PEARL LAKE GOLD MINES WILL COME TO FRONT

WEN

PORCUPINE GOLD CAMP

Company Has Excellent Location and Good Prospects-Under Good Management.

The Pearl Lake Gold Mines Co., Ltd. of Porcupine, is now the next to attract attention. It is capitalized at \$2,500,000, half a million of which was \$2,500,000, haif a million of which was put in the treasury; part of this is now offered to the public. The property has a surprising number of good veins on the surface, some of which have been stripped and free gold found. It added the the Hellinger at the southwest adjoins the Hollinger at the southwest corner and at the top adjoins the Armstrong & Booth and lies directly in the line of the finds of free gold on other and adjacent properties. A gang of 15 men have been putting up new camps and have about completed the work, and the president, Mr. Burr E. Cartwright, stated yesterday that he hopes to have 40 men put to work im-mediately at sinking three separate shafts. A core drill with a steam plant drive is also on the way to the property will be put to work as soon as it

can be got there.

Anyone who knows the success that Mr. Cartwright made of the Timis-kaming Silver Mine in Cobalt and the energy and perseverance he applied to its development, can rest assured that the same methods and persistence will characterize the Pearl Lake property

mine as much ore as they possibly can at the earliest possible date, and have some of it stamped at the Hol-linger customs mill, which is to be ready in three months or less. En-quiries in regard to Pearl Lake are

HAVE GOOD PROSPECTS

Whitney (?) is a question asked many times by those who are not in touch with the district.

with the district.

Murphy lies north of Tisdale, and Hoyle north of Whitney, and as both are heavily wooded and in apparently a deep clay belt, little or no prospecting has been done except by those who hold lots where the prospects look extended.

So far as is known gold has not been discovered in Murphy, which is almost solidly planked with veteran claims. In Hoyle hoders of two veteran claims state that they have found fickes of free gold in small quartz leads. The line of fissuring, where the ridge In Hoyle holders of two veteran claims state that they have found fikes of free gold in small quartz leads. The line of fissuring, where the ridge comes to the surface, runs from the Höllinger, as far as traced, northeast thru Tisdale to a noint near the Miller Forcupine, where the belt from present evidences is over a mile in width, covering the Smith veteran and the Armstrong-McGibbon, the Miller Porcupine, and thence thru the Scottish-Ontario to the Mulholland, Hughes, and on allow more casterly to Three Nations Lake.

The line of fissuring is in evidence over into Cody, and should the work along the ridge be completed the coming summer: it is more than evident that before every of another fill coming.

Hack Driver Arrested. Dr. Herbert H. Cameron, 207 Sher-bourne-street lodged a complaint against Hampton Haultain, hack driv-15 Russell-street, concerning a missing set of harne's, and Detective Guthrie made the arrest last night.

Porcupine-Tisdale

HEALTHY REACTIONS.

After extreme advances, the

After extreme advances, the two representative Porcupine stocks, Hollinger and Preston East Dome, had a healthy setback yesterday. A rise of nearly 100 per cent. in Preston in two days encouraged speculators to take profits. The buying power was exceedingly good and despite the volume of shares thrown on the market, the price held strong, ten points above held strong, ten points above Monday's opening. The decline in Hollinger was partly attributed to profit taking, and partly to manipulation On good authority it is stated that \$10 a share has been offered by a London financial house for con-trol of the company, and that overtures to that end are going

SILVER MARKET

Improvement in Outbreak Owing to Purchases for China.

under date Feb. 23: The outlook of the market is a little better this week. The improvement was caused by purchases for shipment and also for forward delivery on account of China, where exports from the southern districts had been stimulated to some extent by the relatively low rates of expenses.

extent by the relatively low rates of exchange.

It is a reminder that the the interference of the plague with business is undoubtedly serious, and the trade interests of China-notwithstanding the wide extent of the country-are closely interwoven, yet, after all, the trouble is so far local, and other important trade centres cannot remain at a standstill. Nor must it be lost sight of, as a point favorable to silver, that imports of merchandise into the plague infested districts are, to a certain extent diminished thru this cause.

quiries in regard to Pearl Lake are coming in from all quarters and the chances are that it will soon be listed on the Toronto and New York markets.

Altho the decrease in the silver rupees held in the treasury currency reserves and the gold standard reserve combined do not hold out much hope of any purchases on account of the Indian Government this year, the reduction from the figures of 1909 is worth noting:

Feb., 1909, combined totals 42% crores.

Feb., 1910, combined totals, 2914 crores.

New York Curb.

Charles Head & Co. (R. R. Bongard) report the following prices on the New York curb: Townships North of Tisdale and Whitney of Great Promise—

Free Gold in Hoyle.

PORCUPINE CITY, March 4.—(From our Man Up North.)—What are the prospects of gold heing found in the townships to the north of Tisdale and Whitney (?) is a question asked many times by those who are not in touch.

MINING MEN.

Mr. J. A. Hughes, the man who staked the well-known Hughes claim in Porcupine, which was sold recently \$300,000, was at the King Edward yesterday, and leaves to-day for the States. Mr. Hughes is also interested in the Porcupine Reserve Mining Co.

