fear for the material and none for the national welfare of Canada.

Ex-Mayor F. W. Harrison seconded the resolution, which was strongly supported by Mr. Christopher Eaton, of the Eaton Bros. Malt Company; Mr. John Legate, ex-reeve, and Mr. D. J. Kennedy, of the Wm. Kennedy & Sons Company, opposed the resolution, not through fear of Canada losing its political identity, but on the ground that Canada was prosperous now, and it was better to let well enough alone.

The majority in favor of the resolution was sufficient to indicate clearly the feeling of the meeting. About 50 members were present. The resolution was discussed purely as a trade question, and so far as could be seen with political bias.

LLOYD HARRIS' DENIAL

Has Not Stated He Intends To Join
Sifton and German.

Ottawa, April 6.—The statement that Mr. Lloyd Harris, M. P., of Brantford, has announced his determination to join Messrs. Sifton and German in opposition to the reciprocity agreement is given a denial by that gentleman.

He says he has made up his mind but he has told nobody what that decision is and he will make his decision known at the proper time early next week. The gentleman is in that attitude making a mild protest against the reduction of duties on agricultural implements he will sacrifice himself for the good of his party and his country, and will accept the agreement.

ST. THOMAS EMPLOYEE KILLED IN MICHIGAN

Detroit, March 5.—Robert S. Acton, a Michigan Central conductor, was instantly killed near Jackson this afternoon when he lost his footing and fell between two cars of his train.

The body was fearfully mangled. Acton leaves a wife and three children. His home is said to be in St. Thomas, Ont.

LADY CASUALTY DEAD

Quebec, March 6.—The death took place this morning of Lady Casault, the wife of the former Chief Justice Casault. She was in her 70th year. Her death was somewhat unexpected, she having been ill for only a couple of days with what was supposed to be the grip, but was thought to be recovering.

In Search of Beauty

You Must First Win Health By
Getting the Blood Rich
and Red.

DR. CHASE'S NERVE FOOD

Every man and every woman has an individual idea of what constitutes beauty.

In beauty skin deep or does it depend on the glow which health alone can give? Is it due to regularity of feature or to the gracefulness and elasticity which accompany health and vigor?

To win beauty you must first gain health. Rich, red blood is the secret. Dr. Chase's Nerve Food is successful and popular because it forms rich, red blood, and in this way gives gracefulness to every movement, and a beautiful, natural glow to the complexion.

This blood and weak nerves soon give one a tired, worn-out appearance. Worry and anxiety show themselves in wrinkles and care lines. Dr. Chase's Nerve Food enriches the blood, restores vigor to the nerves, and drives away headaches and bodily pains.

By filling the arteries with new, red blood Dr. Chase's Nerve Food rounds out the form to beautiful proportions, makes the muscles and tissues firm and strong, and gives vivacity to mind and body.

Dr. A. W. Chase's Nerve Food, 50 cents a box, 12 boxes for \$5.00, at all dealers or by mail from Dr. A. W. Chase, Toronto.

WOMEN ARE NOT TRAINED

This Is Why the Country Is
Confronted by the Servant
Girl Problem.

AN AMERICAN OPINION

Says the Young Woman of Today Does
Not Know How to Keep House
and Hence the Trouble.

Apologues of the servant girl problem, which is giving London women no little anxiety at present, because of the impossibility of securing the desired help, The Advertiser had an interview the other day with the superintendent of a large state employment office in the United States, who happened to be in London.

"Why cannot the problem of domestic help be solved?" he was asked.

"Why cannot it be solved?" he repeated the question before answering it. "Because of the increased demand for the woman servant over ten years ago, and the increase of ten years ago over the previous decade, and the increased demand for that."

The situation arises from lack of training of the young women of the country in the domestic arts and crafts. Most mothers nowadays do not make their daughters wash the dishes. Fewer make them help with the family washing, and fewer still in cooking or baking.

"It is a generation or so since this lack of training became common and the result is that the delicatest and the best of the young women, when they are called upon to do the work of a servant, are at a disadvantage. They are called then, and they had larger families, too. Most families then got along with the aid of a washerwoman one day a week."

Now it is different.

"Now it is different," he continued. "The young woman who marries does not know how to keep house and she employs a servant—a maid, also a washerwoman. Americans with small incomes try to live up to the pace set by their friends who earn more, and to do so must have servants. It is getting to be a case of employing servants, but not knowing how to do the work."

Another reason for the servant girl problem is the decrease in the supply. Some years ago there were many Irish, Swedish and German girls coming to this country with their parents who went into service. Now there is less of this immigration. Also the young people of these races, who come better educated, and they become stenographers, bookkeepers, and school teachers. They have shorter hours, Sundays off and greater freedom. From the races that naturally would supply servants the factory forces are recruited. The servant girl problem is going to grow bigger, instead of smaller.

Domestic Science Compulsory.

In North America domestic science is being made a compulsory study in the public schools. Some have advocated trying that here, but it will not alter the situation. You may force girls to study domestic science, but you cannot force them to enter domestic service, and the Government cannot force a woman to do her own cooking if she wants a maid."

