Mitchell, Wallace and Co.'s Review
Very little has been doing in Ontario
istocks. Golden Star receded on small
fransactions. We learn that the mill is
working on very good ore. There is like
ly to be greater activity in Camp McKinney
shares. Waterloo is looking well, and our
Western correspondents panficularly advise
the purchase at present figures. CarlbooHydraulic is an excellent investment at
present market price. We have suggested
the purchase of this stock for some time.
These shares are scarce, very little comlng out for sale. Fairview Corporation is
meglected, but we anticipate a strong
revival of interest in this stock. The
Stemwinder mine has a large body of
pay ore ready for the mill, and we expect
milling operations to begin within a
month. The Boundary Creek stocks are
being purchased by Western brokers. Morrison and Winnipeg are in demand, but
buyers and sellers are unwilling to meet
each other. Considerable Rathmullen is
changing hands, the price remains firm.
Nambler-Cariboo has led the list in point
of sales. The demand is principally from
Montreal and Spokane. The cause for
the advance is attributed to the discovery
of a rich ore body in the lower tunnel of
the mine. We expect this company to resume the payment of dividends. Van
Anda will probably be active during the
coming week. We have been advised of
a rich find of free gold in the Security
mine, the property of this company.
Values are reported as high as 120 ounces
of gold to the ton. Dividends are spoken
of as a probability before the end of the
present year. The Rossland list has shown
some life. Big Three was active on the
strength of a strike of good ore in the
Mascot mine. Evening Star is being picked
up by strong hands. This stock may take
an upward turn soon. Considerable activity
is shown in the Republic list. This province has absorbed a large amount of the
better class of Republics. Our. correspondents advise the purchase of Jim Blaine.

The Doherty Organs. An construction, artistic workmanship, ease of action and excellent tone, quality and touch, the Doherty Organs stand alone. Their exhibit is the cynosure of all eyes at the Fair, and the instruments displayed are in every respect reliable and well deserve the high commendation that is universally bestowed upon them. The Doherty is known by every musician in the country, and they all, with one accord, pronounce it to be superior to all others.

Doherty Mfg. Co, Sarnia.

The Greek and Roman mythology is a fascinating study. It relates a concise account of all their chief deities, heroes, etc. They gave them names and adored them devotedly, for they were to them what our God and religion is to us. Many of these gods are as familiar to us as our own cognomen. Nox, the Roman form, and Nyx," the Greek form in mythology, represents the godess of night, and she had a son named Somnus, who was the God of Sleep, and many a weary soul has tried to woo him if for only an hour during the night. Who is it that can not exclaim, I have tried to woo Morpheus, but my eyelids have refused to droop. Young says that balmy sleep is Nature's sweet restorer. Tennyson chants: "Sleep, my pretty one, sleep," and Eugene Field, in his Sicilian lullaby, sings: "Sleep, little one, and take thy rest, With angels bending over thee."
But the man who eats a supper well cooked on a Sarnia range can sleep soundest of all. He has no stone in his stomach and goes to sleep with good will to all men, especially to the maker of his range. Try a Sarnia stove and be convinced. Doherty Mfg. Co., Sarnia,

Nicolle Patent Closet.

Of particular interest to architects, plumbers, sanitary authorities, and as a matter of fact, the public generally, is the Nicolle patent double dushing oderless closet. By the introduction into a house of this clever and unique invention, many benefits are derived. It possesses several features distinctly its own. For instance, at the end extending back from the rear edge of the seat, is a selfmade local vent, from which the ventilated air is carried into the vent pipe by the cold air from the closet room floor. This exhibit is found in the Bicycle Building, and Mr. Nicolle, the inventor, will be only too happy to explain its superiority over the arcsent water closet. The article has also many other features that commend it to the householder, and which can be better understood by seeing it.

Buys a share in a Mining Syndicate with valuable properties. This is a much better investment than Mining Stocks.

a Pearline woman. "There are others." And if the others don't look cheerful, it's no wonder. You've got to work hard, if you do your washing and cleaning with soap, and you've got to work a long time over it, and you're wearing things out with your rubbing. Pearline makes the work easy and quick: saves rubbing. The wonder is that

any woman who has to do soap's hard work can look pleasant Still, some of them do, in spite of it.

Millions NOW Pearline

TO ATTAIN LONG LIFE!

The following RELIABLE FIGURES from that great authority, The British Medical Association, are worthy of careful consideration. From 4,234 deaths they give the average age attained by drinkers as follows:

 1. Total Abstainers
 51 years, 22 days

 2. Habitually Temperate Drinkers
 63 years, 13 days

 3. Careless Drinkers
 59 years, 67 days

 4. Free Drinkers
 57 years, 59 days

 5. Decidedly Intemperate Drinkers
 53 years, 3 days

 These figures show, singularly enough, that those who reach the shortest age are those who drink no alcohol whatever, after them come the drunkards, who only exceed them by a trifle.

The greatest average age is reached by those who drink moderately.—Review Scientifique & London Daily Telegraph.
