Buyers of these incidents, the markets for mining NEW THEORY OF HEREDITY FOR SALE H. C. BARBER of these incidents, the markets for mining shares were in the main steady, and here and there even advances were forthcoming. The issue which dominated the local mar-kets tolday was Peterson Lake, the trans-actions in which ran into nearly 75,000 shares. The strong incentive to tolday's buying was the change of control which was announced regarding the property on Saturday. The price at one time during the day was lize above saturday's close and over 20c higher than Friday's price. The markets otherwise were not active, and there was a disposition to sell some issue for a turn on the ground that liquidation would result from losses in other markets. This was said to account for the de line in Green-Meehan, where a large block was forced, upon the market. Nipissing was forced, upon the market. Nipissing was at small reductions. Kerr Lake was in increased demand on the announcement of another dividend. The markets closed slightly under the influence of offerings, ivit without weakness. 2.20 shares were in the main steady, and here 1.39 76 157 Prof. Macallum's Lecture Before For full information apply to CANADA MINES LIMITED. 45 Addialde St. East.