Charles McGinnis, part owner of the arrived in Toronto yesterday on business, after several days spent in Ro-

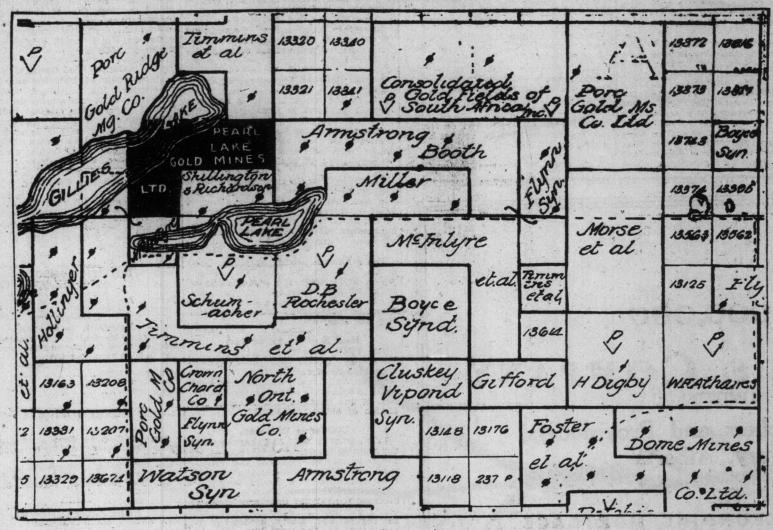

dows, get into bed and send for a doc-tor. Do not shut the windows and take hot drinks—that would be foolish.

Darring unroreseen difficulties 60 square miles, while that of the Philippine days should find the rails down to the ippines is 115,026, says Executive Section of the Philippine for the Philippine of the Philippine for the P

Pearl Lake Gold Mines, Limited

(No Personal Liability)

DEARL LAKE GOLD MINES, Limited, offers to the discriminating investor one of the best opportunities in the Porcupine Camp. Its location is right-lying as it does between the Hollinger and the properties of Cons. Gold Fields of South Africa-and without doubt on the same gold quartz dyke. It is in the centre of the section where all the big mines that are now before the public eye are located. Competent and experienced mining engineers have reported favorably on the property and given their endorsation. Camps are practically finished for the accommodation of forty men. Development work is proceeding rapidly, and the time to secure holdings at the opening price of 50c per share is now.

The map shows the proximity of the Pearl Lake Gold Mines to the other well-known ones in this section of the Porcupine Fields. The Timmins-Hollinger adjoins to the southwest, and the vein on which most of the work has been done—having an average width of eight feet, and carrying big values to over a depth of 200 feet-if it keeps the same general direction, will cut into the Pearl Lake

The Consolidated Gold Fields, on what is without doubt the same vein, have recovered the same high values at a depth of 247 feet with a core drill. This property lies just north and east of the Pearl Lake Gold Mines. On the Foster, the Vipond and the Dome, all in the near vicinity, much work has been done with the results of proving that the properties are very valuable.

Pertinent Facts.

That Porcupine is an exceptionally rich and extensive gold camp is the opinion of the experienced mining men of the world, which is fast proving itself to be a fact.

That this section has several mines which will be ultimately big producers-no one will attempt to

That the Pearl Lake Gold Mines will take its place, after development, amongst the big producing mines is our firm opinion.

Investing Points.

Intending investors are invited to investigate thoroughly the opportunity we are offering. The properties are clear of all indebtedness—are

The proceeds of the sale of the treasury stock will all be applied to further development, and the work is in the hands of conscientious and capable

Only a limited amount of the treasury stock will be sold at the price of 50c., par value \$1, and as development proceeds and the extent and depth of the ore bodies is ascertained it is bound to rapidly advance in value. As soon as the present allotment has been subscribed the stock will be listed and no more offered for sale. A prospectus and any information will be sent on request.

owned absolutely by the company, and there are no deferred payments.

In order to comply in every particular with the Ontario Companies Act, the following information is given:

The original incorporators are: George Herbert Sedgewick, Austen Gregory Ross and Lionel Davis, Barristers-at-law; Hugh Leroy Slaght and James Lewis Duncan, Students-at-law—all of Toronto, who each subscribed for one share. The bylaw's of the company provide that the company shall be managed by a board of five directors, each of whom shall be the owner of at least one share of the capital stock of the company. No provision is made in the bylaws as to the remuneration of directors. The directors may proceed to allotment at any time, when the five shares subscribed for by the original incorporators of the company have been paid in full. The amount payable on application and allotment is the full purchase price of each share. The number and amount of shares issued or agreed to be issued as fully paid up, otherwise than in cash, is two million shares of the capital stock of the company of the par value of two million dollars, which have been fasued as fully paid up in payment for mining claims Nos. 13707, 13708, 13709, 13710, all the Township of Tisdale, in the Porcupine Mining Division, transferred to the company. The said shares were so issued pursuant to a contract bearing date the 1st day of November, 1910, made between Alice J. Cartwright and the company. The said contract, or a copy, thereof, may be inspected at any reasonable time during business hours at the head office of the company. No amount has been paid as commission, but the directors are authorized to pay a commission not greater than twenty-five per centum upon the amount realized upon the sale of such share of stock. The preliminary expenses are estimated to amount to not more than fifteen hundred dollars. No director of the company has any linterest in the promotion of the company or in the property purchased by the company, except such interest as he may have by holding stock in the company or in the property purchased to any promoter. No PURCHASE COUPON. King and Yonge Streets, Toronto. HEREWITH find \$......, being payment in full for shares Pearl Lake Gold Mines, Limited (no personal liability), of par value of \$1.00 each. I acknowledge having read Prospectus.

and N. O. Route to Golden City Miles of Steel Laid.

PORCUPINE CITY, March 4.-(From Our Man Up North.)-The railway right of way, cut entirely from steel to the Frederickhouse River, and openings all the way this side of the river up to Hills, with but short stretches of timber intervening, means that within two weeks the entire right of.