CORRESPONDENCE

Imperial Free Trade and its Implications
To the Editor of The Advertiser.

In your issue today commenting on the suggested policy of free trade within the British Empire, you were very favorable to the policy. Free trade within the Empire necessarily implies a tariff against others. This is a very fair claim, but it is not a claim to be made by the Empire. The Empire is not a tariff. The Empire is a free trade area. The Empire is a free trade area. The Empire is a free trade area.

Just try to realize what this means—the British Empire versus the other parts of the world in trade. Take the cotton trade, the most important of the Empire's trade. Of course, we should have world-wide trade, and the United States and Canada and other powerful countries against the British Empire. Imagine the States opening the market with a prohibitive export duty on raw cotton. I lived in Lancashire at the time of the Civil War and I remember the awful consequences of the lack of cotton to keep the mills of Lancashire, Yorkshire and Yorkshire in operation. I grant we may never again see such misadventure and starvation as existed among the mill hands and others—it was terrible!

Conditions were not as favorable for the States to put the screw on us as they are now. They are at peace with themselves, and are at peace with themselves.

Imagine the result of such an export duty on raw cotton. The cotton industry of the Empire would be ruined, the mill hands would be sent to the States and Germany, and the Empire probably lose its supremacy in this important manufacture.

Could anyone think of a quicker way to kill the goose laying the golden eggs than this restricting of trade within the Empire, and are its advocates prepared to face the consequences of applying the match to precipitate this condition of things?

The British markets are a grand asset of our Canadian trade, but those who know most about it are those who identify with it. See the trend of this market today. It is a thing of the past; cheese is gradually going into other channels, and less to Great Britain, and the same can be said of apples, tuckers and other poultry.

Great Britain has an abundance of all the things that the cheap producing countries of Europe, Russia and Siberia, and as well as an enormous production in Great Britain and Ireland, and here much to the front in farm products with the best conditions existing in the world.

With the great advance in methods of farming, the older provinces, and the expansion of the country, Canada now needs more extended markets for its products. The price of price is to be sustained.

Canadians are loyal to the core, but with these advantages of "free trade" within the Empire only risk the consequences of a world-wide war, and a world-wide war would lead to actual war and spoil the whole game, and as for prosperity to the British Empire is concerned?

the cruelty to animals question by their letter. I hope everyone will do all they can to help put it down. There are a number of ladies who belong to the Humane Society and are doing good work quietly. When they see a driver abusing the horse, they take down the name on the sign and tell the employer or driver him a card. In a number of cases they have been successful in getting the driver to stop for one hour with blanket blown hot him, and more often than not, then he drives like mad to make up for lost time. This has been seen frequently. If the employer leaves the feeding and watering to those boys who do not care what happens to the horse, they look a number of them half-starved. Where there is one boy that attends properly to his horse after his work is over, there are ten that do not. If the animals could speak they would say to a gentleman visiting here: "We are here either in Toronto or Hamilton, saw such a poor lot of horses on the streets as he did here. Why? Because they are abused and neglected. People notice these things."

Professor Funk Replies to Edison.
To the Editor of The Advertiser:

The interview with Thomas A. Edison on immortality, published last October, is still awakening much interest, even in far-away countries.

No soul; "death ends all"; "the brain a piece of meat"; "the brain produces thought as the liver secretes bile, having an individuality only as has New York City, with its five million of human beings, each brain a combination of millions of cells; when New York City disintegrates, its individuality is gone; when our brain dies, that ends us."

Is there, or not, another side to the "Great Divide"? At death does our spirit go to another sea, or a new world, and it weathers for ever more? That interview with Mr. Edison, backed by his personality and by the memory of his seven hundred patents, is destined, like the sunset sun, to travel around and around the earth. The storm may be over, but the sea runs high, and we are now in the more quiet aftermath, may I not venture to ask for space for a thought or two which I think under your feet at three score years and ten—at an age when Mr. Edison and myself are apt to think soberly of the "valley and shadow," and—where do you think?

If any man at whose gate the black camel is preparing to kneel, has a thought on this subject, especially if it is drawn from experience, he should write it down in great haste, which he finds worth while—owes it to his fellows to tell it.

Mr. Edison is right in this: none of our five senses, nor all combined, can reveal immortality, much less demonstrate it. The ear cannot see, the eye cannot hear. Magnifying light, the ear cannot hear, the eye cannot see. Every sense is shut up absolutely in its own realm, but he is a bold scientist who would say that the five senses are other than those covered by these five senses. There may be ten thousand other groups of five or more senses. There are 120,000,000 people on earth today, every one of whom is under sentence of death, and can be lifted above the slime and mire and rock of the valley and shadow, and upon the wings of faith and hope. Will not the pitiful man, if he is wise, seek in every way to strengthen those who are in no way break one of the least of them, unless impelled by the absolute certainty?

Lightning is logic; yes, but at times there are other far more effective ways of reaching truth than by pure logic.

I. K. FUNK.

New York, Feb. 25.

KIND WORDS FOR LATE P. M. LOVE

Spoken by Mrs. Boomer at a
Meeting of the Y. W. C. A.

