

Underwood

¶ Underwood stands for typewriter perfection in construction, labor-saving devices, ease of operation, durability, and beauty of work. The Underwood was the original visible-writing machine. It has seen a decade of constant improvement.

¶ The new Underwood Billing Typewriter simplifies and systematizes the entering of orders and the rendering of bills; saves time; insures accuracy; as many copies of as many different forms as you require, at one writing. If you use the old way the Underwood Biller will save 50% of the time required; if you use an up-to-date system, the Underwood is necessary to perfect it.

¶ A book is necessary to explain it fully. Let us send you the book.