A large and representative meeting of the Local Council of Women was recently held in the Y. W. C. A. building on Dundas street.

The president, Mrs. Boomer, touched on many phases of the work which had been carried on during her absence in England, and paid a warm tribute to the late Madeline Love, who was always so willing to help in every good work.

Mrs. Barker spoke of some of the work which she had done during her absence, and Mrs. Barker spoke of some of the work which she had done during her absence, and Mrs. Barker spoke of some of the work which she had done during her absence.

Mrs. Barker spoke of some of the work which she had done during her absence, and Mrs. Barker spoke of some of the work which she had done during her absence, and Mrs. Barker spoke of some of the work which she had done during her absence.

Where is the brain power that is in control of the universe? If, on the other hand, there can be thought without brain, the request was made that the allowance for horses should be increased from \$1 to \$1.25 a day. This was refused.

The recommendation that permanent shelters for horses be erected at cavalry camps was also refused. Many valuable horses brought to camp receive minor injuries, which, while not permanent, depreciate the value of the animal. It was recommended that in such cases a board should be authorized to make an allowance for the depreciation caused by such injuries. The department decided that no change from the present regulations could be made.

The question of pay for the cavalrymen is still under consideration. Based on rifle shooting, since the horsemen have so much other work besides shooting, as compared with the foot-soldiers, it is asked that the troops be given a flat rate of 75 cents a day, instead of 50 cents, and that efficiency pay for shooting be arranged in addition. A request for distinctive uniforms for the various corps was also refused. A few minor requests were granted.

DO NOT FEAR STRIKE

Shipping Men-Say Seamen Not Likely to Go Out.

[Canadian Press.]

London, March 6.—Southampton shipping men discredit the revived report of a general seamen's strike before the coronation.

Representatives of the Nord Deutscher Lloyd, the Royal Mail and the Union Castle lines say there is nothing in the alarmist statements. They assert that the International Seamen's Association has no substantial following.

A White Star Line official, while regarding the outlook more seriously, believes there is no backbone in the strike movement.

THE FALLS EXPLOSION

The Ontario Government to Conduct a Special Investigation.

Niagara Falls, Ont., March 5.—The jury empaneled by Coroner E. T. Kellam to inquire into the circumstances surrounding the deaths of Hendrikus, Arthur Orchard and Charles McDougall, killed in an explosion at the Ontario Power Company's works on Friday, viewed the scene of the accident this afternoon. Evidence will be taken on Thursday night. It is understood that the Ontario Government will conduct a special investigation to fix the blame for the explosion, which the power company officials claim was due to a leak in the natural gas pipe. Crown Attorney Cowper is also investigating.

CAVALRY REGIMENTS
ASK FOR CHANGES

Say the Service Could Be Bettered in Several Ways.

Ottawa, March 4.—The Canadian Cavalry Association, which met here this week, formulated a number of requests to the militia department, based on experiences during the annual training period last summer, for the betterment of conditions in the service. Very few of the requests were acquiesced in.

The department was asked that any horse taken on the strength of a regiment and later rejected by the principal veterinary officer should draw pay and allowance till date of arrival home. It was decided to issue railway transportation in such cases, but not pay.

To the request that police horses be provided for the cavalry in all cases of journey by rail, the answer showed a satisfactory financial condition.

SMASH-UP IN ROCKIES.

Vancouver, B. C., March 5.—A broken rail caused a smash-up on Saturday night on the Nicola branch of the Canadian Pacific Railway. Three coaches and five coal cars went off the track, which was torn up for 200 yards. The passengers were badly shaken up, but no one was seriously hurt.

The only thing that saved the train from going over the embankment in-

to the river was the breaking of the couplings between the cars.

BAKERS WILL APPEAL
THE INCREASED RATES

New Charges in Regard to the
Return of Boxes Is
Unsatisfactory.

Local bakers say that they intend taking the matter of the increased rates on returned bread boxes to the railway commission, and ask for a reduction in the charges that are being made by the express companies under the schedule that went into effect on March 1.

"We consider that we should get these boxes sent back for nothing," said one of the city's leading bakers today. "We handle more bread out of London than is sent out of Toronto and Montreal put together, and the companies get good rates for carrying it. We send a lot of bread out of the traction lines, and they have no trouble at any rates at all, and still carry back all our boxes for nothing. The bakers of London have built up their present tremendous trade through the facilities they have received from the express companies, but the whole business is in danger of collapsing if they make such charges that it takes all the profit off the bread."

The express companies take the gross rate on the empty boxes, occupy an immense amount of valuable space in the cars, and that they have to keep extra men and horses to deliver them. For all this extra work and trouble they haven't been receiving any remuneration and they think that they are entitled to some pay for it.

Henry Byron, seriously injured in the explosion, was today removed from the General Hospital to his home, George Garvey is reported to be in a serious condition, and is not expected to recover. The others injured are out of danger.

CUT TO PIECES.

Kingston, Ont., March 5.—Mrs. Emma Walker, domestic, was killed at the Sydneyham crossing on the Kingston and Pembroke Railway yesterday afternoon. She was struck by a train while walking on the tracks, and cut to pieces.
